Examples illustrate how the Golden Ratio appears in nature ...Golden Ratio = Mind Blown!There are many examples of the Golden Section or Divine Proportion in nature. Below are just a few: The

eye, fins and tail all fall at golden sections of the length of a dolphin's body. The dimensions of the dorsal fin are golden sections (yellow and green).The Golden Section in Nature: AnimalsThe Golden Ratio is a common mathematical ratio found in nature, which can be used to create pleasing, organic-looking compositions in your design projects or artwork. It's also known as the Golden Mean, The Golden Section, or the Greek letter phi.The

Golden Ratio: A designer's guide | Creative BloqThe golden-section search is a technique for finding an extremum (minimum or maximum) of a function inside a specified interval. For a strictly unimodal function with an extremum inside the interval, it will find that extremum, while for an interval containing multiple extrema (possibly including the interval boundaries), it will converge to one of them.Golden-section search - WikipediaIt is an excellent introduction to
