Veterinary Consult Clinical
Companion* BSAVA

This brand new Manual focuses on soft tissue surgery of the head, neck and thorax. Together with its companion volume, the BSAVA Manual of Canine and Feline Abdominal

Surgery, it highlights for the veterinary surgeon in general practice the most commonly performed techniques. Procedures that are undertaken by those surgeons with more experience are also discussed so that practitioners can better inform their clients as to clinical options. The Manual begins with a consideration of general patient assessment and

stabilization, anaesthesia and analgesia, and postoperative care for surgical conditions of the head, neck and thorax. An illustrated description of surgical instruments and materials follows. Chapters on different organs/systems consider relevant anatomy, clinical signs and diagnostics, and medical treatment in addition to surgical techniques. Emergency

management of respiratory distress is described, including instructions on how to perform an emergency tracheostomy. Surgical approaches to the thoracic wall and drainage of the thoracic cavity are described in detail and illustrated. Step-by-step Operative Techniques detail the common procedures in an easy-to-follow practical way, with notes on patient positioning and preparation, instrumentation and postoperative care. Full-

colour photographs and specially commissioned drawings illustrate both the Operative Techniques and the accompanying text. Surgical diseases of the head, neck and thorax are considered a challenge by many surgeons. This Manual, written by an international panel of authors, serves to demystify common techniques and provide a firm foundation for further development of surgical skills. BSAVA BSAVA Manual of Canine and Feline Behavioural

Medicine BSAVA BSAVA Manual of Canine and Feline Radiography and Radiology BSAVA The manual has been written with the veterinary surgeon in general practice in mind and it aims to offer both sound scientific information and practical easy-to-follow advice. Following a consideration of the role of behavioural medicine within the veterinary practice, the normal behaviours of cats and dogs are described. Some more theoretical chapters are included, to

give a background understanding of learning theory, the physiology of fear, and types of aggression. But the major focus of the Manual is on the practical approach to history taking, diagnosis, treatment and prognosis, and follow-up of the range of behavioural problems encountered in dogs and cats. Colour photographs and specially commissioned drawings illustrate important features such as body postures, and tables throughout help the reader to access

important information quickly.

A Foundation Manual
BSAVA

This new addition to the BSAVA Foundation Manual series serves to provide an easily accessible source of practical advice on the management of common feline problems encountered in first-opinion practice. It begins with an introduction to important general issues in effective feline practice, including handling techniques, principles of examination and how to ensure a cat-friendly

practice. Gold-standard preventive healthcare guidelines focusing on a life-stage approach and a discussion on therapeutics including antibiotic use, analgesia and anaesthesia follow. The main part of the Manual comprises problem-oriented sections that focus on the investigation and initial management of, first, emergencies and then other common presentations such as alopecia, polydipsia and seizures. The final systems-based section gives more detailed

information on the management of the disorders commonly seen in general practice. The Manual gives enough information for any vet to deal very competently with commonly seen feline problems, also providing guidance on where to go for further information if required. Where appropriate, guidelines are also given for when referral should be considered, and for situations where financial limitations may exist. A unique feature of this Manual are the many

'Quick Reference Guides' (QRGs) provided throughout, which present practical techniques and treatments in easy-to-follow step-by-step guides, with clear colour photographs illustrating each step whenever possible. The international panel of authors were carefully chosen for their practical expertise and passion in different areas of feline practice. The practical and easy-to-follow advice provided in this Manual makes it essential reading for all

new graduates and first-opinion vets who see feline cases, as well as veterinary students and veterinary nurses worldwide.

BSAVA Manual of Canine and Feline Ultrasonography BSAVA

Following the success of the first edition, this Manual has been completely updated and reorganized to be even more practical and user-friendly. It follows reproductive medicine from mating, through conception and birth, looking at problems such

as infertility and dystocia along the way. Care of the neonate plus conditions that may affect new puppies and kittens are also included. New developments in drugs and in biotechnology are discussed. Full colour photographs and illustrations support the text, which has been prepared by international contributors.

Canine and Feline

BSAVA

Dermatology constitutes a large percentage of the daily caseload in small animal practice and can

represent a challenge for the busy practitioner, as many different diseases have similar presenting signs. For this reason, a structured understanding of how to approach a dermatological case is essential for a successful outcome. The 4th edition of the BSAVA Manual of Canine and Feline Dermatology has been completely updated, chapters have been expanded and structurally divided to include the management of specific diseases and common dermatological cases,

such as ectoparasite infestation and its treatment and prophylaxis, atopic dermatitis and its management, superficial and deep pyoderma and their treatment, feline-specific conditions and their management, autoimmune and immune-mediated diseases and a targeted management, etc. New chapters have also been added to this new edition, such topical treatments, nutrients of the skin and regional dermatoses. The manual begins by providing the

reader with a grounding in examination and investigative techniques, including a new chapter on cytology. The second section focuses on a problem-oriented approach to common dermatological conditions and their management. The final part of the manual covers the major skin diseases of dogs and cats.

Principles of Health and Welfare in a Multi-animal Environment

BSAVA

The second edition of this best selling Manual has

been thoroughly revised and updated under the direction of the new editorial team of John Williams and Alison Moores. Topics covered include wound healing, decision-making in closure, axial pattern flaps and pedicled muscle flaps. In addition, the Manual features case studies and step-by-step operative techniques. Specially commissioned illustrations accompany the chapters. *BSAVA Manual of Canine and Feline Wound Management and Reconstruction* BSAVA

This brand new manual provides a practical guide on how to deal with various clinical situations that arise when working with cats and dogs in a shelter environment. The first part of the manual describes the principles of shelter medicine and population health. The second part covers the prevention, management and control of disease in a shelter environment. The final part provides information on working with people in the shelter environment. *BSAVA Manual of Canine*

and Feline Oncology

BSAVA

This unique book, written by specialists from the UK, the USA, Canada, Australia and South Africa, bridges the disciplines of clinical pathology, internal medicine and critical care in a single volume. The Manual is divided into three sections: haematology, haemostasis and transfusion medicine. Within each section, review chapters are augmented by contributions on selected

topics of interest to the practitioner. Methods of sample collection and interpretation for routine haematology, haemostatic function and bone marrow analysis are reviewed and new developments, such as flow cytometry for typing leukaemias, outlined. The diagnosis and management of a range of major infectious, immune-mediated and neoplastic diseases of the haematopoietic system are discussed. A chapter on canine babesiosis is timely, given the recent

reports of cases in the UK, and a chapter is also included on the feline pathogen *Haemobartonella felis*. A wealth of excellent colour photographs throughout the book illustrates cell types and abnormalities, plus techniques such as blood transfusion. The range of coverage and the practical information in this Manual will render it of great value in the practice setting. *BSAVA Manual of Canine
and Feline Endocrinology*
BSAVA
This is a foundation level
manual in the popular
series from the BSAVA. It
presents the basic
principles upon which the
practice of modern
veterinary surgery is
based. The principles of

surgery will often dictate
the outcome of a surgical
procedure, more so than
the use of the most up-to-
date technique, and the
surgeon ignores them at
their peril. The BSAVA
Manual of Surgical
Principles presents a solid
grounding in the basic
principles, with practical
examples of why they are
important, creating a
manual that is very
readable and relevant for
the veterinary surgeon in
practice.

Diagnosis on genetic and
inherited diseases
Principles of testing and
interpreting results This
new edition of a must-
have manual, edited by
Elizabeth Villiers, Jelena
Ristic and Laura
Blackwood, features new
case studies and updated
images. There is an
increased focus on

principles, testing and interpreting results as well as sampling, genetic testing and diagnosing genetic and inherited diseases. Fully revised and expanded, this manual contains not just advice for the busy practitioner, but also for the concerned owner and how they can play a part in the treatment of their pet.

BSAVA Manual of Canine and Feline Surgical Principles BSAVA

Companion animals are undergoing previously uncontemplated

treatments and surviving what would once have been rapidly fatal conditions. This NEW Manual is aimed at the whole veterinary team, drawing on all their skills to help patients achieve as full a function and quality of life as possible after surgery, trauma or disease, and to manage chronic conditions effectively for the benefit of animal, owner and the practice team. Part One discusses the principles of rehabilitation, supportive and palliative care. The science behind pain and

its management, clinical nutrition and physical therapies is explored, and clinical applications reviewed with reference to published evidence of efficacy and/or effectiveness. In Part Two, this truly innovative Manual presents a collection of Case Studies across a range of canine and feline patients - from discospondylitis to glaucoma in dogs and from triaditis to leg amputation in cats. The following are considered for every case, with expert assessment from

the contributors to Part One of the book: • Acute and chronic pain management • Fear, stress and conflict concerns • Nutritional requirements • Physiotherapy • Hydrotherapy • Acupuncture • Nursing and supportive care • Owner advice and homecare recommendations.

A Foundation Manual

BSAVA

Confident radiographic interpretation presents a considerable challenge and the BSAVA Manual of

Canine and Feline Radiography and Radiology provides a comprehensive review of the approach to radiological interpretation, the range of variants and the key fundamental principles and their application to common diseases. This Foundation Manual replaces the classic BSAVA Manual of Small Animal Diagnostic Imaging as an introduction for veterinary students, nurses and new graduates. The Manual features high quality radiographic

reproductions demonstrating normal anatomy and key aspects of interpretation, as well as illustrations showing patient positioning and the practical approach that is the hallmark of the BSAVA Manuals.

BSAVA Manual of Canine and Feline Advanced Veterinary Nursing

BSAVA Following the success of previous editions, the BSAVA Manual of Canine and Feline Dentistry and Oral Surgery 4th edition is a timely publication in what is an internationally growing specialist field. It

is an accessible source of core information for general small animal veterinary surgeons, students and nurses/technicians interested in developing their knowledge and practical skills in dentistry and oral surgery. New for this edition are the inclusion of step-by-step operative techniques with detailed full-colour photographs and new illustrations, including the process for taking dental radiographs, and techniques for the management of

periodontal disease, dental and oral trauma, developmental disorders and neoplasia, and closed and open tooth extractions.

BSAVA Manual of Canine and Feline Endoscopy and Endosurgery John Wiley & Sons

This new edition reflects the huge advances in the field of cardiothoracic medicine that have taken place over the past ten years. Illustrated throughout, it features contributions from leaders in the fields of cardiology

and respiratory disorders from the United Kingdom, Europe and the United States. The approach of the Manual has been remodeled to enhance the practitioner's access to information. The Manual begins with a look at the clinical approach to a range of common presenting signs. This is followed by details of diagnostic tests and techniques, including imaging and blood pressure measurement. Therapeutic strategies for these are discussed, and detailed discussions of

specific conditions are presented. Useful appendices include a drug formulary and ECG reference ranges

Canine and Feline

Behavior BSAVA

Celebrating its twentieth anniversary, the BSAVA Small Animal Formulary remains the indispensable guide to drugs used in veterinary practice. This edition has been fully revised and updated by an editorial panel of experts. As with previous editions, a number of new drug monographs have been added, including

cetirizine, cisapride, moxifloxacin and torasemide, whilst those drugs no longer authorized for use in veterinary practice have been removed. The inclusion of examples of immunosuppressive protocols in the Appendix enhances the complementary information provided in the Formulary. [BSAVA Manual of Canine and Feline Shelter Medicine](#) BSAVA Ultrasonography has become an invaluable tool in general veterinary

practice as well as in referral and academic institutes. Edited by Frances Barr and Lorrie Gaschen and with a host of international contributors, the BSAVA Manual of Canine and Feline Ultrasonography provides an overview of the physical properties of this increasingly popular imaging technique and discusses the equipment required as well as the general principles of the ultrasound examination, before moving on to consider body systems in individual chapters.

Includes DVD with more than 100 video clips.

BSAVA Manual of Canine and Feline Behavioural Medicine BSAVA

Building on the success of previous editions, the Editors have sought to marry the best of the old with the new. All chapters have been updated, or rewritten, by international experts to encompass the important advances made over the last several years, while keeping the text practical and user-friendly. The principles of diagnostics and clinical staging and of the main

therapeutic modalities are outlined. Individual tumour types in the body systems of dogs and cats are then described, using a common approach to aid information retrieval on aetiology and pathogenesis, presentation and clinical signs (including staging/grading of tumours), management, and prognosis. A wealth of new photographs has been included to illustrate the clinical, diagnostic and therapeutic aspects of a range of tumours. The growing importance

of ethical considerations and palliative care are also recognized, and exciting developments and treatment possibilities explored.

BSAVA Manual of Canine and Feline Dentistry BSAVA

The BSAVA Manual of Canine and Feline Endoscopy and Endosurgery provides a comprehensive and practical guide for practitioners who wish to practice minimally invasive techniques. Routine procedures are described in detail and

more advanced techniques suitable for advanced practitioners are also included. • All the chapters have been thoroughly revised and updated • Chapters on oesophagoscopy, interventional endoscopy and future developments are new to this edition • More detailed information on minimally invasive techniques in cats included throughout • The

chapter on laparoscopy has been significantly expanded and covers techniques ranging from liver biopsy and ovariectomy to cholecystectomy and adrenalectomy Exclusive video content New to this edition are a series of videos that accompany the chapters. These videos are available from the BSAVA Library.

BSAVA Manual of Canine and Feline Head, Neck and Thoracic Surgery

BSAVA This best selling manual has been fully revised and updated with the latest information. New chapters include neurological genetic disease testing and counselling; adjunctive therapies; and nutrition. This edition will also feature a DVD-ROM with video clips.
