This is an extensive and user-friendly Chinese to English dictionary. The Tuttle Chinese-English Dictionary provides clear and accurate definitions in idiomatic English for the 18,000 most common Chinese vocabulary items (characters and compounds), including all words required for the official HSK Chinese Language Proficiency Examination used by the Chinese government as well as corporations and universities worldwide. This Chinese dictionary is designed specifically for English speakers. All entries are listed alphabetically in their

romanized form using the standard Hanyu Pinyin romanization system. To ensure that the dictionary is up-to-date, recently coined terms have been included reflecting the dramatic changes taking place in Chinese society, business and education. Entries contain idiomatic expressions and detailed notes on Chinese culture, grammar and usage that are extremely useful for foreigners—a unique feature found in no other Chinese dictionary. Over 8,000 example Chinese sentences are provided showing how Chinese words are used in real-life situations. A concise guide to Chinese pronunciation, tones and grammar and lists of common character components, measure words are given at the front of the dictionary, while Chinese personal and place names are given at the back. Indexes list characters by strokes and also by radicals to enable the reader to look up characters when the pronunciation is not known. Key features of this Chinese dictionary include: Clear and concise definitions for 18,000 common vocabulary items. The only Chinese dictionary designed specifically for English

speakers. All entries listed alphabetically in romanized Hanyu Pinyin form. Includes all words for the HSK Chinese language Proficiency Examination.

This book is a much expanded and wholly rewritten treatment of the subject of the author's first book, *Warrior Government in Early Medieval Japan*, published in 1974. In this new version, the "warrior" and "medieval" character of Japan's first shogunate is

significantly de-emphasized, thus requiring not only a new title, but also a new book. The author's new view of the final decades of twelfth-century Japan is one of a less revolutionary set of experiences and a smaller achievement overall than previously thought. The pivotal figure, Minamoto Yoritomo, retains his dominant role in establishing the "dual polity" of Court and Bakufu, but his successes are now explained in terms of more limited objectives. A new regime was fit into an environment that was still basically healthy and vibrant, leading not to the substitution of one government for another, but rather to the emergence of a new authority that would have to interact with the old. The book aims to present a dual perspective on the period by juxtaposing what we know against our best possible estimate of what Yoritomo himself knew. It is deeply concerned with the multiple balancing acts introduced by this ever nimble experimenter in governing, who was forever seeking to determine, and then to promote, what would

work while curtailing or eliminating what would not. The author seeks to recreate step-by-step the movement from one historical juncture to another, whether this means adapting already available information, building anew, or working with combinations of materials. Throughout, the book addresses new topics and offers many new interpretations on subjects as wide-ranging as the 1189 military campaign in the north and the phenomenon of delegated authority.

*Chinese-English/English-Chinese* Tuttle Publishing. Grammaticalization and lexicalization have been two major issues in the study of diachronic change in the past few decades. Drawing evidence from Western languages, researchers have uncovered a number of characteristics of the process of grammaticalization and lexicalization, as well as the relationship between the two. However, the question remains whether or not those characteristics are applicable to genetically unrelated and typologically different languages, such as Chinese. The contributors of this volume attempt to answer just this question. Based on Chinese historical data from the past three thousand years, five articles in the volume investigate the development of a certain grammatical category: the definite article (M. Fang), modal verbs of volition (A. Peyraube and M. Li), the classifier class (J.Z. Xing), the repeater class (C. Zhang), and the process of lexicalization (X. Dong), while the remaining four articles are case studies of unique grammatical words which have all undergone a complicated

process of grammaticalization and some involved lexicalization: the sentence particle *ye* (Q. Chen), the versatile directional verb *lái* (C. Liu), the degree adverb *hén* (M. Liu and C. Chang), and the giving verb *gei* (F. Tsao). All these studies have identified tendencies of diachronic change in Chinese and some of them have also revealed certain typological characteristics that Chinese has compared to other languages.

Tuttle Concise Chinese Dictionary Tuttle Publishing. This book reopens and restructures the grand debate on the nature of economic development in China prior to the Communist revolution. It rejects the debate's old contours in which quantitative data were used to argue that the trajectory of Chinese development was either "positive" or "negative." Instead, the author combines quantitative

analysis with a detailed study of local politics, culture, and gender to explain the shaping of the modern Chinese economy. Focusing on silk production in Wuxi county in the Yangzi Delta, the author argues that local elites used social dominance to build a silk industry continuum—“one industry”—fusing modern factory production with older patterns of peasant-family farming. The resulting social configuration was “two Chinas”—one populated by wealthy urban elites transformed into a new, silk-industry bourgeoisie, and the other by peasant families whose women became the workforce for cocoon production. The author describes the roles of merchant guilds and other elite organizations established to protect the silk industry from outside competition and excessive taxation; the methods and styles of elite networking and investment in building modern silk filatures; and the roles of women—elite women in sericulture reform and peasant women in silkworm raising. She also reveals the cooperation between silk-industry elites and Nationalist government officials in the 1920’s and

1930’s, which resulted in an industry that was virtually state-directed and designed to pass downward to the peasants the costs of building more competitive silk filatures. This discovery challenges the prevailing tendency to think in terms of radical ruptures between Nationalist and Communist rule. Mandarin Chinese English visual bilingual dictionary Brill Academic Pub Is the bilingual dictionary really the translator’s best friend? Or is it the case that all translators hate all dictionaries? The truth probably lies half-way. It is difficult to verify anyway, as the literature on the subject(s) is limited, not helped by the fact that Lexicography and Translation have stood apart for decades despite their commonality of purpose. Here is a volume, based on the proceedings of a successful conference at Hong Kong, that may at last provide some answers.
