Fantasy author Patricia A. McKillip, the 21st century's response to Hans Christian Andersen, has mastered the art of writing fairy tales -- as evidenced by previous works like *The Tower at Stony Wood*, *Ombria in Shadow*, and *In the Forests of Serre*. *Alphabet of Thorn* is yet another timeless fable suitable for children and adults alike. In the kingdom of Raine, a vast realm at the edge of the world, an orphaned baby girl is found by a palace librarian and raised to become a translator. Years later, the girl -- named Nepenthe -- comes in contact with a mysterious book written in a language of thorns that no one, not even the wizards

at Raine's famous Floating School for mages, can decipher. The book calls out to Nepenthe's very soul, and she is soon privately translating its contents. As she works tirelessly transcribing the book -- which turns out to be about the historical figures of Axis, the Emperor of Night, and Kane, his masked sorcerer -- the kingdom of Raine is teetering on the brink of chaos. The newly crowned queen, a mousy 14-year old girl named Tessera who wants nothing to do with matters of state, hides in the woods as regents plot revolution. The queen's destiny, however, is intertwined with Nepenthe's ability to unravel the mystery of the thorns. *The Further Adventures of Hank the Cowdog* Harper Collins

Lief, Barda, and Jasmine have finally retrieved all the gems of the Belt of Deltora and now, in their final step towards overthrowing the Shadow Lord, they must find the true heir to the kingdom's throne.

Hello, Mrs. Piggie-Wiggle Barrie, ON : Wintertickle Press

Cultural Politics in Harry Potter: Life, Death and the Politics of Fear is the first book-length analysis of topics, such as death, fear and biopolitics in J.K. Rowling's work from controversial and interdisciplinary perspectives. This collection brings together recent theoretical and applied cultural studies and focuses on three key areas of inquiry: (1) wizarding biopolitics and intersected discourses; (2) anxiety,

death, resilience and trauma; and (3) the politics of fear and postmodern transformations. As such, this book: provides a comprehensive overview of national and gender discourses, as well as the transiting bodies in-between, in relation to the Harry Potter books series and related multimedia franchise; situates the transformative power of death within the fandom, transmedia and film depictions of the Potterverse and critically deconstructs the processes of subjectivation and legitimation of death and fear; examines the strategies and mechanisms through which cultural and political processes are managed, as well as reminding us how fiction and reality intersect at junctions, such as terrorism, homonationalism, materialism, capitalism, posthumanism and technology. Exploring precisely what is cultural about wizarding politics, and what is political about culture, this book is key reading for students of contemporary literature, media and culture, as well as anyone with an interest in the fictional universe and wizarding world of Harry Potter.

Radically reimagine our ways of being, learning, and doing Education can be transformed if we eradicate our fixation on big data like standardized test scores as the supreme measure of equity and learning. Instead of the focus being on "fixing" and "filling" academic gaps, we must envision and rebuild the system from the student up—with classrooms, schools and systems built around students' brilliance, cultural wealth, and intellectual potential. Street data reminds us that what is measurable is not the same as what is valuable and that data can be humanizing, liberatory and healing. By breaking down street data fundamentals: what it is, how to gather it, and how it can complement other forms of data to guide a school or district's equity journey, Safir and Dugan offer an actionable framework for school transformation. Written for educators and policymakers, this book · Offers fresh ideas and innovative tools to apply immediately · Provides an asset-based model to help educators look for what's right in our students and communities instead of seeking what's wrong · Explores a different application of data, from its capacity to help us diagnose

root causes of inequity, to its potential to transform learning, and its power to reshape adult culture Now is the time to take an antiracist stance, interrogate our assumptions about knowledge, measurement, and what really matters when it comes to educating young people.
