A brief guide to the real science of interstellar travel With known exoplanets now numbering in the thousands and initiatives like 100 Year Starship and Breakthrough Starshot advancing the idea of interstellar travel, the age-old dream of venturing forth into the

cosmos and perhaps even colonizing distant worlds may one day become a reality. A Traveler's Guide to the Stars reveals how. Les Johnson takes you on a thrilling tour of the physics and technologies that may enable us to reach the stars. He discusses the latest exoplanet discoveries, promising interstellar missions on the not-so-distant horizon, and exciting new developments in space propulsion, power, robotics, communications, and more. But interstellar

travel will not be easy, and it is not for the faint of heart. Johnson describes the harsh and forbidding expanse of space that awaits us, and he addresses the daunting challenges—both human and technological—that we will need to overcome in order to realize tomorrow's possibilities. A Traveler's Guide to the Stars is your passport to the next great frontier of human discovery, providing a rare inside look at the remarkable breakthroughs in science

and technology that will help tomorrow's space travelers chart a course for the stars.

Sustainable development is still seen by authorities as an abstract concept. Local Environmental Auditing will help put it into practice. The book provides a comprehensive

guide to monitoring the state of the local environment and establishing the impacts of local actions on global issues, and shows how current local authority policy and practice can be adapted to recognize environmental priorities. The authors provide both a guide to and an assessment of the subject: they link the processes with the issues, with specific information on carrying out the audit (including checklists, case studies and standards) and a detailed discussion

of the issues and choices which local authorities may face. Clearly structured and accessible, this will be an essential handbook, both for local government departments and other local organizations, and students in a wide range of subjects, including environmental science and health, town planning, urban and rural studies, social science and politics.
