This book answers a number of fundamental questions about listening in coaching and mentoring. What difference does being heard make to the speaker? How does it have that effect? What are the necessary components of good listening? How do you evaluate your practice as a listener and how do you improve? The process of writing this book led the author to look closely at his own practice, test, experiment, and push his listening to a higher level. He invites the reader to do the same. This book identifies what it takes to listen well – the skills, mind-set, presence, self-awareness and self-management – and why it can be hard. It demonstrates how four modes of listening – attention, inquiry, observation and use of self – all contribute to the listener's understanding and to the speaker's awareness. It argues that we all have a 'learning edge' as listeners and provides a framework that helps each of us find it. The book is intended as a companion for anyone who commits to becoming a good listener. It shows how to develop expertise in the four modes of listening. It offers examples and principles to guide practice, questions for reflection, and a series of 'workouts' to help the listener develop their ability to listen. It encourages by showing how good listening is simple – you turn up, pay attention, and listen with all you have, and it challenges by identifying the work it takes to do that.

Presence-Based Coaching offers coaches a hands-on resource for developing the capacities and skills needed to be reliably present in all situations, and shows how to let go of habitual—and often ineffective—ways of responding. As author and leadership expert Doug Silsbee explains, once a coach has mastered the inner moves of directing their own attention, they can work to develop the same capability in their clients. The ability of a coach to facilitate lasting, sustainable development in leaders rests on the presence a coach offers to the coach-client relationship.

Publisher description

[Presence-Based Coaching](#) John Wiley & Sons

Die von der Autorin vorgenommene Analyse des Coaching-Phänomens und die von ihr hieraus abgeleiteten Gestaltungsempfehlungen bezüglich des Coachings geben an dieser Stelle Gelegenheit zu einigen grundsätzlichen Ausführungen, weil sowohl die tragenden Begriffe als auch die Vorgehensweise im Rahmen der hier angewendeten Theorie aus ihrem unmittelbaren Verwendungszusammenhang heraus generell nicht einfach zu erfassen sind und die Forschungsmethode in der herkömmlichen empirisch-sozialwissenschaftlichen Forschung bisher auch noch weitgehend unbekannt ist. Die in dieser Arbeit zur Analyse des Coachings angewendete Nicht-kl- sisch, synergetische Theorie der Information basiert auf wesentlichen Aussagen der Quantentheorie (bzw. deren abstrakter Rekonstruktion) der Synergetik und der Informationstheorie. Bereits die Erwähnung der Quantentheorie im Zusammenhang mit einer sozialwissenschaftlichen Untersuchung des Coachings mag zunächst befremdlich wirken. Handelt es sich nicht um denjenigen Bereich der Physik, der sich mit den elementaren Bausteinen der Natur, der Materie beschäftigt? Mit der Anwendung quantentheoretischer Überlegungen auch auf geistige Phänomene wird hier ein neuer Weg in der sozialwissenschaftlichen Forschung beschritten. Das ‚Quantum der Wirkung‘ ist in der Tat eine mathematisch sehr kleine Einheit. Ihre Entdeckung durch Max Planck hat in der nachfolgenden Forschung durch Einstein, Bohr, Heisenberg und nicht zuletzt C. F. v. We- säcker zu einer Abkehr von der Vorstellung geführt, dass die Welt aus elementaren Bausteinen bestehe und durch die Rückführung der wahrgenommenen Phänomene auf elementare Daten und ihre Konstruktionsgesetze erklärt werden könne. Weder die Stabilität der Atome noch die Selbststabilisierung der in der kosmischen Entwicklung entstandenen Gestalten lassen sich so erklären.
