Speaking and listening are key elements of the primary English National Curriculum; they are also fundamental to children's language development and learning. The need for teachers to develop children's talk in its own right and also to use talk as a means of learning is central to effective primary practice, yet it is an area in which teachers often have little confidence. The contributors offer creative and practical advice on teaching speaking and listening from the early years through Key Stages 1 and 2, underpinned by theory into the approach. --from publisher description.

In recent years far more attention has been paid to victims of crime both in terms of awareness of the effect of crime upon their lives, and in changes that have been made to the criminal justice system to improve their rights and treatment. This process seems set to continue, with legislative plans announced to rebalance the criminal justice system in favour of the victim. This latest book in the Cambridge Criminal Justice Series brings together leading authorities in the field to review the role of the victim in the criminal justice system in the context of these developments.

Handbuch Polizeimanagement Routledge

The Criminal Law of Sierra Leone documents the substantive criminal law as it has been applied, expounded, and developed since the introduction of English Common Law, using relevant case-law authorities and illustrations. The author takes a broad approach to the study of the country's criminal law, using cases to highlight and elucidate the principles and rules developed by the courts and also to demonstrate the real world impact of judicial decisions. This study provides an analytical understanding of the country's criminal law principles and doctrines, and the opportunity to critique court decisions from their own perspectives of fairness and justice. The author begins by introducing the courts that exercise criminal jurisdiction in Sierra Leone, an analysis of the specific features of criminal law, and an exposition of its underlying principles, theories, and doctrines as a social control mechanism. He then discusses the basic elements of crime and describes how crimes are classified. Finally, he presents the defenses to criminal liability available under the law and articulates the case for major reforms of the country's criminal law.

The Psychology of Crime, Policing and Courts Taylor & Francis

The Criminal Justice Act 2003 re-wrote the hearsay evidence rule for the purpose of criminal proceedings, enacting the recommendations of the Law Commission together with some proposals from the Auld Review. In 2008, Professor Spencer wrote a book explaining the new law, intended for practitioners as well as academics. Following the style of his earlier book about the new law on bad character evidence, the core of the hearsay book was a section-by-section commentary on the relevant provisions of the Act, discussing the case law that had interpreted them. Since the appearance of the first edition, the new law on hearsay evidence has been the subject of a spectacular exchange between the UK Supreme Court and the European Court of Human Rights, the effects of which the Court of Appeal has interpreted in several leading cases. In this new edition, the commentary is revised to take account of these developments. As in the first edition, the commentary is preceded by chapters on the history of the hearsay rule, and the requirements of Article 6(3)(d) of the European Convention on Human Rights. It is followed by an appendix containing the text of the statutory provisions and a selection of the leading cases.
