## WEST DOMINGUEZ

[Ancient Jewish Art and Archaeology in the Diaspora](#) Cengage Learning  
 A complete introduction to the rich cultural legacy of Rome through the study of Roman art ... It includes a discussion of the relevance of Rome to the modern world, a short historical overview, and descriptions of forty-five works of art in the Roman collection organized in three thematic sections: Power and Authority in Roman Portraiture; Myth, Religion, and the Afterlife; and Daily Life in Ancient Rome. This resource also provides lesson plans and classroom activities."--Publisher website.  
[Rome in the Eighth Century](#) Cambridge University Press  
 A collection of links to Web resources on the art and archaeology of Italy and the Roman provinces, ca. 1000 BC-AD 700.  
*A New Profile of the City, 400 - 1420* Cambridge University Press  
 Publisher Description

## **A Companion to the Archaeology of the Roman Republic**

University of Michigan Press  
 The study of Roman sculpture has been an essential part of the disciplines of Art History and Classics since the eighteenth century. Famous works like the Laocoön, the Arch of Titus, and the colossal portrait of Constantine are familiar to millions. Again and again, scholars have returned to sculpture to answer questions about Roman art, society, and history. Indeed, the field of Roman sculptural studies encompasses not only the full chronological range of the Roman world but also its expansive geography, and a variety of artistic media, formats, sizes, and functions. Exciting new theories, methods, and approaches have transformed the specialized literature on the subject in recent decades. Rather than creating another chronological catalogue of representative examples from various periods, genres, and settings, *The Oxford Handbook of Roman Sculpture* synthesizes current best practices for studying this central medium of Roman art, situating it within the larger fields of Art History, Classical

Archaeology, and Roman Studies. This comprehensive volume fills the gap between introductory textbooks and highly focused professional literature. The Oxford Handbook of Roman Sculpture conveniently presents new technical, scientific, literary, and theoretical approaches to the study of Roman sculpture in one reference volume while simultaneously complementing textbooks and other publications that present well-known works in the corpus. The contributors to this volume address metropolitan and provincial material from the early republican period through late antiquity in an engaging and fresh style. Authoritative, innovative, and up-to-date, The Oxford Handbook of Roman Sculpture will remain an invaluable resource for years to come.

**Art and Archaeology of Ancient Rome** Walter de Gruyter GmbH & Co KG

Integrating the written sources with Rome's surviving remains and, most importantly, with the results of the past half-century's worth of medieval archaeology in the city, *The Making of Medieval Rome* is the first in-depth profile of Rome's transformation over a millennium to appear in any language in over forty years. Though the main focus rests on Rome's urban trajectory in topographical, architectural, and archaeological terms, Hendrik folds aspects of ecclesiastical, political, social, military, economic, and intellectual history into the narrative in order to illustrate how and why the cityscape evolved as it did during the thousand years between the end of the Roman Empire and the start of the Renaissance. A wide-ranging synthesis of decades' worth of specialized research and remarkable archaeological discoveries, this book is essential reading for anyone interested in how and why the ancient imperial capital transformed into the spiritual heart of Western Christendom.

**Toilets, Sewers, and Water Systems** Routledge

The Romans developed sophisticated methods for managing hygiene, including aqueducts for moving water from one place to another, sewers for removing used water from baths and runoff from walkways and roads, and public and private latrines.

Through the archeological record, graffiti, sanitation-related paintings, and literature, Ann Olga Koloski-Ostrow explores this little-known world of bathrooms and sewers, offering unique insights into Roman sanitation, engineering, urban planning and development, hygiene, and public health. Focusing on the cities of Pompeii, Herculaneum, Ostia, and Rome, Koloski-Ostrow's work challenges common perceptions of Romans' social customs, beliefs about health, tolerance for filth in their cities, and attitudes toward privacy. In charting the complex history of sanitary customs from the late republic to the early empire, Koloski-Ostrow reveals the origins of waste removal technologies and their implications for urban health, past and present.

*The Triumph and Trade of Egyptian Objects in Rome* John Wiley & Sons

First edition published 1998 by Oxford University Press with the title: *Imperial Rome and Christian triumph: the art of the Roman Empire AD 100-450*.

**Posthuman Perspectives in Roman Archaeology** A&C Black

Are copies of Greek and Roman masterpieces as important as the originals they imitate?

*Roman Painting* Cambridge University Press

This richly illustrated, four-colour textbook introduces the art and archaeology of ancient Greece, from the Bronze Age through to the Roman conquest. Suitable for students with no prior knowledge of ancient art, this textbook reviews the main objects and monuments of the ancient Greek world, emphasizing the context and function of these artefacts in their particular place and time. Students are led to a rich understanding of how objects were meant to be perceived, what 'messages' they transmitted and how the surrounding environment shaped their meaning. The

book contains nearly five hundred illustrations (with over four hundred in colour), including specially commissioned photographs, maps, floorplans and reconstructions. Judith M. Barringer examines a variety of media, including marble and bronze sculpture, public and domestic architecture, painted vases, coins, mosaics, terracotta figurines, reliefs, jewellery and wall paintings. Numerous text boxes, chapter summaries and timelines, complemented by a detailed glossary, support student learning.

**Romulus to Constantine** John Wiley & Sons

This landmark book shows how much Victorian and Edwardian Roman archaeologists were influenced by their own experience of empire in their interpretation of archaeological evidence. This distortion of the facts became accepted truth and its legacy is still felt in archaeology today. While tracing the development of these ideas, the author also gives the reader a thorough grounding in the history of Roman archaeology itself.

**A History in Art** Oxbow Books

9 chapters by different authors, all in English, on Roman sarcophagus workshops, the reworking of marble statuary at the Sculptor's Workshop in Aphrodisias, Marble sculpture production in the Roman Near East, Workshops for Mythological marble sculptures in late antiquity, Workshops and artists in Roman Britain, Mosaic workshops in Greece and Turkey in late antiquity, Mosaic production in Britain in the 4th century AD, and Working procedures in laying mosaics at Mount Nebo in Jordan.

**Rome and Environs** Routledge

"This book covers the 1300 years from the Villanovan and Etruscan forerunners of the Romans to the introduction of Christianity under the Emperor Constantine the Great. The text examines the Roman artistic output chronologically, showing how greatly it was influenced by the taste and patronage of the various emperors. Each chapter focuses on one historical period or dynasty, and explores the history, myth and literature behind the art."--BOOK COVER.

*The Ancient Art of Emulation* Oxford University Press, USA

This publication provides fascinating new information about the origin, symbolism and significance of ancient Jewish synagogal and funerary art and archeology in the Diaspora, during the Hellenistic, Roman and Byzantine periods.

**ROMARCH** Routledge

Roman Art and Archaeology

**Roman Art** Edinburgh University Press

A Companion to Roman Art encompasses various artistic genres, ancient contexts, and modern approaches for a comprehensive guide to Roman art. Offers comprehensive and original essays on the study of Roman art Contributions from distinguished scholars with unrivalled expertise covering a broad range of international approaches Focuses on the socio-historical aspects of Roman art, covering several topics that have not been presented in any detail in English Includes both close readings of individual art works and general discussions Provides an overview of main aspects of the subject and an introduction to current debates in the field

**Rome** Oxford Handbooks

A History of Roman Art provides a wide-ranging survey of the subject from the founding of Rome to the rule of Rome's first Christian emperor, Constantine. Incorporating the most up-to-date information available on the topic, this new textbook explores the creation, use, and meaning of art in the Roman world. Extensively illustrated with 375 color photographs and line drawings Broadly defines Roman art to include the various cultures that contributed to the Roman system Focuses throughout on the overarching themes of Rome's cultural inclusiveness and art's important role in promoting Roman values

Discusses a wide range of Roman painting, mosaic, sculpture, and decorative arts, as well as architecture and associated sculptures within the cultural contexts they were created and developed. Offers helpful and instructive pedagogical features for students, such as timelines; key terms defined in margins; a glossary; sidebars with key lessons and explanatory material on artistic technique, stories, and ancient authors; textboxes on art and literature, art from the provinces, and important scholarly perspectives; and primary sources in translation. A book companion website is available at [www.wiley.com/go/romanart](http://www.wiley.com/go/romanart) with the following resources: PowerPoint slides, glossary, and timeline. Steven Tuck is the 2014 recipient of the American Archaeological Association's Excellence in Undergraduate Teaching Award.

**Greek and Roman Art and Archaeology and Their Influence**  
Oxford University Press

Explores the problems for studying art and religion in Eurasia arising from ancestral, colonial and post-colonial biases in historiography.

**Roman Officers and English Gentlemen** Cambridge University Press

A history of Rome in the critical eighth century CE focusing on the evidence of material culture and archaeology.

**Connecting Visual Cultures in the Provinces of Ancient Rome**

This new survey makes sense of Roman art by placing works in their full historical context--showing students not only how but also why art was used in Roman society and politics (such as wealthy Romans sponsoring public projects to promote themselves). The book breaks new ground by devoting chapters to art from the provinces, rather than focusing solely on Rome itself. Mark Fullerton provides the most in-depth look at Roman art from across the empire, connecting Roman art to the Mediterranean and the wider world.

**Art and Archaeology of Ancient Rome**  
Introduction  
Classical archaeology was long equated to ancient art history. Today these fields find themselves at a major crossroads. The influence on them--from the discipline of anthropology--has increased substantially in the past 15 years, adding to the ways in which scholars can study the Roman past. The classical archaeologist of the 21st century is likely to be versed in Greek and Latin, computer technology, ancient history, great monuments, various hard sciences such as physics or even astronomy, GPS, GIS, surveying, mapping, digitizing, artistic rendering, numismatics, geo-science, astronomy, environmental studies, material culture analysis and/or a host of other disciplines and sub-disciplines. Universities are seeking specialists whose talents embrace not one but several different fields of research. It is not necessary for each scholar to know everything about each discipline being used within the fields of art history, classical archaeology and anthropology, but these days a basic knowledge of all relevant disciplines is becoming indispensable. This book will layout the basic information and steps necessary to take the beginning archaeologist's search for knowledge of the past and lead them to adventures of the future. here have been numerous textbooks about the art history and monuments of ancient Rome. With this new work, the authors have attempted to create something slightly different. Students of the subject will still be able to gain the essential basic knowledge of the most important works of art and architecture that have been the focus of university art history courses for more than a century and remain the essential starting point for gaining a window into Roman Antiquity. In addition to this, however, anthropology, classical studies, social history and computer graphics have been used throughout this text in order to help the beginning student understand the daily life of the ancient Romans. The authors

have sought to emphasize not only the greatest works of ancient art but have also included utilitarian objects which were more typical of the Roman life experience. It is hoped that this holistic approach can afford an appreciation not only of that estimated one-sixth that formed the Roman elite but also the remaining five-sixths who formed the majority of the Roman people. New technologies are being developed each year allowing increased possibilities for understanding the past. These range from innovations in museology as exemplified by the ruin within a museum approach of Rome's Capitoline Museums to the virtualreality 3D walk-throughs that allow the general public to experience the past first-hand by passing through museums or even reconstructed ancient buildings and sites. If a picture is worth a thousand words, the 21st century is showing that there is a growing desire to offer detailed and intimate snapshots that allow the past to resonate and reveal itself in ways not thought possible a generation ago. In this textbook the authors present more than 400 images, including over 100 new plans and specially commissioned reconstructions.

**Art and Archaeology of Ancient Rome Vol 2**  
Art and Archaeology of Ancient Rome  
Classical archaeology was long equated to ancient art history. Today these fields find themselves at a major crossroads. The influence on them--from the discipline of anthropology--has increased substantially in the past 15 years, adding to the ways in which scholars can study the Roman past. The classical archaeologist of the 21st century is likely to be versed in Greek and Latin, computer technology, ancient history, great monuments, various hard sciences such as physics or even astronomy, GPS, GIS, surveying, mapping, digitizing, artistic rendering, numismatics, geo-science, astronomy, environmental studies, material culture analysis and/or a host of other disciplines and sub-disciplines. It is not necessary for each scholar to know everything about each discipline being used within the fields of art history, classical archaeology and anthropology, but these days a basic knowledge of all relevant disciplines is becoming indispensable. This book will layout the basic information and steps necessary to take the beginning archaeologist's search for knowledge of the past and lead them to adventures of the future.

**Art and Archaeology of the Roman World**  
Mark D. Fullerton blends the art of the Roman period with its history of political intrigue, military and religious ideologies, and intercultural interaction. The book not only explores the art of Rome itself but also that of the Roman provinces, including Syria, Egypt, Algeria, Greece and the British Isles, showing how Roman art drew from and influenced the wider ancient world. Each of the book's four parts opens with a timeline and historical overview, allowing the reader to better understand how the art relates to the political and social lives of the people of ancient Rome. Individual chapters begin with a map of Rome, illustrating how the city changed over centuries of rebuilding and reimagining. With an introduction, 'What Is Roman about Roman Art?', and 'Materials and Techniques' features on the artistic innovations introduced by the Romans, such as concrete, linear and atmospheric perspective, and mosaic, the book explores how Roman influences still affect the art and architectural world today.

**Rome**  
Art and Archaeology  
Well illustrated with nearly 300 line drawings, maps and photographs, **Ancient Cities** surveys the cities of the ancient Near East, Egypt, and the Greek and Roman worlds from an archaeological perspective, and in their cultural and historical contexts. Covering a huge area geographically and chronologically, it brings to life the physical world of ancient city dwellers by concentrating on evidence recovered by archaeological excavations from the Mediterranean basin and

south-west Asia Examining both pre-Classical and Classical periods, this is an excellent introductory textbook for students of classical studies and archaeology alike.

*The Archaeology of Sanitation in Roman Italy* Thames & Hudson  
 Classical archaeology was long equated to ancient art history. Today these fields find themselves at a major crossroads. The influence on them--from the discipline of anthropology--has increased substantially in the past 15 years, adding to the ways in which scholars can study the Roman past. The classical archaeologist of the 21st century is likely to be versed in Greek and Latin, computer technology, ancient history, great monuments, various hard sciences such as physics or even
