Shard is a gryphon in danger. He and other young males of the Silver Isles are old enough to fly, hunt, and fight--old enough to be threats to their ruler, the red gryphon king. In the midst of the dangerous initiation hunt, Shard takes the unexpected advice of a strange she-wolf who seeks him out, and hints that Shard's past isn't all that it seems. To learn his past, Shard must abandon the future he wants and make allies of those the gryphons call enemies. When the gryphon king declares open war on the wolves, it throws Shard's past and uncertain future into the turmoil between. Now with battle lines drawn, Shard must decide whether to fight beside his king . . .or against him.

A solid introduction to stable isotopes that can also be used as an instructive review for more experienced researchers and professionals. The book approaches the use of isotopes from the perspective of ecological and biological research, but its concepts can be applied within other disciplines. A novel, step-by-step spreadsheet modeling approach is also presented for circulating tracers in any ecological system, including any favorite system an ecologist might dream up while sitting at a computer. The author's humorous and lighthearted style painlessly imparts the principles of isotope ecology. The online material contains color illustrations, spreadsheet models, technical appendices, and problems and answers.

Language, Society and Power is the essential introductory text for students studying language in a variety of social contexts. This book examines the ways in which language functions, how it influences thought and how it varies according to age, ethnicity, class and gender. It seeks to answer such questions as: How can a language reflect the status of children and older people? Do men and women talk differently? How can our use of language mark our ethnic identity? It also looks at language use in politics and the media and investigates how language affects and constructs our identities, exploring notions of correctness and attitudes towards language use. This third edition of this bestselling book has been completely revised to include recent developments in theory and research and offers the following features: a range of new and engaging international examples drawn from everyday life: beauty advertisements, conversation transcripts, newspaper headlines reporting on asylum seekers, language themed cartoons, and excerpts from the television programme South Park and satirical news website The Onion new activities designed to give students a real understanding of the topic a new chapter covering 'Student Projects' – giving readers suggestions on how to further explore the topics covered in the book updated and expanded further reading sections for each chapter and a glossary. While it can be used as a stand-alone text, this edition of Language, Society and Power has also been fully cross-referenced with the new companion title: The Language, Society and Power Reader. Together these books provide the complete resource for students of English language and linguistics, media, communication, cultural studies, sociology and psychology.

Global warming continues to gain importance on the international agenda and calls for action are heightening. Yet, there is still controversy over what must be done and what is needed to proceed. Policy Implications of Greenhouse Warming describes the information necessary to make decisions about global warming resulting from atmospheric releases of radiatively active trace gases. The conclusions and recommendations include some unexpected results. The distinguished authoring committee provides specific advice for U.S. policy and addresses the need for an international response to potential greenhouse warming. It offers a realistic view of gaps in the scientific understanding of greenhouse warming and how much effort and expense might be required to produce definitive answers. The book presents methods for assessing options to reduce emissions of greenhouse gases into the atmosphere, offset emissions, and assist humans and unmanaged systems of plants and animals to adjust to the consequences of global warming.

 “Might be just the book to bring out your inner astronomer . . . over 250 pages of breathtaking images from the past 50 years of NASA’s space exploration.” —Parade Preface by Bill Nye This magnificent volume offers a rich visual tour of the planets in our solar system. More than two-hundred breathtaking photographs from the archives of NASA are paired with extended captions detailing the science behind some of our cosmic neighborhood’s most extraordinary phenomena. Images of newly discovered areas of Jupiter, fiery volcanoes on Venus, and many more reveal the astronomical marvels of space in engrossing detail. Anyone with an interest in science, astronomy, and the mysteries of the universe will delight in this awe-inspiring guide to the wonders of the solar system. “As you turn through the pages, you’re hit with true moments of awe, photos that remind you the power of nature extends beyond our own planet.” —Houston Chronicle “Breathtaking pictures show the otherworldly magic of the solar system . . . The images are at once humbling and uplifting: Here in the black void of space is Saturn’s frozen moon, Mimas, white and pitted like a galactic golf ball; here is the tiny golden orb called Io, casting a shadow in a perfect inky circle on the marbled surface of Jupiter; here is the great sun, flames spurting from its surface like plumes.” —The Wall Street Journal “[A] gorgeous photographic tour of space . . . The collection is a remarkable reminder of how much has been learned about the planets over the past few decades, solving many mysteries yet introducing many more.” —Publishers Weekly

Charles Munger is Warren Buffett decade's long business partner, and his investment filter, jokingly called by Mr. Buffett - the abominable no man. The early pages cover Munger's family history, his framework for investing [wait for the fat pitches, and assess each opportunity using rational, rigorous frameworks drawn from multiple disciplines (and not finance theory!)], and even some warm testaments from family, friends and colleagues. The next section, assembled by leading investor Whitney Tilson, is well edited and benefits from Tilson's massaging of quotations made over time into logical sub-headings. The bulk of the text though is, as the subtitle suggests, the wit and wisdom of Mr. Munger as conveyed through various speeches in the last couple decade or so before 2006.

A Practical Approach HarperCollins

Everybody likes Jesus. Don't they? We overlook that Jesus was Judgmental—preaching hellfire far more than the apostle Paul Uncompromising—telling people to hate their families Chauvinistic—excluding women from leadership Racist—insulting people from other ethnic groups Anti-environmental—cursing a fig tree and affirming animal sacrifice Angry—overturning tables and chasing moneychangers in the temple He demanded moral perfection, told people to cut off body parts, made prophecies that haven't come true, and defied religious and political authorities. While we tend to ignore this troubling behavior, the people around Jesus didn't. Some believed him so dangerous that they found a way to have him killed. The Jesus everybody likes, says Mark Strauss, is not the Jesus found in the Gospels. He's a figure we've created in our own minds. Strauss believes that when we unpack the puzzling paradoxes of the man from Galilee, we find greater insight into his countercultural message and mission than we could ever have imagined.
