International Business Law kcsmk This text provides a practical approach to the legal and commercial infrastructure which serves trade and investment in Hong Kong. It provides a panoptic view of what the laws of Hong Kong and its legal practitioners have to offer those who are there to do business. It gives special emphasis to problems and pitfalls which clients may encounter

when trading with or investing in Hong Kong. It also specifically addresses practical problem areas relating to inbound investment, and how such investment can be most suitably structured. Hong Kong's potential as a centre for regional trade, not least with mainland China, is also considered.

Asian Company Law for Business

Hong Kong University Press

This is a casebook on Chinese business law. As there are no legal reports in China, the cases have been collected through the author's personal contacts with the Supreme Court of China and China International Economic and Trade Arbitration Commission. Therefore these cases are unique in that they have been translated into English from Chinese and will be an important source for ascertaining this area of Chinese law.

Hong Kong Company Law Butterworths

This book is the first to examine intermediaries in a holistic and systematic manner. The classical model of face-to-face contracting between two individuals is no longer dominant. Instead, deals frequently involve a number of parties, often acting through intermediaries. As a result, it is important to understand the role and power of intermediaries. Intermediaries tend to be considered within discrete silos of the law. But by focussing upon a particular, narrow area of law, lessons are not learned from analogous situations. This book takes a broader approach, and looks across the traditional boundaries of private law in order to gain a proper assessment of the role played by intermediaries. A wide range of jurisdictions and topical issues are discussed in order to illuminate the role intermediaries play in commercial law. For example, the continued growth of electronic commerce requires

consideration of the role of websites and other platforms as intermediaries. And developments in artificial intelligence raise the prospect of intermediaries being non-human actors. All these issues are subject to rigorous analysis by the expert contributors to this book.

The rapid and continuing development of the Chinese economy and its markets has made business with China an integral component of the strategies of countless foreign companies, regardless of their size or form. However, in order to turn opportunities into successful enterprises, managers need a practical guide on the legal aspects of conducting business in China, and on the strategies for effectively circumventing unnecessary risks while simultaneously using the legal system to strengthen operations and protect interests. This remarkable book provides the necessary insight and guidance to devise a corporate strategy, and to tackle issues relating to common aspects of doing business with Chinese counterparts, investing in a Chinese enterprise, and engaging in business operations there. Drawing on expertise gained during eight years in China serving the legal needs of foreign companies, the author shows how many of the mistakes that foreign companies make can easily be avoided by conducting a proper due diligence and understanding how applicable laws work in practice. He clearly describes the opportunities and pitfalls exposed as a foreign investor engages with such elements of business

in China as the following: negotiating a detailed written contract; performing a legal and commercial due diligence on a prospective partner; resolving disputes through negotiation, arbitration or litigation; establishing and enforcing trademarks, patents and other intellectual property rights; investing in China; considering the joint venture structure; expanding through a merger or acquisition; restructuring or liquidating an operation; designing and implementing effective corporate governance; retaining, managing and terminating employees; arranging funds into and out of China; ensuring both tax efficiency and tax compliance; and avoiding criminal liabilities in the course of doing business. Whether seeking to source from China or to establish manufacturing facilities in China to produce for export, to sell products or services on the domestic market, or even just to act as a conduit between China and the outside world, business managers and their counsel from all over the globe and across all industries will benefit enormously from this deeply informed, insightful, and practical guide

Research Paper (postgraduate) from the year 2015 in the subject Law - Comparative Legal Systems, Comparative Law, grade: A-, The University of Hong Kong, course: LL.M, language: English, abstract: This research paper aims to review and compare the solutions regarding Contracting with Oneself as found in

Switzerland and Hong Kong. In a first part, the paper provides a definition of the term "Contracting with Oneself". The second part investigates the different solutions of Switzerland and Hong Kong. Conflict of interests is regarded as a "cross-cutting problem" of corporate governance and has been defined as a "situation in which an individual or a corporation (either private or government) is in a position to exploit a professional or official capacity in some way for their (or that of a related party) personal or corporate benefit". Due to the negative effects on a company in general, conflict of interests need to be avoided. There are many situations where a conflict of interests may arise. Contracting with Oneself is one of them and is very closely related to the definition as provided above. Contracting with Oneself, like conflict of interests in general, could be for the advantage but also for the disadvantage of a company and therefore, as it has been correctly described "may not, in and of itself, be an evidence of wrongdoing". However, the problem of Contracting with Oneself is inherent as it could be misused for diverting company's assets to a specific person (e.g. "executive perquisites, excessive compensation, transfer pricing, appropriation of corporate opportunities", etc. The question in this regard is how Contracting with Oneself can be addressed by law and regulation and how to find the golden path between allowing it, if it is for the overall benefit and when and how to restrict it, if it has a negative effect. Additionally, the restrictions must be effective before Contracting with Oneself becomes a legal problem that may lead to a personal benefit of a specific person.

This book focuses on current issues and developments in eight areas of commercial law patents, credit card fraud, transnational insolvency, the oversubscription of initial public offerings, the disqualification of company directors, the protection of company creditors, cross-border taxation, and unit trusts. A primary theme of most chapters is the impact of recent and ongoing commercial law

reform. Many of the authors discuss recent amendments to Hong Kong's commercial law and proposals of the Law Reform Commission or other bodies. The authors also make their own proposals for improving Hong Kong's legislation and case law.

In China, the thirty-year economic reform reflects the process of moving from planned economy towards market economy. This could be seen From the changes in the 2005 Company Law, which recognizes the owners' property rights and gives more freedoms to them to decide various matters. In this new edition, besides offering a systemic the constitution of companies, the establishment of various companies, role and function of various parties in corporate governance, and corporate financing, Gu Minkang highlights the major changes in the 2005 Company Law, and addresses many new issues such as shareholders' derivative action, American limited liability company, and asset restructuring of listed companies. Another important feature is a comparison between the 1993 Company Law and the 2005 Company Law that will facilitate reading and understanding. This comprehensive and up-to-date presentation of Chinese company law will be of value to all who are involved in business with and in China and their legal advisors, and to students of Chinese company law.
