The International Space Station (ISS) is a great international, technological, and political achievement. It is the latest step in humankind's quest to explore and live in space. The research done on the ISS may advance our knowledge in various areas of science, enable us to improve life on this planet, and give us the experience and increased understanding that can eventually equip us to journey to other worlds. As a result of the Station's complexity, few understand its configuration, its design and component systems, or the complex operations required in its

construction and operation. This book provides high-level insight into the ISS. The ISS is in orbit today, operating with a crew of three. Its assembly will continue through 2010. As the ISS grows, its capabilities will increase, thus requiring a larger crew. Currently, 16 countries are involved in this venture. The sophisticated procedures required in the Station's construction and operation are presented in *Amazing 3D Graphics* generated by NASA 104 pages of spectacularly detailed color graphics the Space Station as you've never seen it before!

Arkansas Methodist

Here is the fascinating story of the rise and fall of the Arrow, the legendary interceptor jet aircraft, developed by A.V. Roe Canada in the fifties.

The Defence of Duffer's Drift

Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals July - December)

Minutes

Contains stories previously published in *Bleating about the bush* and *Back at sundown*, as well as new material.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

The Arrow

Home Missions ... Annual Report of the Presbyterian Board of Home Missions ... Minutes of the ... General Assembly of the United Presbyterian Church in the United States of America  
*Developing Leaders for a Superior Command Culture*

In September 2010, James G. Pierce, a retired U.S. Army colonel with the Strategic Studies Institute at the U.S. Army War College in Carlisle Barracks, Pennsylvania, published a study on Army organizational culture. Pierce postulated that "the ability of a professional organization to develop future leaders in a manner that perpetuates readiness to cope with future environmental and internal uncertainty depends on organizational culture." He found that today's U.S. Army leadership "may be inadequately prepared to

lead the profession toward future success." The need to prepare for future success dovetails with the use of the concepts of mission command. This book offers up a set of recommendations, based on those mission command concepts, for adopting a superior command culture through education and training. Donald E. Vandergriff believes by implementing these recommendations across the Army, that other necessary and long-awaited reforms will take place.

The Commercial Vehicle  
Orange Coast Magazine is the oldest continuously published lifestyle magazine in the region,

bringing together Orange County's most affluent coastal communities through smart, fun, and timely editorial content, as well as compelling photographs and design. Each issue features an award-winning blend of celebrity and newsmaker profiles, service journalism, and authoritative articles on dining, fashion, home design, and travel. As Orange County's only paid subscription lifestyle magazine with circulation figures guaranteed by the Audit Bureau of Circulation, Orange Coast is the definitive guidebook into the county's luxe lifestyle.

*Commerce Business Daily*  
Popular Science gives our

readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
