Flying is an extremely safe way to travel. Fewer than 14,000 individuals perished in U.S. airline disasters during the twentieth century. In contrast, nearly three times as many people lose their lives in automobile accidents every year. Yet plane crashes have a tremendous impact on public perceptions of air safety in the United States. When a crash occurs domestically, media coverage is immediate and continuous. Government teams rush to investigate, elected officials offer condolences and promise to find the cause, and airlines and plane manufacturers seek to avoid responsibility. Regulations are frequently proposed in response to a particular incident, but meaningful change often does not occur. In *The Plane Truth*, Roger Cobb and David Primo examine the impact of high-visibility plane crashes on airline transportation policy. Regulation is disjointed and reactive, in part due to extensive media coverage of airline disasters. The authors describe the typical responses of various players—elected officials, investigative agencies, airlines, and the media. While all agree that safety is the primary concern in air travel, failure to agree on a definition of safety leads to policy conflicts. Looking at all airline crashes in the 1990s, the authors examine how particular features of an accident correspond to the level of media attention it receives, as well as how airline disasters affect subsequent actions by the National Transportation Safety Board, Federal Aviation Administration, and

others. Three accidents are considered in detail: USAir flight 427 (September 1994), ValuJet flight 592 (May 1996), and TWA flight 800 (July 1996). The authors also discuss how the September 11 terrorist attacks turned attention away from safety and toward security. Cobb and Primo make several policy recommendations based on their findings. These include calling on lawmakers and regulators to avoid reactive regulation and instead to focus on systematic problems in airline safety, like the antiquated air traffic control system. Concerned that aviation security is eclipsing aviation safety in the wake of September 11, they encourage federal agencies to strike a better balance between the two. Finally, in order to address the FAA's poor track record in balancing airline safety regulation with its other duties, they recommend the creation of a new federal agency that is responsible for aviation safety. *The Plane Truth* provides a framework for understanding conflicts about the meaning of air safety and the implications of these battles for public policy. In *Beyond the Trauma Vortex*, Gina Ross proposes a collaboration between the media, trauma researchers, and helping officials in order to break the vicious cycle of trauma and violence. The media, Ross suggests, can use their tremendous influence to promote peace rather than violence and to heal wounded psyches, communities, and nations. Delving first into the destructive nature of the "trauma vortex" through a variety of individual and historical examples, Ross then offers her insight into an alternate, restorative "healing vortex." By focusing on the interrelatedness of personal and collective healing, the author makes a compelling case for why—and how—media professionals

can play an influential role in effecting widespread healing for their viewers and for themselves.

The major textbook in communication theory. Denis McQuail provides a brisk, elegantly organized, and comprehensive overview of the ways in which mass communication has been viewed by social scientists and by practitioners. The wealth of thinking in the field; the enormous range of issues studied and questions raised; the proliferation of schools, approaches and tendencies: McQuail marshalls this welter of material into a clear, easy to follow textbook for students at all levels of communication studies. He reviews: ways in which the the mass media have been defined theories of their function and purpose views of the organizational structures and processes of mass media content analysis and the other techniques for interpreting the meaning of media content theories of what an audience is and what it does Cultivation theory, traditional sociology, classical marxism, the Frankfurt school, 'hegemony' theory, Soviet media theory, the uses and gratifications approach, development media theory, free press theory, organizational theory -- all these and much more -- are described and placed in their historical and scholarly context. McQuail's extensive references will guide anyone interested in mass communication

to the key work in the field. Diagrams, a Media Theory Map, summaries, indexes and other features will further help new students to keep a hold on all the separate strands in the field. About the author: Denis McQuail is currently Professor of Mass Communication, University of Amsterdam, the Netherlands. After graduating from Corpus Christi College, Oxford with a BA in Modern History and a Diploma in Public and Social Administration, he received a PhD in social studies from the University of Leeds. He has since been affiliated to the Television Research Unit, University of Leeds; the University of Southampton; and the Annenberg School of Communication, University of Pennsylvania. His major publications include: *Television and the Political Image* (with J Trenaman) 1961; *Television in Politics: Its Use and Influence* (with J G Blumler), 1968; *Towards a Sociology of Mass Communications*, 1968; *Sociology of Mass Communication* (editor) 1972; *Communication*, 1975; *Review of Sociological Writing on the Press*, 1976; *Analysis of Newspaper Content*, 1977; *Communication Models for the Study of Mass Communication* (with Sven Windahl), 1982. Why this textbook? Why choose this textbook for use in your courses over others that are available? McQuail has drawn on his own extensive teaching experience to make sure his book offers the following qualities and features: The frameworks: for ease of organization, McQuail arranges the theories of media effect processes, or mass media and social change in new, clarifying frameworks. He aims to present all the principal theories within a single integrative framework. Its range: McQuail's extraordinary feat of organization encompasses theories from all the principal approaches to communication from all over the world. His book will be useful in a variety of cultural

and national settings. Its thoroughness: McQuail provides over 300 references to guide your students to the primary sources. Not only is each theory described, and its sources and histories plotted, but its implications and intellectual context are explored. Consensus theories are given equal weight with the more contentious, critical understandings. Controversy is faced, fairness maintained. Its currency: The most recent research is expressed in the form of theoretical propositions. New approaches are discussed that are not reviewed in other textbooks: a revision of the functional theory, the notion of emerging 'public definitions', and a revision of the 'four theories of the press'. Other unique features: A thorough review of theories of the audience. Questions of media power and normative theories of media are given a central place at various points. Professor Denis McQuail provides a thorough review of the history, structure, and processes of the mass media, and the views taken of them. The first chapter defines the terms and issues of mass media studies. It also traces the development of mass media since the first newspapers in the 17th century. McQuail notes the origins, typical forms, and applications of mass media at different times. He then provides a framework for understanding the different approaches to the study of mass media. Mass society theory, Marxist approaches of different types, message-centred theory, and theory of audience and effect are the perspectives reviewed. Chapter Three explores the ideological, political, and cultural contexts in which the mass media operates, and which define the media's functions. The institutional forms of mass communication are characterized in Chapter Four. In Chapter Five, the meaning of the information

provided by the media is analyzed. Different kinds of content, such as news or fiction, are examined from different theoretical perspectives. Chapter Six describes alternative approaches to the study of the audience, the different aspects of audiences which they study, and the conclusions they have reached. Chapter Seven focusses on the study of the impact and effect of media. Different scientific approaches to this study are described, and the results of this research given. The final chapter looks at the lessons of mass communication study for issues of current concern such as international communication and new technological developments.

Published in Indonesia in 2005, *The Rainbow Troops*, Andrea Hirata's closely autobiographical debut novel, sold more than five million copies, shattering records. Now it promises to captivate audiences around the globe. Ikal is a student at the poorest village school on the Indonesian island of Belitung, where graduating from sixth grade is considered a remarkable achievement. His school is under constant threat of closure. In fact, Ikal and his friends—a group nicknamed the Rainbow Troops—face threats from every angle: skeptical government officials, greedy corporations hardly distinguishable from the colonialism they've replaced, deepening poverty and crumbling infrastructure, and their own low self-confidence. But the students also have hope, which comes in the form of two extraordinary teachers, and Ikal's education in and out of the classroom is an uplifting one. We root for him and his friends as they defy the island's powerful tin mine officials. We meet his first love, the unseen girl who sells chalk from behind a shop screen,

whose pretty hands capture Ikal's heart. We cheer for Lintang, the class's barefoot math genius, as he bests the students of the mining corporation's school in an academic challenge. Above all, we gain an intimate acquaintance with the customs and people of the world's largest Muslim society. This is classic storytelling in the spirit of Khaled Hosseini's *The Kite Runner*: an engrossing depiction of a milieu we have never encountered before, bursting with charm and verve.

WHO's Global Tuberculosis Report provides a comprehensive and up-to-date assessment of the TB epidemic and of progress in care and prevention at global, regional and country levels. This is done in the context of recommended global TB strategies and associated targets, and broader development goals. For the period 2016-2035, these are WHO's End TB Strategy and the United Nations' (UN) Sustainable Development Goals (SDGs), which share a common aim: to end the global TB epidemic. The main data sources for the report are annual rounds of global TB data collection implemented by WHO's Global TB Program since 1995 and databases maintained by other WHO departments, UNAIDS and the World Bank. In WHO's 2017 round of global TB data collection, 201 countries and territories that account for over 99% of the world's population and TB cases reported data.

The underlying concept of the paper is that the amount of precipitation required for the near-normal operation of the established economy of an area during some stated period is dependent on the average climate of the area and on the prevailing meteorological conditions both during and preceding

the month or period in question. A method for computing this required precipitation is demonstrated.

NAK, dua hal aku benci dalam hidup: September dan pohon mangga. September tidak pernah mau beranjak dari rumah. Betah. Ia sibuk meletakkan neraka di seluruh penjuru. Di ruang tamu. Di ranjang. Di meja makan. Bahkan di dada. Batang pohon

mangga tetap selutut persis prasasti batu. Ia berdiri mengekalkan dosa-dosa—dan dosa adalah pemimpin yang baik bagi penyesalan-penyesalan. Kukila adalah perempuan itu, yang membenci September dan pohon mangga. Hidupnya didera rasa bersalah yang besar, kepada mantan suaminya, mantan kekasihnya, dan anak-anaknya. Kepada suratlah dia berbicara dan kepada pohon-pohonlah dia menyembunyikan masa lalu, karena rahasia, konon, akan hidup aman dalam batang-batang pohon. Selain “Kukila (Rahasia Pohon Rahasia)”, di dalam buku ini ada lima belas cerita pendek lain, dikisahkan dalam kata-kata Aan Mansyur yang manis, bersahaja, kadang sedikit menggoda. Tentu saja saya suka membaca karya-karya Aan Mansyur. Pengarang ini pintar menciptakan misteri cerita, kemudian mengurainya dengan cara yang menyeret pembaca untuk ikut mengalir sampai akhir. Jangan lupa, bagaimanapun Aan seorang penyair. Di sana-sini muncul jalinan kata-kata bernapaskan puisi yang tidak jarang membuat bahasa ceritanya lebih berbunyi.

Objectivity in journalism is a key topic for debate in media, communication and journalism studies, and has been the subject of intensive historical and sociological research. In the first study of its kind, Steven Maras surveys the different viewpoints and perspectives on objectivity. Going beyond a denunciation or defence of journalistic objectivity, Maras critically examines the different scholarly and professional arguments made in the area. Structured around key questions, the book considers the origins and history of objectivity, its philosophical influences, the main objections and defences, and questions of values, politics and ethics. This book examines debates around objectivity as a transnational norm, focusing on the emergence of objectivity in the US, while broadening out discussion to include developments around objectivity in the UK, Australia, Asia and other regions.

Banking the Poor explores level and determinants of financial access in 54 countries, mostly in Africa. It collects information from two sources: central banks and leading commercial banks in each surveyed country. It explores associations between countries' banking policies and practices and their levels of financial access, measured in terms of the numbers of bank account per thousand adults. It builds on the previous work measuring financial access through information from regulators, from banks, and also from users' perspectives in household surveys.
