As part of a long series of Vietnam's policy objectives, English education has been identified as key to improving the quality of its rapidly expanding tertiary institutions and is crucial to the larger aim of modernising and internationalising its economy. Bringing together a wide range of Vietnamese and foreign English

education scholars, and tertiary educational practitioners, this book documents the significant progress and challenges in the realisation of Vietnam's English language policies as they are enacted in the higher education sector. Changes to Vietnam's higher education system remain unstable, unsystematic, and insubstantial. This book provides insights into how recent Vietnamese government policy is providing for a substantial and comprehensive renewal of Vietnam's tertiary education as part of their 2020 plan. Academics and students of English education, language policy, and nation building within the context of increased globalisation and marketisation in developing nations and Vietnam, in particular, should find this book valuable.

*Validity Argument in Language Testing* Mometrix Media LLC

Language tests play pivotal roles in education, research on learning, and gate-keeping decisions. The central concern for language testing professionals is how to investigate whether or not tests are

appropriate for their intended purposes. This book introduces an argument-based validity framework to help with the design of research that investigates the validity of language test interpretation and use. The book presents the principal concepts and technical terms, then shows how they can be implemented successfully in practice through a variety of validation studies. It also demonstrates how argument-based validity intersects with technology in language testing research and highlights the use of validity argument for identifying research questions and interpreting the results of validation research. Use of the framework helps researchers in language testing to communicate clearly and consistently about technical issues with each other and with researchers of other types of tests.

HSPT Practice Questions are the simplest

way to prepare for the HSPT. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. Taking lots of practice tests helps ensure that you are not surprised or disappointed on your test day. Our HSPT Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our HSPT Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were

difficult for you or that you needed more help to understand.

Experience in translation does not always correlate with the quality of the target

text. Also, the evaluations of translation work vary considerably among evaluators. Why not shifting the focus of attention from the final translation to the underlying translation process when assessing translation competence? Iryna Kloster applies a multi-method approach to model the translation competence based on empirical parameters, such as gaze behavior, dictionary use, revisions as well as subjective evaluations of comprehension and translation difficulty. Eye tracking, keystroke logging, screen recording and retrospective interviews were applied to collect data in the

experimental groups consisting of novice and semi-professional translators. As a consequence, the author suggests using language contrasts for researching translation competence. She draws conclusions based on hypotheses testing, provides justification by triangulating quantitative and qualitative data and discusses the results in the light of empirical translation studies as well. *The Evelyn Wood 7 Day Speed Reading and Learning Program* Univ of California Press
