CIMA C.H.Beck F1 builds on knowledge from paper C2 and introduces tax at a very basic level; it is not based on any tax regime. Financial reporting is a major part of the syllabus, both single company and group accounts are examined in the two '25-mark' questions in section C. New

financial reporting topics introduced at this level are: group accounts; construction contracts; financial instruments; and leases. It has four main sections: The principles of business taxation The principles of regulation of financial reporting Preparation of financial statements which conform with IFRS Consolidated financial statements The study text concentrates on the key	areas of the syllabus, taking into account the way in which topics are examined. The text has a step-by-step approach to producing financial statements and lots of exercises in which you can practice the workings. We guide you through the more problematic topics which can be brought into the preparation of single company and group financial statements,	and give you plenty of examples. <u>CIMA - E1 Organisational Management</u> Campus Verlag Zahlreiche Anregungen, insbesondere aus der Praxis, haben mich veranlaßt, die in einer Zeitspanne von 15 Jahren verstreut erschienenen und für den Praktiker schwer zugänglichen, grundlegenden Aufsätze zur Einzelkosten- und Deckungsbeitragsrechnung gesammelt herauszugeben. Die	Einzelkosten- und Deckungsbeitragsrechnung ist marktorientiert, weil einerseits die retrograden Erfolgsdifferenzrechnungen vom Verkaufserlös ausgehen und andererseits auf die relevanten und aktuellen Preise im Absatz- und Beschaffungsmarkt abgestellt wird. Sie ist entscheidungsorientiert, weil die Entscheidungsalternativen und die zu ihrer Durchführung	getroffenen Maßnahmen als die eigentlichen Untersuchungsobjekte angesehen werden und weil im Rahmen problemadäquater Zurechnungs- und Abdeckungshierarchien nur jeweils solche Erlös- und Kosten-(Ausgaben-)teile einander gegenübergestellt werden, die auf dieselbe Entscheidung zurückgeführt werden können. Die verbleibende Erfolgsdifferenz gibt somit an, welche

CIMA, for Exams in November 2011 and May 2012 Elsevier Keep in mind, the CIMA exam is NOT an accountant exam. It is more of a business management nature. Pure accounting knowledge would not be sufficient. CIMA places emphasis on strategic business skills. A CIMA qualification can widen one's career options, in and outside of finance. In fact, CIMA claims itself as the only

accounting body that focuses primarily on business needs. As a Chartered Management Accountant, one is at the forefront of business planning, strategy and change across the sectors - industry, commerce, and the public sector and not-for-profit organizations. It is generally believed that the CIMA certification is more "international" while the CMA certification (the one from IMA) is more

<p>US oriented. According to the CIMA, a Chartered management accountant is qualified to engage in a wide variety of activities, such as: - advising managers about the financial implications of project management - explaining the financial consequences of management decisions and suggesting actions - making strategic decisions and formulating business strategies to</p>	<p>create wealth and shareholder value - monitoring spending and financial control - managing risk and business assurance - cost determination and financial control - evaluating existing financial information systems and suggesting improvements -conducting internal business audits and preparing periodic financial statements for managers - explaining the</p>	<p>impact of the competitive landscape. The CIMA syllabus has the following exams: E1 enterprise operations E2 enterprise management E3 enterprise strategy F1 financial operations F2 financial management F3 financial strategy P1 performance operations P2 performance management P3 performance strategy To help you focus on the relevant exam contents, we develop the CIMA</p>

ExamFOCUS Study Notes to accompany your reading efforts. As a chartered management accountant, you need to be familiar with a wide variety of business management knowledge domains. You do not have to be an expert in each of these domains, but you need to know them well for purpose of the exam, and also for job search. In fact, from a job search site you can find job description	like this one: A chartered management accountant applies the principles of accounting to provide the financial information necessary for the planning and financial protection of organizations in the public and private sectors. They establish and maintain financial policies and management information systems, as well as liaise with management colleagues on all aspects of finance. The role combines	accounting skills with business management skills. Chartered management accountants look to the future (rather than the past, as in auditing). They analyze the performance of a business and advise on how to pre-empt problems, adapt to changing circumstances and improve value. They may work in a finance function or within specialist departments
