*Epidemiology Research Studies - Public Health*

Uncertainty related to the epidemiologic study design itself is often discussed in terms of limitations of the design, analysis, and subsequent interpretation of the findings. Almost any conceivable epidemiologic study must base its analysis on incomplete or imperfect information regarding the population under investigation.

The measures to be calculated and the analyses to be performed in an epidemiological study depend on the research questions being asked, the study type, and the available data. *Epidemiology* is used to describe the distribution of diseases in the population and to analyze the causes of these diseases.
