Although eighteenth-century Viennese keyboard music, especially by such composers as Haydn, Mozart, and Beethoven, is among the most popular ever written, there has been surprisingly little serious research into the instruments for which it was composed. This book fills that gap. Based on evidence from primary source material, much of it previously undiscovered or neglected, Maunder traces the history and development of the various keyboard instruments available in Vienna throughout the eighteenth century--harpsichords, clavichords, and pianos--and their use by composers and performers.

This definitive study of the life and works of Joseph Haydn represents half a century of research. As curator of the Gesellschaft der Musikfreunde in Vienna, Dr. Geiringer was in charge of one of the world's leading Haydn collections. His scholarly investigations took him to various monasteries, to libraries in Eisenstadt, Prague, Berlin, Paris, London, and Washington, D.C., and, as guest of the Hungarian government, to the previously almost inaccessible archives of the Princes of Esterhazy in Budapest.

Joseph Haydn - Piano Sonata No.58 in C Major - Hob.XVI:48 - A Score for Solo Piano Courier Corporation

Fundamentals of Musical Composition represents the culmination of more than forty years in Schoenberg's life devoted to the teaching of musical principles to students and composers in Europe

and America. For his classes he developed a manner of presentation in which 'every technical matter is discussed in a very fundamental way, so that at the same time it is both simple and thorough'. This book can be used for analysis as well as for composition. On the one hand, it has the practical objective of introducing students to the process of composing in a systematic way, from the smallest to the largest forms; on the other hand, the author analyses in thorough detail and with numerous illustrations those particular sections in the works of the masters which relate to the compositional problem under discussion.
