Ethiopia: A review - ResearchGate
Irrigation in Ethiopia is considered as a basic strategy to alleviate poverty and hence food security. It is useful to transform the rain-fed agricultural system which depends on rainfall into the combined rain-fed and irrigation agricultural system. This is believed to be the most prominent way of sustainable development in the country. Irrigation in Ethiopia, a Review This review discusses the Ethiopian irrigation based on the historical

backgrounds, current conditions of development and its contributions to the national economy, challenges and opportunities, and future development perspectives. It is believed that irrigation practices were long been in use during ancient times with unspecified beginning period. Irrigation in Ethiopia: a review.
