This book discusses an emerging field of decision science that focuses on business processes and systems used to extract knowledge from large volumes of data to provide significant insights for crucial decisions in critical situations. It presents studies employing computing techniques like machine learning, which explore decision-making for cross-platforms that contain heterogeneous data associated with complex assets, leadership, and team coordination. It also reveals the advantages of using decision sciences with management-oriented problems. The book includes a selection of the best papers presented at the 2nd International Conference on Decision Science and Management (ICDSM 2019), held at Hunan International Economics University, China, on 20–21 September 2019.

2019 PROSE Award Subject Category Winner - Multivolume Reference/Humanities. Honorable Mention for RUSA's 2019 Dartmouth Medal. The definitive reference in the field of English language teaching The TESOL Encyclopedia of English Language Teaching explores the theoretical and practical aspects of English language instruction by providing an essential, go-to reference resource for educators, professionals, researchers, and students world-wide. Over 750 entries written by leading practitioners and scholars from around the globe reflect the collaborative efforts of a truly international team of editors and advisory board members.

The Encyclopedia is arranged thematically and entries are ordered A-Z within each of these themes. Fifteen key topic areas are covered: Approaches & Methods Assessment English as an International Language NNESTs Organizational Issues Sociocultural Aspects Teaching Grammar Teaching Listening Teaching Reading Teaching Speaking Teaching Vocabulary Teaching Writing Technology Training & Development Current Trends and Future Directions in English Language Teaching (online only) Each entry is organized into three sections: "Framing the Issue," "Making the Case," and "Pedagogical Implications," in which the Author presents proven applications and recommendations that may be immediately employed. Unparalleled in scope, The TESOL Encyclopedia of English Language Teaching is an indispensable professional resource for all ELT/ESL practitioners everywhere. This work is also available as an online resource at www.tesolencyclopedia.com. NEW THEME: 27 newly published articles covering Current Trends and Future Directions in English Language Teaching, edited by John I. Liontas - now published online only! [The Cambridge Guide to Pedagogy and Practice in Second Language Teaching](http://www.tesolencyclopedia.com) Bloomsbury Publishing Pedagogical Reflections on Learning Languages in Instructed Settings is intended to provide the latest pedagogical reflections that derive from research in a variety of key areas within the discipline of language learning. Thus, this volume aims at helping practising language teachers to update their teaching methodology. The book has fifteen chapters that are grouped around five sections. The first section of the book includes three chapters, which outline past approaches to language learning and highlight advances in our understanding of how languages are likely to be learned and taught. These three chapters provide the theoretical grounding for the rest of the volume by discussing outstanding concepts in the language learning field, namely: those of eclecticism (Chapter 1), communication (Chapter 2), and learner autonomy (Chapter 3). The second section of the book contains three chapters, which explore new directions in the field that have recently caught the attention of language researchers and practitioners, namely: the Information and Communication Technology (ICT) in language learning (Chapter 4) the use of language corpora (Chapter 5) and finally, the use of the portfolio as a new assessment tool responding to new pedagogical demands (Chapter 6). The third section of the book consists of three chapters, which discuss the role of learners' individual variables such as affect (Chapter 7), learning styles (Chapter 8), and learning strategies (Chapter 9), crucial for understanding the nature of language learning. The fourth section of the book has five chapters and provides insights into understanding the nature of the four language skills, that is to say, listening (Chapter 10), speaking (Chapter 11), reading (Chapter 12) and writing (Chapter

13). This section also addresses the issue of assessment with the aim of increasing awareness on the duality teaching/assessing and its pedagogical dimension (Chapter 14). The book concludes with the fifth section, which includes a single chapter, that pulls all aforementioned topics together and highlights connections to a student-centred approach, which involves a reformulation of language teachers' teaching practices (Chapter 15).

Bringing together top listening scholars from a range of disciplines and real world perspectives, *Listening and Human Communication in the 21st Century* offers a state-of-the-art overview of what we know and think about listening behavior in the 21st century. Introduces students to the core issues listening theory and practice Includes student friendly features such as editorial introductions to each section and questions for further reflection at the end of each chapter Discussion ranges from historical perspectives to present theory, to teaching and performing listening in the classroom, in health care, and in corporate settings

Development and Evaluation Cambridge Scholars Publishing The use of Academic Podcasting Technology and MALL (Mobile Assisted Language Learning) is reshaping teaching and learning by supporting, expanding, and enhancing course content, learning activities, and teacher-student interactions. Academic Podcasting and Mobile Assisted Language Learning: Applications and Outcomes shares innovative and pedagogically effective ways to improve foreign language education by identifying the instructional uses and benefits of academic podcasting technology and MALL in foreign language acquisition. These include instructional uses, students' perceived learning gains, how instructors can use/have used the technology (successes and challenges), study abroad experiences with the technology, pedagogical impact, and economic perspectives on its use.

New Trends in Foreign Language Teaching Springer

Teaching and Learning the English Language is a practical guide for anyone seeking to improve their teaching, whether through formal study or on their own. Richard Badger explores teaching English as a problem-solving activity in which teachers must address three fundamental questions: · what aspect of language do students need to learn; · how might they learn this particular aspect of language; · and how can teachers support their learning. Offering a solid, research-based approach along with sound practical advice, this book equips teachers with skills needed to analyse their own contexts and develop their practice. It covers: · Fundamentals of English language · Psychological and social learning processes · TESOL teaching methods and approaches · Lesson planning and classroom management · Language evaluation and assessment · Teaching pronunciation,

spelling, grammar, vocabulary and discourse · Teaching listening, reading, writing and speaking · English teacher professional development Pedagogical features include chapter summaries, activities for students and key readings recommendations, and the book is also supported by online resources: video case studies, additional exercises and multiple choice quizzes. Including numerous international lesson examples and case studies, Teaching and Learning English Language is suitable for both trainee and practising teachers who speak English as a first, second or foreign language.

Research Methods in Applied Linguistics K.K. Publications Language teaching approaches, methods and procedures are constantly undergoing reassessment. New ideas keep emerging as the growing complexity of the means of communication and the opportunities created by technology put language skills to new uses. In addition, the political, social and economic impact of globalisation, the new demands of the labour market that result from it, the pursuit of competitiveness, the challenges of intercultural communication and the diversification of culture have opened new perspectives on the central role that foreign languages have come to play in the development of contemporary societies. This book provides an insight into the latest developments in the field and discusses the new trends in foreign language teaching in four major areas, namely methods and approaches, teacher training, innovation in the classroom, and evaluation and assessment.

Proceedings of ICDSM 2019 Springer Nature

This book represents a collection of papers that relate to the challenges and problems posed by the ever-changing and diversified nature of today's classroom. The papers discuss and demonstrate methodologies and learning strategies, and in the process, recommend effective practices that are practical and open to adaptation for different teaching and learning contexts. They range from suggestions on how to exploit information technology resources to individual or specific case studies. These case studies report on a variety of contextual issues and problems that are specified to particular learning contexts. This book, therefore, thus not only offers examples of tried and tested teaching strategies but also offers useful insights into specific sociocultural problems that are experienced by learners as well as teachers and interested stakeholders in particular settings and countries. The papers offer a comprehensive documentation of past as well as present problems faced by teachers, policy makers and students, and discuss ways and strategies of overcoming such problems such that the teaching and learning process is not only enhanced but made more meaningful and fulfilling to both teachers and learners. The inherently global perspective of the papers in this book makes it an enriching compendium.

This collection is comprised of papers submitted to the 3rd International Online Language Conference (IOLC) held in September 2010. IOLC 2010 was a two-day conference which aimed to provide a forum for academics, practitioners, experts and students to debate current international issues and challenges in the broad area of language learning and teaching. This annual world-renowned conference takes place over the internet, allowing participants to save accommodation and flight expenses and at the same time helping to save our planet by reducing CO2 emissions. All submitted papers went through a double blind review process before a decision was made. This was to ensure the quality level of the conference is kept high.

This guide for teachers and teacher trainees provides a wealth of suggestions for helping learners at all levels of proficiency develop their listening and speaking skills and fluency, using a framework based on principles of teaching and learning. By following these suggestions, which are organised around four

strands—meaning-focused input, meaning-focused output, language-focused learning, and fluency development—teachers will be able to design and present a balanced programme for their students. Updated with cutting-edge research and theory, the second edition of Teaching ESL/EFL Listening and Speaking retains its hands-on focus and engaging format, and features new activities and information on emerging topics, including: Two new chapters on Extensive Listening and Teaching Using a Course Book Expanded coverage of key topics, including assessment, pronunciation, and using the internet to develop listening and speaking skills Easy-to-implement tasks and suggestions for further reading in every chapter More tools for preservice teachers and teacher trainers, such as a sample unit, a "survival syllabus", and topic prompts The second edition of this bestselling book is an essential text for all Certificate, Diploma, Masters, and Doctoral courses for teachers of English as a second or foreign language.

In formal education, a curriculum (plural curricula) is the set of courses, and their content, offered at a school or university. As an idea, curriculum stems from the Latin word for race course, referring to the course of deeds and experiences through which children grow and mature in becoming adults. Crucial to the curriculum is the definition of the course objectives that usually are expressed as learning outcomes and normally include the program's assessment strategy. These outcomes and assessments are grouped as units (or modules), and, therefore, the curriculum comprises a collection of such units, each, in turn, comprising a specialised, specific part of the curriculum. So, a typical curriculum includes communications, numeracy, information technology, and social skills units, with specific, specialised teaching of each. This book presents research on educational curricula from around the world.

Current Trends in the Development and Teaching of the four Language Skills builds connections from theory in the four language skills to instructional practices. It comprises twenty-one

chapters that are grouped in five sections. The first section includes an introductory chapter which presents a communicative competence framework developed by the editors in order to highlight the key role the four skills play in language learning and teaching. The next four sections each represent a language skill: Section II is devoted to listening, Section III to speaking, Section IV to reading and Section V to writing. In order to provide an extensive treatment of each of the four skills, each section starts with a theoretical chapter which briefly illustrates advances in the understanding of how each skill is likely to be learned and taught, followed by four didactically oriented chapters authored by leading international specialists. These pedagogical chapters deal specifically with four key topics: 1) areas of research that influence the teaching of a particular skill; 2) an overview of strategies or techniques necessary for developing a particular skill; 3) an approach to the academic orientation of a particular skill, and 4) unique aspects of teaching each skill. Moreover, all chapters incorporate two common sections: pre-reading questions at the beginning of the chapter in order to stimulate readers' interest in its content, and a section entitled suggested activities at the end of the chapter in order to allow readers put the ideas and concepts presented into practice. The accessible style and practical focus of the volume make it an ideal tool for teachers, teacher trainers, and teacher trainees who are involved in teaching the four language skills in a second or foreign language context.

Converging Approaches and Challenges Springer

This book deals with how technology can enhance learning. It is a collection of contemporary practices and developmental trends for enhancing learning through technology. Researchers in the field of electronic learning (e-learning) share how new technologies can be applied in and out of the classroom, and how contemporary pedagogical practices should be deployed. This book presents the most updated technologies that work hand in hand with current pedagogies to help students learn. The contributors are prominent researchers and practitioners in the field. This book attempts to report all emerging models, techniques, and applications related to learning through technology.

Exploring Listening Strategy Instruction through Action Research Routledge

This book introduces the concept of multimedia in education, and how multimedia technology could be implemented to impart digital education to university students. The book emphasizes the versatile use of technology enabled education through the research papers from distinguished academicians and researchers who are specifically working in this area. It benefits all those researchers who are enthusiastic about learning online and also for those academicians who are interested to work on various aspects of learning and teaching through technology. *Recent Trends in Decision Science and Management* Routledge Issues in Materials Development provides readers with theoretical foundations and practical aspects of designing materials for EFL/ESL contexts. It starts with discussing some basic and preliminary principles of materials design followed by scrutinizing critical issues in materials development in an objective and systematic way. This ranges from considering learners' needs, adopting, adapting, selection, and gradation of materials to the specific focus of the book on developing various types of materials for the four language skills, pronunciation, ESP vocabulary, and computer assisted language learning materials. Authenticity of materials to be designed and the inclusion of affective factors to develop motivating materials to engage language learners, in addition to features of materials design at a universal level are other areas to read about. This book finally tries to open new horizons and possible futuristic approaches to improve today's ELT materials.
