 This atlas is aimed at collecting, compiling and disseminating information on mental health resources in the world. It presents updated and expanded information from 192 countries with analyses of global and regional trends as well as individual country profiles. Newly included in this volume is a section on epidemiology within the profiles of all low and middle income countries. It shows that mental health resources within most countries remain inadequate despite modest improvements since 2001. Availability of mental health resources across countries and between regions remains substantially uneven, with many countries having few resources. The atlas reinforces the urgent need to enhance mental health resources within countries.

 How do some language learners triumph against all odds, despite not having obvious heritage links or spending extended periods of time in the L2 environment pre-adulthood? This book delves into the autobiographical stories of learners who achieve nativelike proficiency, opening a narrative window into their experiences and offering insights into their pathways to success. The in-depth analysis ties together a wide range of potentially relevant topics, from motivational vision and international posture to issues of identity, endurance and even musical ability, among other themes. The authors explore whether these successes can be repeated by others and the book will be of use to language teachers interested in learner motivation and the antecedents to high-level ultimate attainment. The book will also be of great interest to researchers working in the areas of language learner psychology, especially in topics concerning language learning motivation, identity and narrative inquiry.

 Language and National Identity in Asia is a comprehensive introduction to the role of language in the construction and development of nations and national identities in Asia. Leading scholars from all over the world investigate the role languages have played and now play in the formation of the national and social identity in countries throughout South, East, and Southeast Asia. They consider the relation of the regions' languages to

national, ethnic, and cultural identity, and examine the status of and interactions between majority, official, and minority languages. Illustrated with maps and accessibly written this book will interest all those concerned to understand the dynamics of social change in some of the most important countries in the world. It will appeal to all those studying, researching, or teaching issues in Asian society, language, and politics from a comparative perspective.

 "In the first part of the twentieth century, Korean Buddhists, despite living under colonial rule, reconfigured sacred objects, festivals, urban temples, propagation—and even their own identities—to modernize and elevate Korean Buddhism. By focusing on six case studies, this book highlights the centrality of transnational relationships in the transformation of colonial Korean Buddhism. Hwansoo Ilmee Kim examines how Korean, Japanese, and other Buddhists operating in colonial Korea, Japan, China, Taiwan, Manchuria, and beyond participated in and were significantly influenced by transnational forces, even as Buddhists of Korea and other parts of Asia were motivated by nationalist and sectarian interests. More broadly, the cases explored in the *The Korean Buddhist Empire* reveal that, while Japanese Buddhism exerted the most influence, Korean Buddhism was (as Japanese Buddhism was itself) deeply influenced by developments in China, Taiwan, Sri Lanka, Europe, and the United States, as well as by Christianity."

 Driven by demographic changes, and reinforced by intensifying globalization, international labour mobility has been on the rise in recent decades in the Asia-Pacific region. It seems that, after trade and investment, labour mobility constitutes the final frontier for regional integration among the Asia-Pacific economies. There is no doubt that labour movements are integral to regional economic integration and critical to the long-term health of the regional economies and business operations. In reality, however, such movements are much burdened with political and social problems in the labour origin economies as well as the labour destination economies, and yet many of these problems remain not just unaddressed by the relevant governments but not even well studied. The present volume seeks to fill this gap by offering synthesis papers stemming from the studies on international labour migration in twenty Asia-Pacific economies which were discussed at a joint PECC-ABAC conference held in Seoul, Korea, on 25-26 March 2008, organized by KOPEC. These papers examine the demographic transition, the associated pattern of international labour migration, the national policies associated with it as well as their implications for business and the issues they raise, and, finally, the implications of these analyses for

cooperation among the APEC governments, for each of the four subregions in the Asia-Pacific, as well as for the whole region.

 This edition focuses on the employment situation of immigrants. For the first time, this report presents a "scoreboard" of labour-market integration of immigrants, as well as an analysis of wage differentials between immigrants and the native-born.
Early Language Learning in Context Walter de Gruyter
 What do Buddhist monks learn about Buddhism? Which part of their enormous canonical and non-canonical literature do they choose to focus on as the required curriculum in their training, and what do they elect to leave out? The cultural depository of Buddhism includes some four thousand canonical texts, hundreds of other historical works, modern textbooks, oral traditions, and more recently, an increasingly growing body of online material. The sheer diversity of this mass of information makes the pedagogical choices of monastics worthy of close study. Monastic Education in Korea is essentially a biography of the Korean Buddhist monastic curriculum over the past five centuries. Based on extensive ethnographic work and archival research in Korean monasteries, it illustrates how a particular premodern syllabus was reimagined in the twentieth century to become the sole national Korean monastic pedagogical program—only to be criticized and completely restructured in recent years. Through a detailed analysis of these modifications, the work demonstrates how Korean Buddhist reformers today tend to imitate the educational practices and canonize the textual totems of the contemporary international discipline of Buddhist studies, and how, by doing so, they ultimately transform the local Korean tradition from a particular brand of Chinese-centered scholastic Chan into the inclusive, pluralistic, Indian-focused Buddhism common in English-language introductions to the religion. The book further examines the proliferation of diverse graduate schools for the sangha, as well as the creation of a novel examination system for all monastics. It reveals some of the realities of operating large monastic organizations in contemporary Asia and portrays a living, vibrant Buddhist community that is constantly negotiating with modern values and reformulating its core orthodoxies.

 This book gathers papers presented at the 22nd International Conference on Interactive Collaborative Learning (ICL2019), which was held in Bangkok, Thailand, from 25 to 27 September 2019. Covering various fields of e-learning and distance learning, course and curriculum development, knowledge management and learning, real-world learning experiences, evaluation and outcomes assessment, computer-aided language learning, vocational education development and technical teacher training, the contributions focus on innovative ways in which higher

education can respond to the real-world challenges related to the current transformation in the development of education. Since it was established, in 1998, the ICL conference has been devoted to new approaches in learning with a focus on collaborative learning. Today, it is a forum for sharing trends and research findings as well as presenting practical experiences in learning and engineering pedagogy. The book appeals to policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, and other professionals in the learning industry, and further and continuing education.

The study of families and educators who successfully sustain children's linguistic resources is a novelty in current educational research, where focus has largely been on the development of students' English language skills. In this book, Alison L. Bailey and Anna V. Osipova provide a systematic examination of the beliefs and practices of parents and educators who share the common goal of improving educational and social outcomes for multilingual children. Giving voice to parents and educators, they explore the strategies being devised to foster multilingualism and support its development both at home and in the classroom. This book presents new research findings and combines these with compelling firsthand accounts of the successes and concerns of both families and educators, making its content pertinent to a wide audience of researchers and a range of higher education courses.

On Translating Modern Korean Poetry is a research monograph exploring the intricacies and complexities of translating modern Korean poetry. This monograph highlights the difficulties entailed in translating Korean poetry, due to the lexical, structural, social, expressive and attitudinal levels with which the translator must be engaged. Featuring all-new translations, this book explores the question of what exactly modern Korean poetry is, increases the representation of female poets and includes poems addressing modern historical events, globalization, diaspora and mental health. Each chapter provides commentary on both the original and translated texts and looks at some of the issues that arose during the translation process. By doing so the authors draw attention to the intricate, trans-cultural and trans-creational process of Korean poetry translation. Collating contemporary Korean poetry and intricately exploring the translation process, this book is ideal for researchers and advanced level students of Korean Studies, Translation Studies and Literature with an interest in translation.

This book examines how language is a central resource in transforming migrant women into transnational domestic workers. Focusing on the migration of women from the Philippines to Singapore, the book unpacks why and how language is embedded in the infrastructure of transnational labor migration that links migrant-sending and migrant-receiving countries. It sheds light on the everyday lives of transnational domestic workers and how they draw on their linguistic repertoires, and in particular on English, as they cross geographical and social spaces. By showing how the transnational mobility of labor is dependent on the selection and performance of particular assemblages of linguistic resources that index migrants as labor and not as people, the book provides a powerful lens with which to examine how

migration contributes to relationships of inequality and how such inequalities are produced and challenged on the terrain of language.

Morpho-Syntactic Patterns in Spoken Korean English presents fundamental research on the use of English by South Korean speakers. Despite the extraordinary and vibrant status of the English language in South Korean society (demonstrated, for example, by the notion of English Fever), research on the forms of English in the South Korean context has been sadly neglected in the study of World Englishes. This monograph is the first to provide a rich and contextualized description of the Korean English morpho-syntactic repertoire. It draws on the specifically compiled Spoken Korean English (SPOKE) corpus to shed light on Korean uses of plural marking, articles, pronouns, prepositions, and verbs in spoken English, and demonstrates that English is indeed the language of those who use it. This volume will be highly relevant for researchers interested in Expanding Circle Englishes, Asian Englishes, spoken language corpora, and morpho-syntactic variation.

This book provides readers with an in-depth understanding of the methodological tools that have to date been implemented within World Englishes (WE) research. It serves as a tool to allow for better methodological rigour in interpreting prior research, as well as in conducting future research in this important area of sociolinguistic investigation. This book explores various methodological tools, ranging from corpus analysis to ethnography to questionnaires, demonstrating how such approaches have been used to address a wide range of empirical topics common to WE research. With chapters dedicated to specific methodological approaches and demonstrating these approaches in context, readers are provided with the knowledge necessary to both pursue future empirical inquiry as well as consider existing research from a critical perspective. The book will also explain the similarities and differences that exist between WE and English as a Lingua Franca (ELF) and English as an International Language (EIL).

This must-have handbook offers a comprehensive survey of the field. It reviews the language education policies of Asia, encompassing 30 countries sub-divided by regions, namely East, Southeast, South and Central Asia, and considers the extent to which these are being implemented and with what effect. The most recent iteration of language education policies of each of the countries is described and the impact and potential consequence of any change is critically considered. Each country chapter provides a historical overview of the languages in use and language education policies, examines the ideologies underpinning the language choices, and includes an account of the debates and controversies surrounding language and language education policies, before concluding with some predictions for the future.

Errors in Language Learning and Use is an up-to-date introduction and guide to the study of errors in language, and is also a critical survey of previous work. Error Analysis occupies a central position within Applied Linguistics, and seeks to clarify questions such as 'Does correctness matter?', 'Is it more important to speak fluently and write imaginatively or to communicate one's message?' Carl James provides a scholarly and well-illustrated theoretical and historical background to the field of Error Analysis. The reader is led from definitions of error and related concepts, to categorization of types of linguistic deviance, discussion of error gravities, the utility of teacher correction and towards writing learner profiles. Throughout, the text is guided by considerable practical experience in language education in a range of classroom contexts worldwide.
