Rosen & Barkin's 5-Minute Emergency Medicine Consult

Lippincott Williams & Wilkins

Cardiovascular disease is the leading cause of death in women in the US, with more women dying from heart disease than men. Women may have different presentation from men and often need a different approach to diagnosis and treatment. There are also unique topics of management of heart disease in women, including issues during pregnancy, lactation, and menopause. Many different health care providers, as well as cardiologists are involved in treating these patients. A manual reviewing diagnosis and treatment of cardiac disease in women would help providers without specific cardiology training to deliver care with greater efficiency. A practical and comprehensive guide geared towards these providers would be a highly practical and valuable resource that would be utilized in everyday practice in offices that include urban clinics, general medicine offices, obstetrics and gynecology offices, as well as in the surgical subspecialties. This book will be a highly practical resource that can be directly applied to the issues that arise in everyday practice. There is no available book on the market that focuses on a broader approach to cardiac disease in women or focuses on non-cardiology providers (and their trainees) who have the need to know more about treatment of cardiovascular disease in women.

Manual of Hypertension of the European Society of Hypertension, Third Edition Lippincott Williams & Wilkins

In this time of quarantine and global uncertainty, it can be difficult to deal with the increased stress and anxiety. Using ancient self-care techniques rediscovered by Herbert Benson, M.D., a pioneer in mind/body medicine for health and wellness, you can relieve your stress, anxiety, and depression at home with just ten minutes a day. Herbert Benson, M.D., first wrote about a simple, effective mind/body approach to lowering blood pressure in *The Relaxation Response*. When Dr. Benson introduced this approach to relieving stress over forty years ago, his book became an instant national bestseller, which has sold over six million copies. Since that time, millions of people have learned the secret—without high-priced lectures or prescription medicines. *The Relaxation Response* has become the classic reference recommended by most health care professionals and authorities to treat the harmful effects of stress, anxiety, depression, and high blood pressure. Rediscovered by Dr. Benson and his colleagues in the laboratories of Harvard Medical School and its teaching hospitals, this revitalizing, therapeutic tack is now routinely recommended to treat patients suffering from stress and anxiety, including heart conditions, high blood pressure, chronic pain, insomnia, and many other physical and psychological ailments. It requires only minutes to learn, and just ten minutes of practice a day.

Nephrology and Hypertension Board Review Lippincott Williams & Wilkins

Be prepared to handle life-threatening dental emergencies! *Medical Emergencies in the Dental Office, 7th Edition* helps you learn the skills needed to manage medical emergencies in the dental office or clinic. It describes how to recognize and manage

medical emergencies promptly and proactively, and details the resources that must be on hand to deal effectively with these situations. This edition includes new guidelines for drug-related emergencies, cardiac arrest, and more. Written by respected educator Dr. Stanley Malamed, this expert resource provides dental professionals with the tools for implementing a basic action plan for managing medical emergencies. "It successfully fulfils its aim of stimulating all members of the dental team to improve and maintain their skills in the effective prevention, recognition and management of medical emergencies." Reviewed by European Journal of Orthodontics, March 2015 "...very easy to read and provides a very comprehensive reference for a variety of medical emergencies." Reviewed by S.McKernon on behalf of British Dental Journal, July 2015 A logical format reflects the way emergencies are encountered in a dental practice, with chapters organized by commonly seen clinical signs and symptoms, such as unconsciousness or altered consciousness, respiratory distress, seizures, drug-related emergencies, chest pain, and cardiac arrest. Step-by-step procedures include detailed, numbered instructions for stabilizing and treating victims (PCABD) in common medical emergencies. Full-color illustrations demonstrate emergency techniques in realistic clarity. Summary tables and boxes make it easy to find essential concepts and information. Quick-reference algorithms in the appendix include step-by-step diagrams showing the decision-making process in common emergency situations. A differential diagnosis chapter ends each of the book's parts on common emergencies. UPDATED content includes the most current guidelines for drug-related emergencies, unconsciousness, altered consciousness, and cardiac arrest as well as protocols for obstructed airway management. UPDATED PCABD boxes reflect the American Heart Association's new sequence of steps for stabilizing and treating victims with an easy-to-remember acronym: Positioning, Circulation, Airway, Breathing, and Definitive Management. UPDATED! Emergency drug and equipment kit instructions help you assemble emergency kits and ensure that your dental office has safe, current materials on hand.

Ocular Therapeutics Handbook: A Clinical Manual is directed at the needs of optometrists, nurses and primary care physicians and provides succinct, rapid access information for most common ocular problems encountered in a primary care setting. It is divided into three sections: Quick Reference, Ocular Therapeutics and Appendices. The Quick Reference section covers such topics as ocular microbiology, lab tests and procedures, pharmaceutical agents, and side effects of medications. The Ocular Therapeutics section discusses diseases, traumatic injuries, and ocular urgencies and emergencies. The appendices provide a summary of abbreviations, conversion charts, case report sheets and important phone numbers. The chapters have been developed to serve as a snapshot, presenting the clinician with the most relevant information regarding the pathophysiology and etiology of diseases, patient demographics, signs and symptoms, lab tests, and recommended approaches to treatment.

Pocket Pediatrics Elsevier Health Sciences

Covering the management of critically ill newborns from the first minute of life through the first 72 hours, this practical, evidence-based and clinically-informed guide will provide all members of the pediatric care team with the essential information to save lives and prevent disability. With chapters on neonatal transport, resuscitation, ventilation and ethical issues, the content is further illustrated with case studies illustrating the real-world aspects of identifying critical signs and symptoms, diagnostics and treatment in multiple settings. As well as including numerous clear diagrams and summary tables, the text includes algorithms based on international guidelines to help navigate the reader through the delivery of care, and a comprehensive listing of drugs and dosages, serving as a quick reference guide when making treatment decisions. This is essential reading for pediatric residents, fellows and junior faculty, neonatal intensive care nurses, paramedics, obstetricians, midwives, anesthesiologists and emergency medicine physicians.

Manual of Cardiovascular Medicine Lippincott Williams & Wilkins

The second volume in IOM's series on migrant deaths, *Fatal Journeys* has two main objectives. First, it provides an update of global trends in migrant fatalities since 2014. Data on the number and profile of dead and missing migrants are presented for different regions of the world, drawing upon the data collected through IOM's Missing Migrants Project. Second, the report examines the challenges facing families and authorities seeking to identify and trace missing migrants. The study compares practices in different parts of the world, and identifies a number of innovative measures that could potentially be replicated elsewhere.
