The revised 2019 edition of Mastering VBA Microsoft Office 365 offers an accessible guide that shows how to extend the capabilities of Office 365 applications with VBA programming. Written in

clear terms and understandable language, the book includes systematic tutorials and contains both intermediate and advanced content for experienced VB developers. Designed to be comprehensive, the book addresses not just one Office application, but the entire Office suite. To enhance understanding, the content is explored in real-world projects in Word, Excel, Outlook, and PowerPoint. Since the technical programming methods in the Office

applications continue to evolve, the updated 2019 edition reviews the changes to the program. Code libraries, the API, and the object model for each Office program have been modified during the three years since the last version of this book. Various elements within VBA have been deprecated or replaced, and the surface UI changed as well. The updated 2019 edition covers topics such as:

- Recording macros and getting started with VBA
- Learning how to work with

VBA • Using loops and functions • Using message boxes, input boxes, and dialog boxes • Creating effective code • XML-based files, ActiveX, the developer tab, content controls, add-ins, embedded macros, and security Written for all levels of Microsoft Office 365 users, *Mastering VBA Microsoft Office 365: 2019 Edition* explains how to customize and automate the Office suite of applications.

Teach the course YOU want in LESS TIME! In today's fast-moving, mobile environment, the GO! with Office 2016 series focuses on the job skills needed to succeed in the workforce. With job-related projects that put Microsoft Office® into

context, students learn the how and why at the moment they need to know, all in the appropriate Microsoft procedural syntax. For Office 2016, the hallmark guided-practice to skill-mastery pathway is better than ever. Students have many opportunities to work live in Microsoft office to apply the skills they've learned. In addition, instructional projects are now available as grader projects in MyITLab, so students can work live in Office while receiving auto-graded

feedback. These high-fidelity simulations match the text and provide an effective pathway for learning, practicing, and assessing their abilities. After completing the instructional projects, students can apply their skills with a variety of progressively challenging projects that require them to solve problems, think critically, and create on their own. New GO! Collaborate with Google projects allow students to apply their skills to a new environment that is already popular in many

workplaces. Integrated Microsoft Office Specialist (MOS) objectives make GO! your one resource for learning Office, gaining critical productivity skills, and prepare for MOS certification. Also available with MyITLab MyITLab® is an online homework, tutorial, and assessment program designed for Information Technology (IT) courses, to engage students and improve results. HTML5

Simulation exercises and Live-in-Application Grader projects come with the convenience of auto-grading and instant feedback, so students learn more quickly and effectively, and build the critical skills needed for college and career success. Digital badges allow students to showcase their Microsoft Office or Computer Concepts competencies,

keeping them motivated and focused on their future careers. Note: You are purchasing a standalone product; MyITLab does not come packaged with this content. Students, if interested in purchasing this title with MyITLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information.
