Learning in the Making IGI Global

Due to the COVID-19 pandemic, learners of all ages have had to quickly adapt to learning through digital media as traditional ways of teaching become obsolete. Educators did not have a clear digital strategy in mind before the COVID-19 pandemic as they primarily relied on these traditional ways of teaching and disseminating knowledge. As phygital learning opportunities are emerging thanks to the growing EdTech economy, educators now have the opportunity to reform the school system, bringing in more innovation while reducing costs, broadening access to resources, and improving the quality of the teaching provision. *EdTech Economy and the Transformation of Education* is a cutting-edge reference that examines successful digital transformation in educational settings as well as the tools available to do so and the competencies and skills needed for the future. The book paves the way for phygital or blended long-term solutions. Covering a range of topics such as online education, learning processes, and digital transformation, this

reference work is ideal for researchers, administrators, policymakers, academicians, practitioners, scholars, instructors, and students.

Haben oder Sein. Die seelischen Grundlagen einer neuen Gesellschaft BoD – Books on Demand

A must-read collection on contemporary threats to academic freedom. Academic freedom may be threatened like never before. Yet confusion endures about what professors have a defensible right to say or publish, particularly in extramural forums like social media. At least one source of the confusion in the United States is the way in which academic freedom is often intertwined with a constitutional freedom of speech. Though related, the freedoms are distinct. In *Challenges to Academic Freedom*, Joseph C. Hermanowicz argues that, contrary to many historical views, academic freedom is not static. Rather, we may view academic freedom as a set of relational practices that change over time and place. Bringing together scholars from a wide range of fields, this volume examines the current conditions, as well as recent developments, of academic

freedom in the United States. • the sources of recurring threat to academic freedom; • administrative interference and overreach; • the effects of administrative law on academic work, carried out under the auspices of Title IX legislation, diversity and inclusion offices, research misconduct tribunals, and institutional review boards; • the tenuous tie between academic freedom and the law, and what to do about it; • the highly contested arena of extramural speech and social media; and • academic freedom in a contingent academy. Adopting varied epistemological bases to engage their subject matter, the contributors demonstrate perspectives that are, by turn, case study analyses, historical, legal-analytic, formal-empirical, and policy oriented. Traversing such conceptual range, *Challenges to Academic Freedom* demonstrates the imperative of academic freedom to producing outstanding scholarly work amid the concept's entanglements in the twenty-first century. You are an artist. You've mastered your art form, and you're out in the world living the artist's life. But you also want to make a difference in the world as a teaching artist. You know how to pursue excellence in your art form; how can you pursue excellence in teaching artistry? *A Teaching Artist's Companion: How to Define and Develop Your Practice* is a how-to reference for veteran and beginning teaching artists alike. Artist-educator Daniel Levy has been working in classrooms, homeless shelters and correctional facilities for over thirty years. With humor and hard-won insight, Levy and a variety of contributing teaching artists narrate their successes and failures while focusing on the practical mechanics of working within conditions of limited time and resources. Levy organizes teaching artist practice within a framework of View, Design, and Respond. View is everything you value and believe about teaching and learning; Design is what you plan before you go into a classroom; Respond is how you react to and support your students face to face. With the aid of checklists, worksheets, and primary sources, *A Teaching Artist's Companion* invites you to define your own unique view, and guides your observing, critiquing, and shaping your practice over time.

Festlegung der Betreuungsanteile und der Eltern-Kind-Kontakte nach der Trennung der Eltern Welche Betreuungsform dem Kindeswohl im Einzelfall am besten entspricht, ist keine rechtliche Fragestellung. Für die Entscheidungsbehörden stellt daher im Konfliktfall die Bestimmung des umstrittenen Kindeswohls eine besondere Herausforderung dar. Ob beispielsweise eine geteilte Obhut gegen den Willen eines Elternteils dem Kindeswohl entspricht, lassen Entscheidungsbehörden zunehmend von psychologischen Sachverständigen beantworten. Gutachten sind aber nicht nur teuer, sondern auch belastend für alle Beteiligten. Mit diesem Buch

soll ein Beitrag zur Entscheidungsbefähigung von Fachpersonen in entsprechenden Behörden geleistet werden. Diesen Fachleuten eröffnet es die Möglichkeit, sich über die wesentlichen Aspekte, Kriterien und deren Wechselwirkungen zu informieren und diese Aspekte angemessen zu gewichten, um schließlich zu einer Entscheidung zu gelangen. Darüber hinaus richtet sich das Buch an Gutachter*innen und an Psychotherapeut*innen, welche im Rahmen ihrer Tätigkeit mit getrennten Eltern und deren Kindern arbeiten. In die vorliegende zweite, überarbeitete Auflage wurden neue Erkenntnisse und Erfahrungen der praktisch tätigen Autorin seit Erscheinen der ersten Auflage übernommen. So wird u.a. die Elternpersönlichkeit verstärkt gewichtet und die Beurteilung der Qualität eines Gutachtens erweitert diskutiert.

Ever feel swept up in a sea of novelty? When did the new become more important than the true? Andrew Gilchrist found a remedy to today's nausea of novelty in the most familiar elements of narrative and music. He has composed a new arrangement from the ideas of Marshall McLuhan, Northrop Frye, Bernard Lonergan, and Jordan Peterson, weaving together a promising relationship between what we believe and how we live. This book starts a conversation at the crossroads of art, literature, religion, and psychology. And it begins with the oldest of stories. A boy fell in love with a girl and sung her a song. Each chapter in this book charts a series of helpful symbols and sounds, drawing attention to the melodies, rhythms and tempos that make up our most common experiences. The scientific revolution gave birth to a new understanding of the relationship between observer and observed, lover and beloved. That birth has changed the song. However, we have not welcomed this new daughter into the family with a proper name or fully recognized her part in our spiritual development. With her wisdom, we too might find hope and delight in the back and forth journey between tradition and innovation. Could her compelling voice and playful character help us prepare for the greatest roles of our lives?

This volume contains a unique compilation of research and reflections representing multiple vantage points stemming from different parts of the world that can help science educators and teacher educators in finding ways to meaningfully and purposefully embed sustainability into teaching and learning. It is a rich resource for exploring and contextualizing sustainability-oriented science education. At this time we find ourselves in a situation in which the earth's ecological system is under significant strain as a result of human activity. In the developed world people are asking "How can we maintain our current standard of living?" while those in the developing world are asking "How can we increase the quality of our lives?" all while trying to do what is necessary to mitigate the environmental problems. This volume responds to these questions with a focus on educating for sustainability, including historical and philosophical analyses, and pedagogical and practical applications in the context of science teacher preparation. Included are many examples of ways to educate science teachers for sustainability from authors across the globe. This text argues that issues of sustainability are increasingly important to our natural world, built world, national and international economics and of course the political world. The ideas presented in the book provide examples for original, effective and necessary changes for envisioning educating science teachers for sustainability that will inform policy makers.

Spiel und Medien nehmen seit langer Zeit eine bedeutsame Rolle ein, nicht nur für Kinder und Jugendliche. In den letzten Jahren haben digitale Spielwelten auch im Kontext der Bildung zunehmend Bedeutung erlangt. Allerdings kann in ihrer (medien-)pädagogischen Handhabung längst nicht von Standardisierung gesprochen werden. Einen Beitrag zur Standardisierung liefert das Buch anhand der drei Bereiche Theorien, Methoden und Praxis. Dabei werden wichtige Ausgangsperspektiven, innovative Konzepte und Projekte vorgestellt, aktuelle Forschungsthemen skizziert und Tendenzen erörtert. Das Buch verortet die Spiel- und Medienpädagogik innerhalb der Kulturellen Bildung, stellt beteiligte Fachdisziplinen vor und erläutert den Einsatz digitaler Spiele in Bildungskontexten. Damit eignet es sich zum ersten Einstieg ins Thema, bietet Fachkräften in diesem Bereich aber auch weiterführende Anregungen und Vertiefung.

Some of the most important developments in educational thought have been put forward by theorists who have challenged existing notions about the aims of education and its role in society. But how do these ideas relate to today's classrooms and how can you use them to improve your own teaching practice? This textbook gives you a clear overview of fifteen thinkers who have offered challenging perspectives on education, including influential sociological thinkers (Bourdieu, Foucault, Mezirow, Bernstein), those who have questioned the orthodoxy on schooling (Holt, Darling-Hammond) and other key names whose writing has helped shaped our views on teaching and learning. Each chapter includes: · practical examples showing how theories can be used to inform classroom teaching · critiques of each theorist exploring opposing viewpoints and the strengths and weaknesses of different ideas · reflective tasks inviting you to apply what you've read to your own educational experiences. This is essential reading for anyone on university and school-based initial teacher education courses training to teach in different educational settings, including early years and adult education, or studying education at undergraduate and postgraduate level.

Menschen erfahren Bibliotheken als »Ordnung der Bücher«, als angsteinflößende Labyrinth oder aber als eine Art zweites Zuhause. D.h. die Raumstrukturen können subjektiv und kollektiv ganz unterschiedlich ausgelegt werden. Vor dem Hintergrund der Raum- und Architektursoziologie sowie der Informations- und Bibliothekswissenschaften entwickelt Eva-Christina Edinger eine vergleichende Fallstudie, in deren Zentrum Universitätsbibliotheken von Oxford und Konstanz stehen. Mittels Beobachtungen, Fotodokumentationen, Interviews, Mental Maps und Architekturplänen analysiert sie umfassend materielle, soziale, systemische und symbolische Raumstrukturen.

This book introduces a Digital Social System Praxis Framework (DSSPF) integrating Computational Media, Evolutionary Systems Thinking and Design Thinking approaches to E-transformation practice, also called Community Informatics Design (CID). The DSSPF framework is intended to create communication spaces dedicated to knowledge production and sharing for social and organizational change. It allows social systems researchers and practitioners to recognize their synergistic roles in the praxis process to shape their future through social innovation projects. This transdisciplinary text provides potential students and practitioners fundamental concepts and tools for such design. It offers resources from the Pragmatic and Systemic philosophy of science for the co-construction of social architectures and infrastructures, and multi-aspectual design methodologies by which government, organizations and civil society can learn to ethically co-design common ground. This approach provides complementary and common patterns from known methods, models, and theories of social systems interventions that could support a generic framing of large scale sociotechnical systems: digital social innovation ecosystem, living Labs, Fab Labs, enterprise collaborative networks. There will be a particular focus on understanding and addressing the dimensions that make people from different communities of practice able to communicate and collaborate through multiple digital media, design platforms, worldviews and modeling approaches.
