Exploring with Wisconsin Fast Plants

Good Year Books
 Useful for the first three years of Secondary school, this is a three book series. It provides an introduction to the world of Science and is a helpful foundation for CXC separate sciences and CXC single award Integrated Science. Written in clear English, it is suitable for a range of abilities.

Reducing Your School's Carbon Footprint: We Recycle Cans, Trees Recycle Carbon Gr. 5-8 Classroom Complete Press
 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for

many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness

of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts. *Competition Science Vision* VK Global Publications
 Grade level: 1, 2, 3, 4, 5, 6, e, i, p.

Conservation: Waterway Habitat Resources Gr. 5-8 Classroom Complete Press

Despite their name, Wisconsin Fast Plants (members of the cabbage and mustard family) are used by teachers all over the United States -- because they are ideally suited to short semesters, youthful impatience, and small spaces. This spiral-bound lab book demonstrates all aspects of plant growth and development, while teaching scientific investigation. Activities focus on points in the plant's life cycle, variation and inheritance concepts, and environmental factors. A Science Exploration Flowchart in each activity stresses important process skills.

Just the Facts: Life Science, Grades 4 - 6 Classroom Complete Press

The activities in this book reinforce basic concepts in the study of ecology, including the water cycle, dependence on energy from the Sun, photosynthesis, food chains and webs, and biomes. General background information, suggested activities, questions for discussion, and answers are included. Encourage students to keep completed pages in a folder or notebook for further reference and review.

Fun activities, puzzles, and investigations!

Cengage Learning Students will become aware of aquatic ecosystems facing severe change around the globe. Our resource focuses on recognizing how climate change and human activities are affecting their delicate balances. Become an ecologist and list factors in an aquatic ecosystem as biotic or abiotic. Visit an aquatic ecosystem near your home and learn as much as you can through careful observations. Find out why some aquatic organisms have a hard time adapting to climate change. Explore the effects of human activity on aquatic ecosystems. Spend some time at your local aquarium to be a part of the aquatic ecosystem. Get a sense of what's to come as you look at the rate of extinction of marine species. Find out what we can do to restore aquatic dead zones. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, graphic organizers, crossword, word search, comprehension quiz and answer key are also included.

Conservation: Ocean Water Resources: Where Is Earth's Salt Water? Gr. 5-8 Pearson South Africa

Competition Science Vision (monthly

magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India. Well-qualified professionals of Physics, Chemistry, Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to-the-point study material for aspiring candidates. The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.

Conservation: Ocean Water Resources: What Is Salt Water? Gr. 5-8 Kendall Hunt

This is the chapter slice "What Is Salt Water? Gr. 5-8" from the full lesson plan "Conservation: Ocean Water Resources". The oceans contain 97% of the Earth's water, cover 71% of its surface, and hold 50-80% of all life on the planet. Our resource explores the importance of conserving this vast area. Design a board game that illustrates the effects of climate change on Earth's oceans. See how the water cycle explains why most of Earth's salt water is found in the oceans. Find out how climate change will affect ocean currents, resulting in a dramatic change to the farming and fishing industries. Explain how an increase in human population can cause some salt lakes to shrink. Conduct a case study on a container ship that lost several containers in a storm in the north Pacific Ocean. Make your own salt water to represent Earth's oceans and experience what it would be like to visit them. Get tips on what we can do to help protect ocean water. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, graphic organizers, crossword, word search, comprehension quiz and answer key are also included.
