Life for the Flower Power girls is never boring. Milla, still madly in crush with sweet Max, wonders if it's time—dun dun dun!—for the two of them to actually HOLD HANDS. Eeek! Katie-Rose, on the other hand, can't help but wonder when—or if—she will ever be crush-worthy, especially since the only boy to pay her any attention is pesky, annoying Preston, whose favorite pastime is throwing erasers at Katie-Rose's head. Violet, however, has bigger issues than boys on her mind. Her mom is finally scheduled to be discharged from the psychiatric hospital where she's been undergoing treatment, but what if her homecoming doesn't go as planned? Luckily, Yasaman has a foolproof plan for distracting her friends from their worries. The targets: beloved teachers Mr. Emerson and Ms. Perez, who are meant for each other, even if they don't know it. The goal: to bring those lovebirds together at their school's "Kids Night In," a teacher-chaperoned evening of fun,

fabulosity, and possibly even romance . . . Praise for Oopsy Daisy“Milla, Violet, Yaz and Katie-Rose continue to charm; here’s hoping they have more hijinks in store.”–Kirkus Reviews

Publisher description: The Dictionary of Plant Names is a guide that not only cross references common names to their Latin counterparts, but also details the origins, meanings, and pronunciation of each name. Each genus name is followed by the suggested pronunciation, the family in which it is placed, and the derivation of the name (Latin, Greek, or other). Then the main garden use of the plants in the genus, e.g. herbaceous perennials, trees, etc., is listed. Many interesting facts come to light in the origin of the Latin name, for example that *Kalmia* is named after Pehr Kalm, a Finnish student of Linnaeus. Each genus concludes with the common name and place of origin of the whole species, if applicable. Species are listed alphabetically under the genus with the same categories of information.

The Naming of Names traces the search for order in the natural world, a search that for hundreds of years occupied some of the most brilliant minds in Europe, reaching its apex during the renaissance. Anna Pavord takes us on a thrilling adventure into botanical history, travelling from Athens in the third century BC, through Constantinople, Venice, the medical school at Salerno to the universities of Pisa and Padua. The journey, traced here for the first time, involves the culture of Islam, the first expeditions to the Indies and the first settlers in the New World. Gradually, over a long period in Europe, plants assumed identities and acquired names. Artists painted the first pictures of them. Plants acquired the two-part names that show how they are related to other plants. But who began all this work, and how was it done? Sumptuously illustrated in full colour, *The Naming of Names* gives a compelling insight into a world full of intrigue and intensely competitive egos.
