Ghana has always held a position of primacy in the African political and historical imagination, due in no small part to the indelible impression left president Kwame Nkrumah. This study examines the symbolic strategies he used to construct the Ghanaian state through currency, stamps, museums, flags, and other public icons.

Avoiding sensationalism and date-speculating, respected Bible teacher Amir Tsarfati uses his unique perspective as an Israeli Christian to lead you through a fascinating modern-day description of God's plan for the end of the world.

Grounded from start to finish in Scripture, the book reveals how the Rapture, the imminent rise of the Antichrist, and the tragic horrors of the Great Tribulation will play out in our world today. He also helps you understand the roles--and fates--of Russia, Iran, Syria, Turkey, the European

Union, the United States of America, and Israel in the end times, showing just how biblical prophecies are being fulfilled in our time. But above all, he offers hope that in the midst of chaos and horror, God is ultimately in control, and those who belong to him will be safe with him.

From the author: I created this textbook while teaching Software Applications in Business because I could not find a suitable text. I have conducted many iterations of refinement during classroom use. Many years of industry experience together with a 15-year State University of New York tenure have enabled me to design a textbook that will meet the needs of instructors who wish to create a realistic experience which builds a skill set that students can confidently take into the workplace. Students have returned after graduation and told me this was a valuable class and they could immediately utilize the skills they developed during the class in their current jobs. The Seeds of New Earth (the Silent Earth, Book 2) CreateSpace

The Book of Knowledge and Wonder is a memoir about claiming a legacy of wonder from knowledge of a devastating event. In some ways it has the feel of a detective story in which Steven Harvey pieces together the life of his mother, Roberta Reinhardt Harvey, who committed suicide when he was eleven, out of the 406 letters she left behind. Before he read the letters his mother had become little more than her death to him, but while writing her

story he discovered a woman who, despite her vulnerability to depression, had a large capacity for wonder and a love of familiar things, legacies that she passed on to him. The book tackles subjects of recent fascination in American culture: corporate life and sexism in the fifties, mental illness and its influence on families, and art and learning as a consolation for life's woes, but in the end it is the perennial theme of abiding love despite the odds that fuels the tale. As the memoir unfolds, his mother changes and grows, darkens and retreats as she gives up her chance at a career in nursing, struggles with her position as a housewife, harbors paranoid delusions of having contracted syphilis at childbirth, succumbs to a mysterious, psychic link with her melancholic father, and fights back against depression with counseling, medicine, art, and learning. Harvey charts the way, after his mother's death, that he blotted out her memory almost completely in his new family where his mother was rarely talked about, a protective process of letting go that he did not resist and in a way welcomed, but the book grows out of a nagging longing that never went away, a sense of being

haunted that caused the writer to seek out places alone-dribbling a basketball on a lonely court, going on long solitary bicycle rides, walking away from his family to the edge of a mountain overlook, and working daily at his writing desk-where he might feel her presence. In the end, the loss cannot be repaired. Her death, like a camera flash in the dark, blotted out all but a few lingering memories of her in his mind, but the triumph of the book is in the creative collaboration between the dead mother, speaking to her son in letters, and the writer piecing together the story from photographs, snatches of memory, and her words so that he can, for the first time, know her and miss her, not some made up idea of her. The letters do not bring her back-he knows the loss is irrevocable-but as he shaped them into art, the pain, that had been nothing more than a dull throb, changed in character, becoming more diffuse and ardent, like heartache.

There's a sacred and hidden path inside each one of us, a path of mysteries and amazing manifestations, where nothing is impossible, not even our wildest spiritual

creations. This is the realm of impossibilities, where imagination is carried away by a spiritual insight, which is here referred as the phoenix. The allegory inside this book takes us to a subconscious realm, that can lead us to the most uplifting and unknown side of ourselves, but also to other realities as well, namely, the ones that are parallel to ours, and also other dimensions and galaxies. It is with this allegory of the phoenix that we understand the role of the dragons and serpents of our planet, and how they interfere in the Tao of our existence. As a dance of forces, vibrations of different natures, these symbols and concepts take us to the deepest truth within, of who we are and how far can we go. This is a book about the adventures of our soul, the journey within that so many Shamans live to explore. It's also about a path that all spiritualists and gurus have experienced, a path that some have called nirvana, enlightenment or awaking, but few have ever had the ability to fully describe in a way that can be perceived by the common mortal. The Native Americans have often told us about the spirit of the eagle that keeps guard over the spiritual world. This

eagle, or big bird, is representative of another living force, which is the phoenix, the bird of fire. This is why many mystics of ancient times believed that only fire could take souls to another world. The fire purifies the body, but the most potent fire comes from within, as an energy that we burn with our conscious awareness. This is the fire that Buddhists, Taoists and Hindus persist in awakening from within, commonly using disciplines created specifically for this purpose, such as yoga, chikung and meditation. This fire represents the power of our own spirituality, which most people are unaware to possess. As mortals and genetically manipulated slaves of a few alien species, we've lost the physical capability to ignite it. But the phoenix can help us reach it, through the spiritual nature that is within each one of us. The one who can ride the phoenix, can travel very far, to amazing lands. And these are the ones that often come back, when they choose to, as our prophets and religious leaders. This book describes their journey to Valhalla, Heaven, Paradise, or more simply, the Laboratory of God.
