Emerging economies are expected to be in the driver's seat of the global economy in the medium and long term. Large multinational corporations will account for much of this activity. In this textbook, Andrei Panibratov explains how emerging market firms accumulate and exploit market knowledge to develop competitive advantages whilst operating globally. Chapters dedicated to the key emerging economies - Brazil, Russia, India and China (BRIC) - are enhanced by detailed case studies of large firms' activities. The book is divided into four parts, focusing on the following: An outline of the relevant

terminology and the context of the international strategy of emerging market firms, providing an introductory foundation for the whole book. A guide to the evolution of perspectives regarding international strategy, designed to illustrate the changes and trends in the recent academic research on internationalization. A country-by-country illustration of the internationalization of BRIC economies and firms, providing an overall picture of each country's global integration, outward investments, and strategies. The concepts and practices behind the strategies employed by different firms. Written by an established international business scholar, this book is essential reading for students of international strategy who wish to understand the importance of the emerging economies.

The challenges faced by Latin American multinational companies, or multilatinas, often require unique strategies tailored to a demanding global environment. This book studies the strategies of internationalism exercised by large multilatinas, offering the first systematic, quantitative effort to examine the pattern of their international investments within the context of their competitive position in the domestic market. Multilatinas uncovers common strategies among sixty-two multilatinas from six countries, and emphasizes the unique challenges they face, as well as the diversity of their organizational resources. It also brings the institutional environment of Latin American countries to the fore, assessing its role as an essential component in understanding internationalization decisions. Finally, the book studies the role of non-market organizational resources such as

bribes, negotiations and favours in business strategies. Multilatinas is an invaluable read for students, scholars, practitioners and executives studying Latin America's place in international business.

After the breakup of the USSR, it briefly appeared as though Russia's emerging commercial banks might act as engines of growth for a new capitalist economy. However, despite more than a decade of "reforms," Russia's financial system collapsed in 1998. Why had ambitious efforts to decentralize and liberalize the banking industry failed? In *A Fistful of Rubles*, Juliet Johnson offers the first comprehensive look at how Russia's banks, once expected to revitalize the nation's economy, instead became one of the largest obstacles to its recovery. Drawing on interviews with Russian bankers, policymakers, and entrepreneurs, Johnson traces the evolution of the banking system from 1987 through the aftermath of the 1998 crash. She describes how dysfunctional institutional procedures left over from the Soviet period hindered the subsequent development of sound financial practices. Johnson argues that these legacies, along with misguided, Western-inspired liberalization policies, led to the creation of parasitic banks for which success depended on political connections rather than on investment strategies. Johnson demonstrates that banking reform efforts ultimately did more harm than good, because Russian officials and their international advisers failed to build the corresponding economic, legal, and political institutions upon which modern market behavior depends.

This book presents a systematic study of the history, theory and policy of investor citizenship and residence programmes. It explores how states develop new rules of joining their community in response to globalisation and highlights the tension between citizenship policies aimed at migrant integration and those, such as the sale of passports, which create 'long-distance citizens'. Individual chapters offer insights in the historical relationship between citizenship, money and property; discuss arguments that support and counter the practice of the sale of citizenship; and examine the interests and strategies of the different actors—states, companies, individuals—that constitute the 'supply' and 'demand' sides of the burgeoning citizenship industry. The book provides a global overview of the market for investor citizenship as well as a separate policy analysis of the sale of citizenship and residence in the European Union.

A thriving capital market, one that not only brings investment funds into a country but also distributes profits in a transparent manner, is essential for any economy, especially a rapidly developing one such as Saudi Arabia. Already a key player on the world stage, the Kingdom is going through a major planned economic transformation and diversification. In particular, a robust and transparent capital market, with a high level of integrity and sound enforcement, is well on the way to fruition. This book is the first in English to analyse and evaluate the roles of economic planning and a capital market in Saudi Arabia's economic modernization. In the process of examining the level of

transparency and fairness in Saudi Arabia's capital market, the author provides detailed information and analysis of such issues and topics as the following: - market disclosure rules; - insider trading laws; - gaps in enforcement; - dispute resolution; - role of securities agencies; - Saudi Arabia's position in international organizations; and - repercussions of the 2006 Saudi stock market collapse. The author draws on a wide range of sources in both English and Arabic, and concludes with well-grounded proposals for appropriate judicial, administrative, and enforcement policies. Investors, their management and attorneys, and other advisors with an eye on trade development in the Middle East will derive great benefit from the current and detailed information in this book. Lawyers and policymakers will discover all they need to know about the Saudi capital market, its developing trends, and applicable laws.

In any industry, whether manufacturing or service, we have multiple departments, which function day in day out to achieve organizational goals. The functioning of these departments may or may not be interdependent, but at the end of the day they are linked together by one common thread - Accounting & Finance department. The accounting & financial aspects of each and every department are recorded and are reported to various stakeholders. There are two different types of reporting - Financial reporting for various stakeholders & Management Reporting for internal Management of an organization. Both this reporting is important and is an integral part of Accounting & reporting system of an organization. But considering the number of stakeholders involved and statutory & other regulatory requirements, Financial Reporting is a very important and critical task of an organization. It is a vital part of Corporate Governance. It is in this context, a textbook on introduction to the subject of FINANCIAL REPORTING; STATEMENTS AND ANALYSIS is presented to the students of Management program. The book contains the syllabus from basics of the subjects going into the intricacies of the subjects. All the concepts have been explained with relevant practical, numerical examples and diagrams to make it interesting for the readers. An attempt is made here by the experts to assist the students by way of providing case based study material as per the curriculum with non-commercial considerations. Die Circular Economy oder Kreislaufwirtschaft schickt sich an, die größte Veränderung der globalen Wirtschaft seit der industriellen Revolution vor 250 Jahren zu werden. Sie steht für die Abwendung von traditionellen Produktions- und Konsummodellen, entkoppelt Wachstum von der Nutzung natürlicher Ressourcen und verhindert negative Einflüsse auf die Umwelt. Wertschöpfung statt Verschwendung handelt von neuen Strategien, die insbesondere durch die digitale Revolution ermöglicht werden und die nicht nur zum Umweltschutz beitragen, sondern auch zu den Unternehmensgewinnen. Das Buch untersucht fünf neue Geschäftsmodelle, die Wachstum mit Hilfe der Kreislaufwirtschaft unterstützen - vom Einsatz erneuerbarer Ressourcen bis hin zur Sharing Economy. Fallbeispiele konkretisieren jedes Modell und zeigen die Herausforderungen auf, die bei der Umsetzung jeweils entstehen. Es geht dabei nicht allein um die Vermeidung von Mangel - es geht vielmehr um die Schaffung von Überfluss. Überfluss im Sinne einer bestmöglichen Ausnutzung der vorhandenen Ressourcen und Vermögenswerte. Und Überfluss im Sinne von neuen, innovativen Produkten und Dienstleistungen, die Kunden überzeugen

Global Securities Litigation and Enforcement provides a clear and exhaustive description of the national regime for the enforcement of securities legislation in cases of misrepresentation on financial markets. It covers 29 jurisdictions worldwide, some of them are important although their law is not well known. It will be an invaluable resource for academics and students of securities

litigation, as well as for lawyers, policy-makers and regulators. The book also provides a comprehensive contribution debate on whether public or private enforcement is preferable in terms of development of securities markets. It will appeal to those interested in the legal origins theory and in comparative securities law, and shows that the classification of jurisdictions within legal families does not explain the differences in legal regimes. While US securities law often serves as a model for international convergence, some of its elements, such as securities class actions, have not been adopted worldwide.

"In this densely detailed and interpretatively nuanced study, Mahmud Modibbo Tukur lays bare the very foundations of the colonial state in what is now northern Nigeria. This is a must read

for anyone wanting to understand the foundations of contemporary Nigeria and how we came to be what we are." – Prof. Abdul Raufu Mustapha, University of Oxford, UK. Mahmud Modibbo Tukur's work challenges fundamental assumptions and conclusions about European colonialism in Africa, especially British colonialism in northern Nigeria. Whereas others have presented the thesis of a welcome reception of the imposition of British colonialism by the people, the study has found physical resistance and tremendous hostility towards that imposition; and, contrary to the "pacification" and minimal violence argued by some scholars, the study has exposed the violent and bloody nature of that occupation. Rather than the single story of "Indirect rule", or "abolishing slavery" and lifting the burden of precolonial taxation which others have argued, this book has shown that British officials were very much in evidence, imposed numerous and heavier taxes collected with great efficiency and ruthlessness, and ignored the health and welfare of the people in famines and health epidemics which ravaged parts of northern Nigeria during the period. British economic and social policies, such as blocking access to western education for the masses in most parts of northern Nigeria, did not bring about development but its antithesis of retrogression and stagnation during the period under study. Tukur's analysis of official colonial records and sources constitutes a significant contribution to the literature on colonialism in Africa and to understanding the complexity of the Nigerian situation today.
