STOICHIOMETRY AND PROCESS CALCULATIONS - K. V. NARAYANAN ...

Stoichiometry And Process Calculations ByStoichiometric Calculations are Based on Chemical Formulas. Let's learn some terms used in Stoichiometry first. Formula Mass: It is the sum of the atomic weights of the various atoms present in the molecule of the substance. For example, we can calculate the formula

mass of Na_2S as
 $2(23) + 1(32) = 78$;Stoichiometry and Stoichiometric Calculations: Concepts ...The text presents the fundamentals of chemical engineering operations and processes in a simple style that helps the students to gain a thorough understanding of chemical process calculations. The book deals with the principles of stoichiometry to formulate and solve material and energy balance problems in processes with and

without chemical reactions. STOICHIOMETRY AND PROCESS CALCULATIONS - K.V. NARAYANAN ...Stoichiometry and Process Calculations book. Read 8 reviews from the world's largest community for readers. 2009, Prentice-Hall, Inc. Chapter 3
 Stoichiometry: Calculations with Chemical Formulas and Equations John D. Bookstaver St. Charles Community College
 Stoichiometry: Calculations with Chemical Formulas and ...
 The Haber process can be used to produce ammonia (NH_3) from hydrogen gas (H_2) and nitrogen gas (N_2). The balanced equation for this process is shown below.
 $3\text{H}_2 + \text{N}_2 \rightarrow 2\text{NH}_3$
 The molar mass of NH_3 is 17.03 g/mol. The molar mass of H_2 is 2.0158 g/mol. In a particular reaction, 0.575 g of NH_3 forms.
