Short Fictions and Wonders Courier Corporation

"Expert Card Technique" by Jean Hugard and Frederick Braue is a detailed and instructive guide on how to master the manipulation of cards. Jean Hugard, born John Gerard Rodney Boyce in Queensland, Australia in 1872, began his professional career as a magician in 1896 and eventually moved to America in 1915 where he worked in vaudeville and as a stage magician. He retired from performing professionally around 1930 and began a prolific and successful career writing books on magic. As he became older and lost his eyesight, the magician Frederick Braue began co-writing several books with Hugard on the art of card magic. Braue was a journalist and semi-professional magician who specialized in card tricks and was viewed as a master at this skill. In their book "Expert Card Technique", these magical geniuses show even the most novice beginner how to learn to manipulate cards in basic ways and then moves on to teach more advanced flourishes, such as forces, fans, and prearranged decks. This guide is indispensable to anyone who wishes to handle cards

with impressive dexterity and for those studying magic, as these are skills that must be mastered before complicated card tricks can be performed with ease. This edition is printed on premium acid-free paper.

This is the most talked-about book on the Blackjack scene. This book has sold more copies since its initial release than any other gaming book. Prior to this new edition there was no foolproof way to learn how to play Blackjack accurately. This is the only Blackjack book that is easy to understand and completely accurate, written for the beginner or for the expert player.

"Playing Blackjack as a Business" was written by a successful professional Blackjack player. The author has probably spent more time playing Blackjack, more time in the casinos, and more time in research, than have all of the others combined who have written Blackjack books or devised Blackjack systems. The book features a new Basic Strategy for one deck, the first accurate Strategy to be published for four decks, and four easy-to-learn Count Strategies including the Reverse Point Count Strategy, which is the most accurate and most powerful strategy that has

ever been published. The strategies were devised from computer runs by Julian H. Braun of IBM Corporation, long recognized as the world's most capable man in this field.
