Shortlisted for the Financial Times and McKinsey Best Book of the Year Award in 2011 "A masterpiece." —Steven D. Levitt, coauthor of *Freakonomics* "Bursting with insights." —The New York Times Book Review A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future.

Special edition slipcase edition of John Green's *Paper Towns*, with pop-up paper town. From the bestselling author of *The Fault in our Stars*. Quentin Jacobsen has always loved Margo Roth Spiegelman, for Margo (and her adventures) are the stuff of legend at their high school. So when she one day climbs through his window and summons him on an all-night road trip of revenge he cannot help but follow. But the next day Margo doesn't come to school and a week later she is still missing. Q soon learns that there are clues in her disappearance . . . and they are for him. But as he gets deeper into the mystery - culminating in another awesome road trip across America - he becomes less sure of who and what he is looking for. Masterfully written by John Green, this is a thoughtful, insightful and hilarious coming-of-age story.

Liza Palmer will have readers cheering as she explores friendship, true love, and self-acceptance in this "engaging and poignant" (Jennifer Weiner) novel. Everyone seems to be getting on with their lives except Maggie. At twenty-seven, she's still serving coffee at Joe's while her friends are getting married, having babies, and thriving in their careers. And now Olivia, Maggie's best friend since grade school, is getting married too. The man in Maggie's life? Well there isn't one, except the guy she has a crush on, Domenic, who works with her at the coffee shop. Oh, and her dog, Solo (the name says it all). When Olivia comes to town and asks Maggie to be her maid of honor, Maggie is thrilled... but she can't help comparing herself to the new and "improved" Olivia. Way back then, they befriended each other because they both struggled with their weight. Now grown up, Maggie is still shopping in the "women's section" while Olivia went and had gastric-bypass surgery in search of the elusive size 2. But as the wedding nears, Olivia's seemingly perfect life starts to unravel, and Maggie realizes that happiness might not be tied to a number on the scale. In this wonderful novel, Liza Palmer is both witty and wise, giving a voice to women everywhere who have ever wished they could stop obsessing... and start living. "Liza Palmer's voice is fresh, exciting, and necessary. She's a must-read author." -Taylor Jenkins Reid, New York Times bestselling author of *Daisy Jones & the Six* "Kudos to Liza Palmer." -People "Palmer's likable characters and snappy dialogue make this novel stand out from the crowd." -Booklist "In a word: genuine." -Herald Sun

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. \*Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

With contributions from leading brand experts around the world, this valuable resource delineates the case for brands (financial value, social value, etc.) and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet may not even put a value on it, a company's brand or its

portfolio of brands is its most valuable asset. For well-known companies it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not-for-profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every decision and every action. As well as making the case for brands and examining the argument of the anti-globalisation movement that brands are bullies which do harm, this second edition of Brands and Branding provides an expert review of best practice in branding, covering everything from brand positioning to brand protection, visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia, especially in China and India, brands in a digital world and the future for brands. Written by 19 experts in the field, Brands and Branding sets out to provide a better understanding of the role and importance of brands, as well as a wealth of insights into how one builds and sustains a successful brand.

A groundbreaking work of scholarship that sheds critical new light on the urban renewal of Paris under Napoleon III In the mid-nineteenth century, Napoleon III and his prefect, Georges-Eugène Haussmann, adapted Paris to the requirements of industrial capitalism, endowing the old city with elegant boulevards, an enhanced water supply, modern sewers, and public greenery. Esther da Costa Meyer provides a major reassessment of this ambitious project, which resulted in widespread destruction in the historic center, displacing thousands of poor residents and polarizing the urban fabric. Drawing on newspapers, memoirs, and other archival materials, da Costa Meyer explores how people from different social strata—both women and men—experienced the urban reforms implemented by the Second Empire. As hundreds of tenements were destroyed to make way for upscale apartment buildings, thousands of impoverished residents were forced to the periphery, which lacked the services enjoyed by wealthier parts of the city. Challenging the idea of Paris as the capital of modernity, da Costa Meyer shows how the city was the hub of a sprawling colonial empire extending from the Caribbean to Asia, and exposes the underlying violence that enriched it at the expense of overseas territories. This marvelously illustrated book brings to light the contributions of those who actually built and maintained the impressive infrastructure of Paris, and reveals the consequences of colonial practices for the city's cultural, economic, and political life.
