Top 10 things to know about commissioning fire protection ... Standard for Commissioning of Fire Protection and Life Safety Systems Developed in response to a request from the National Institute of Building Sciences (NIBS), NFPA 3 outlines the commissioning process and integrated testing of fire protection and life safety systems, to ensure systems

perform in conformity with the design intent. NFPA 3: Standard for Commissioning of Fire Protection and ... Commissioning is vitally important in fire protection. It establishes a checks and balances system to ensure that your assets are protected and that you get what you pay for. By Jeff Harrington, CEO and Founder of Harrington Group, Inc. Explaining the Importance of Commissioning Fire Protection ... Commissioning applies to the functions of integrated systems, provided for fire protection or life safety, in the design phase, construction phase and occupancy phase of the commissioning process. Owner's Project Requirements (OPR) The OPR should form the basis from which all design, construction, acceptance and operational decisions are made. Commissioning of Fire Protection and Life Safety Systems The construction phase is the most labor-intensive phase for the fire protection engineer involved in the commissioning process. Key elements during this phase include: Review of shop drawings for fire protection systems for conformance with owner requirements Review of ongoing construction for conformance with owner project requirements Commissioning buildings for fire, life safety - Consulting NFPA 3, Recommended Practice for Commissioning of Fire Protection and Life Safety Systems delineates that the commissioning and integrated testing process would include passive components of fire protection. Passive fire protection systems, including fire and smoke rated door assemblies, serve as a primary component for most building life safety systems with varying degrees of complexity dependent as such things as occupancy and building geometry. Commissioning | Aegis Fire Safety Consultants Fire Protection Services Briscoe offers a variety of fire protection services for Property Managers, Building Owners, Facility Managers and Industrial Spaces. Routine maintenance is essential in ensuring the safety of your buildings occupants and your property. Commercial Fire Protection in New York | Briscoe Protective Commissioning of Fire Protection Systems 6 C. The Functional Performance Tests shall include fire protection equipment. 1) Sprinkler System: The fire protection trade representative, with the CA and AHJ present, will demonstrate hydrostatic, operational and main drain testing of the system. These tests shall meet the requirements of NFPA 13 and the AHJ. COMMISSIONING OF FIRE PROTECTION SYSTEMS Fire Alarm Systems, Fire Pumps, and Smoke Control Systems should all be pre-tested by an industry professional before being subject to inspection. Key life safety systems also need proper commissioning, staff training, and documentation for proper turnover to ownership. Let Icarus give you peace of mind.
