The Moon Dwellers

In a desperate attempt to
escape destruction
decades earlier,
humankind was forced
underground, into the
depths of the earth,
creating a new society

called the Tri-Realms. 17-
year-old Adele, a member
of the middle-class moon
dwellers, is unjustly
sentenced to life in prison
deep underground. When
a war breaks out within
the Tri-Realms, Adele
must escape from prison
and seek to uncover her
parents' true past, armed
with only a wicked
roundhouse kick and two
fists that have been well-
trained for combat by her
father.

It is 1919 and Elizabeth
Hughes, the eleven-year-
old daughter of America's
most-distinguished jurist
and politician, Charles
Evans Hughes, has been
diagnosed with juvenile
diabetes. It is essentially a
death sentence. The only
accepted form of
treatment - starvation -
whittles her down to forty-
five pounds skin and
bones. Miles away,
Canadian researchers

Frederick Banting and
Charles Best manage to
identify and purify insulin
from animal pancreases -
a miracle soon marred by
scientific jealousy, intense
business competition and
fistfights. In a race against
time and a ravaging
disease, Elizabeth
becomes one of the first
diabetics to receive
insulin injections - all
while its discoverers and a
little known
pharmaceutical company
struggle to make it
available to the rest of the
world. Relive the
heartwarming true story
of the discovery of insulin
as it's never been told
before. Written with
authentic detail and
suspense, and featuring
walk-ons by William
Howard Taft, Woodrow
Wilson, and Eli Lilly
himself, among many
others.
