The Routledge Handbook
of Arabic Linguistics
introduces readers to the
major facets of research
on Arabic and of the
linguistic situation in the
Arabic-speaking world.
The edited collection
includes chapters from
prominent experts on
various fields of Arabic
linguistics. The

handbook explores
subjects in great depth
and from multiple
perspectives. In addition
to the traditional areas of
Arabic linguistics, the
handbook covers
computational
approaches to Arabic,
Arabic in the diaspora,
neurolinguistic

approaches to Arabic, and
Arabic as a global
language. The Routledge
Handbook of Arabic
Linguistics is a much-
needed resource for
researchers on Arabic and
comparative linguistics,
syntax, morphology,
computational linguistics,
psycholinguistics,
sociolinguistics, and
applied linguistics, and
also for undergraduate
and graduate students
studying Arabic or
linguistics.

IDW presents this special 100-page collection of classic Gold Key Star Trek_comics. Created by writers and artists who had not seen the show often (or at all) and worked off of whatever

publicity materials they could get their hands on, the Gold Key Comics are true 1960s gems. Needless to say, the end results were definitely unusual - and very un-Trek_ in some cases (A blond Scotty! Spock kills! The_Enterprise_belches fire!). Collecting_ "The Planet of No Return," "The Youth Trap," and "The Enterprise Mutiny," this special also features a history of the Star_Trek Gold Key comics by author Joe Berenato. *Dong Xoai* Moonlit Night Publishing

Legendary for what he has done on the page and infamous for what he has said off it, Howard Chaykin ranks among the superstars of modern comics. In *The Art of Howard Chaykin*, go behind the scenes with the creator whose pioneering works include *American Flagg!* and *Black Kiss*, and experience the stories of his life as only he can tell them. Filled with no-holds-barred perspective from his longtime friends and colleagues, and featuring an extensive selection of

artwork from throughout his career, including many never-before-published pieces from Chaykin's own archives, *The Art of Howard Chaykin* takes readers on an in-depth journey from the 1970s to today with one of the medium's great storytellers. [Star Trek Gold Key 100-page Spectacular Action Lab Entertainment Incorporated Design Against Crime](#) will aid the design profession to meet the challenges presented by the competing needs and

complex systems around crime and security. It proposes that designers should use their creative talents to develop innovative solutions to security problems that contribute to the ongoing fight against crime. The authors first explain the design against crime approach to security and security. They go on to provide practical advice on addressing crime and insecurity within the design process and offer practical examples of design being applied to security and safety. They

also examine crime victimisation from a global perspective, highlighting the benefits worldwide of reducing opportunities for crime, including issues of national security, such as terrorism and natural disasters. A design-led, human-centred approach provides a way forward that is both aspirational and practical. The book is aimed primarily at design professionals, educators and students interested in safety and security, from all design disciplines, including product design, architecture, service

design and communication design. The book should also be read by crime prevention experts, planners, local authorities, managers of urban environments and policymakers.

 "The Art of Sean Phillips is a lavish, career-spanning retrospective of the acclaimed artist behind Criminal, Sleeper, Incognito, and Fatale. The book begins with strips assembled with childhood friends in his bedroom, through his work for British girls' comics and 2000AD, becoming one of the key artists in the early years of Vertigo, to superhero work for Marvel, DC, and WildStorm, and finally from his creator-owned series with Ed Brubaker.

Sean has selected the best and most interesting examples of his art, and has been extensively interviewed - along with many of his key collaborators - for the book's in-depth commentary on his work and career."--back cover.

 FUNDAMENTALS AND METHODS OF MACHINE AND DEEP LEARNING The book provides a practical approach by explaining the concepts of machine learning and deep learning algorithms, evaluation of

methodology advances, and algorithm demonstrations with applications. Over the past two decades, the field of machine learning and its subfield deep learning have played a main role in software applications development. Also, in recent research studies, they are regarded as one of the disruptive technologies that will transform our future life, business, and the global economy. The recent explosion of digital data in a wide variety of domains, including science,

engineering, Internet of Things, biomedical, healthcare, and many business sectors, has declared the era of big data, which cannot be analysed by classical statistics but by the more modern, robust machine learning and deep learning techniques. Since machine learning learns from data rather than by programming hard-coded decision rules, an attempt is being made to use machine learning to make computers that are able to solve problems like human experts in the

field. The goal of this book is to present a practical approach by explaining the concepts of machine learning and deep learning algorithms with applications. Supervised machine learning algorithms, ensemble machine learning algorithms, feature selection, deep learning techniques, and their applications are discussed. Also included in the eighteen chapters is unique information which provides a clear understanding of concepts by using

algorithms and case studies illustrated with applications of machine learning and deep learning in different domains, including disease prediction, software defect prediction, online television analysis, medical image processing, etc. Each of the chapters briefly described below provides both a chosen approach and its implementation. Audience Researchers and engineers in artificial intelligence, computer scientists as well as

software developers.

#5 F. Paul Wilson's Repairman Jack: Scar-Lip Redux - SGND LMT ED HC In a contemporary setting of increasing social division and marginalisation, Policing Hate Crime interrogates the complexities of prejudice motivated crime and effective policing practices. Hate crime has

become a barometer for contemporary police relations with vulnerable and marginalised communities. But how do police effectively lead conversations with such communities about problems arising from prejudice? Contemporary police are expected to be active agents in the pursuit of social justice and human rights by stamping out prejudice and group-based animosity. At the same time, police have been criticised in over-policing targeted communities as

potential perpetrators, as well as under-policing these same communities as victims of crime. Despite this history, the demand for impartial law enforcement requires police to change their engagement with targeted communities and kindle trust as priorities in strengthening their response to hate crime. Drawing upon a research partnership between police and academics, this book entwines current law enforcement responses with key debates on the meaning of hate crime to

explore the potential for misunderstandings of hate crime between police and communities, and illuminates ways to overcome communication difficulties. This book will be important reading for students taking courses in hate crime, as well as victimology, policing, and crime and community.

She's hot as hell in bed and smart enough out of it to realize their affair will end with the season. Bliss isn't looking for a commitment, especially not from an intense, driven man used to control. Her ex's need for control had nearly made her his emotional slave and she's sworn she'll never give another

Riley Hatch is a fas-talking minor-league hockey player with a reputation as a grinder. He goes in deep, hits hard and comes out with the puck. And absolutely irresistible. Riley falls hard and fast but he knows he's going to need more than determination to break down Aly's reservations. But will his lifelong dream of making it to the NHL cost him the woman of his dreams? The Enforcer He's used to making an impression, not always a good one...

Coming into a team in the middle of the season is never easy but veteran hockey player Will MacDonald is a tough guy. He's not afraid to drop his gloves in defense of his teammates and he's never met a woman who's made his heart pound as hard as a good fight. Until he has a chance collision with a curvy brunette. Jess Gardiner has been around hockey all her life. Her dad, an NHL scout, taught her everything he knows about the game and she believes Will is just what the young

His Redtails teammates love him...when they don't want to gag him. From the moment he sees Sophie, Derek discovers what it's like to be struck dumb.

For two seconds. Then he does what he does best. He charms his way into her bed. But can he charm his way into her life? Sophie Tsoukalos is well acquainted with chaos. for more than she's prepared to give, will Sophie give him heart? Or let him slip through her fingers?
