Indian ethics is one of the

The Twentieth Century:
Traditions in a Global
Context Springer
Recent trends and events
worldwide have increased

public interest in
nonviolence, pacifism,
and peace psychology as
well as professional
interest across the social
sciences. Nonviolence and
Peace Psychology
assembles multiple
perspectives to create a
more comprehensive and
nuanced understanding of
the concepts and

phenomena of nonviolence than is usually seen on the subject. Through this diverse literature—spanning psychology, political science, religious studies, anthropology, and sociology—peace psychologist Dan Mayton gives readers the opportunity to view nonviolence as a body of principles, a system of pragmatics, and a strategy for social change. This important volume: Draws critical distinctions between nonviolence,

pacifism, and related concepts. Classifies nonviolence in terms of its scope (intrapersonal, interpersonal, societal, global) and pacifism according to political and situational dimensions. Applies standard psychological concepts such as beliefs, motives, dispositions, and values to define nonviolent actions and behaviors. Brings sociohistorical and cross-cultural context to peace psychology. Analyzes a century's worth of nonviolent social action, from the pathbreaking

work of Gandhi and King to the Courage to Refuse movement within the Israeli armed forces. Reviews methodological and measurement issues in nonviolence research, and suggests areas for future study. Although more attention is traditionally devoted to violence and aggression within the social sciences, *Nonviolence and Peace Psychology* reveals a robust knowledge base and a framework for peacebuilding work, granting peace psychologists, activists,

and mediators new possibilities for the transformative power of nonviolence.

Peace on Earth: The Role of Religion in Peace and Conflict Studies provides a critical analysis of faith and religious institutions in peacebuilding practice and pedagogy. The work captures the synergistic relationships among faith traditions and how multiple approaches to conflict transformation and peacebuilding result

in a creative process that has the potential to achieve a more detailed view of peace on earth, containing breadth as well as depth. Library and bookstore shelves are filled with critiques of the negative impacts of religion in conflict scenarios. Peace on Earth: The Role of Religion in Peace and Conflict Studies offers an alternate view that suggests religious organizations play a more complex role in conflict than a simply negative one. Faith-based organizations, and their

workers, are often found on the frontlines of conflict throughout the world, conducting conflict management and resolution activities as well as advancing peacebuilding initiatives. *The Oxford History of Protestant Dissenting Traditions, Volume IV* Bloomsbury Publishing Critical Issues in Peace and Conflict Studies: Theory, Practice, and Pedagogy, edited by Thomas Maty-k, Jessica Senehi, and Sean Byrne, discusses critical issues in the emerging field of

Peace and Conflict Studies, and suggests a framework for the future development of the field and the education of its practitioners and academics. Contributors to the book are recognized scholars and practitioners in their respective fields. The authors take an holistic approach to the study, analysis, and resolution of conflict at the micro, meso, macro, and mega levels.

ABC-CLIO

The book comes at a very critical moment in the debate on civilization and responds to the lack of

scholarly attention by international relations and political theorists as to how the discourse of dialogue of cultures, religions, and civilizations can contribute to the future of world order.

The Other Politics of Cultures, Religions, and Civilizations in International Relations
University Press of America

This volume explores how religious leaders can contribute to cultures of peace around the world. The essays are written by leading and emerging

scholars and practitioners who have lived, taught, or worked in the areas of conflict about which they write. Connecting the theory and practice of religious peacebuilding to illuminate key challenges facing interreligious dialogue and interreligious peace work, the volume is explicitly interreligious, intercultural, and global in perspective. The chapters approach religion and peace from the vantage point of security studies, sociology, ethics, ecology, theology, and philosophy.

A foreword by David Smock, the Vice President of Governance, Law and Society and Director of the Religion and Peacebuilding Center at the United States Institute of Peace, outlines the current state of the field. *The Courage to Dream* Lexington Books This book introduces a new "multilateral" methodology for the contemporary study of theology. It bases this methodology on the idea that there are too many materials contributing as sources for theologizing to

sustain the "one method fits all" approach found in many systematic theologies within Christianity. What is needed instead is something that reflects the various and varied natures, purposes, and tasks of theologians' theologizing for their respective contexts. Engaging materials from a range of Christian traditions, including Evangelicalism, the Catholic Magisterium, and a limited range of pan-Orthodox resources, the book analyzes and

assesses major factors that have shaped different streams of theology. Addressing doctrinal development, scripture and revelation, historical tradition and creeds, philosophy and truth, sciences and interdisciplinarity, experience, religious pluralism, and culture, it demonstrates how these various streams can form a multilateral whole. The book concludes by examining the centers and peripherals of methodologies in theologization for a

spectrum of theological traditions/streams, both across and beyond Christianity. By offering an approach that keeps in step with the increasingly interconnected and pluralistic world in which we live, this book provides a vital resource for any scholar of Christian theology, constructive theology, contextual theologies, and systematic theology, as well as religious studies. *The Role of Religion in Peace and Conflict Studies* Springer
Thirty years ago, Hu

Shih's views of Chinese society and history were representative of Sinology in general: China itself had no native religion, just local customs; its only real religion was an import, Buddhism. These views have now been completely overturned, with massive implications for our understanding not only of China but also of humanity as a whole: it is no longer possible to imagine that at least one major traditional society constructed and construed itself without reference to a non-

mundane world that permeated every facet of society, and it therefore becomes indispensable for students of China to take the history of Chinese religion into account and for students of religion to take into account the Chinese experience of and Chinese categories for dealing with religious phenomena. The present volumes contain a selection of twenty-one essays presented in a conference convened jointly by the Ecole française d'Extrême-Orient and the

Centre for the Study of Religion and Chinese Society of the Chinese University of Hong Kong, on "Religion and Chinese Society: The Transformation of a Field and Its Implications for the Study of Chinese Culture" held on May 29-June 2, 2000. The collection aims at providing as wide a coverage as possible of recent research in the history of Chinese religion and seeks to draw some tentative conclusions about the implications for the study of Chinese

religion and society in general.

Humanitarian Reader provides a better understanding—both within and outside academia—of the multifaceted demands posed by humanitarian assistance programs. The Reader is a compilation of the most important chapters in the twelve-volume International Humanitarian Affairs book series published by Fordham University Press. Each selected chapter has been edited and updated. In addition, the series editor, Kevin M. Cahill, M.D., has written, among

other chapters, an introductory essay explaining the academic evolution of the discipline of humanitarian assistance. It focuses on the “Fordham Experience”: its Institute of International Humanitarian Affairs (IIHA) has developed practical programs for training fieldworkers, especially those dealing with complex emergencies following conflicts and man-made or natural disasters. *Religions and Nonviolence: The Rise of*

Is there a controversial issue in the contemporary world that does not involve religion? Whether it's a debate over the beginning of life, or on sexuality and family life, or on the stewardship of humans over the environment, almost all of the most contentious matters that impact today's society involve people's deeply held religious beliefs. *Battleground: Religion* helps clarify these

complex topics by examining how various religious beliefs and practices impact current political, social, and cultural debates. Each of the approximately 100 entries examines a hot-button issue—from war and peace to the culture wars—and discusses, in a balanced and objective way, the points of view on these topics from all parts of the religious spectrum. Students will come away from *Battleground: Religion* with a better understanding of the issues that they will be

encountering for years to come. Each entry includes a bibliography or resources for further information.

Pentecost, Christian Practices, and the Neighbor Rowman & Littlefield

Acknowledging that religion can motivate both violence and compassion, this book looks at how a variety of world religions can and do build peace. In the wake of September 11, 2001 religion is often seen as the motivating force behind terrorism and other acts of violence.

Religion and Peacebuilding looks beyond headlines concerning violence perpetrated in the name of religion to examine how world religions have also inspired social welfare and peacemaking activism. Leading scholars from the Aboriginal, Hindu, Buddhist, Confucian, Jewish, Muslim, and Christian traditions provide detailed analyses of the spiritual resources for fostering peace within their respective religions. The contributors discuss the formidable obstacles

to nonviolent conflict transformation found within sacred texts and living traditions. Case studies of Northern Ireland, Bosnia, Cambodia, and South Africa are also examined as practical applications of spiritual resources for peace. [Islamic Narratives on War and Peace in Palestinian Territories](#) Saint Mary's Press From Gandhi's movement to win Indian independence to the Arab Spring uprisings of 2011, an expanding number of

citizens have used nonviolent action to win political goals. While such events have captured the public imagination, they have also generated a new surge of scholarly interest in the field of nonviolence and civil resistance studies. Although researchers have produced new empirical data, theories, and insights into the phenomenon of nonviolent struggle, the field is still quite unfamiliar to many students and scholars. In *Nonviolent Struggle:*

Theories, Strategies, and Dynamics, sociologist Sharon Nepstad provides a succinct introduction to the field of civil resistance studies, detailing its genesis, key concepts and debates, and a summary of empirical findings. Nepstad depicts the strategies and dynamics at play in nonviolent struggles, and analyzes the factors that shape the trajectory and outcome of civil resistance movements. The book draws on a vast array of historical examples, including the U.S. civil

rights movement, the Indonesian uprising against President Suharto, the French Huguenot resistance during World War II, and Cesar Chavez's United Farm Workers. Nepstad describes both principled and pragmatic nonviolent traditions and explains various categories of nonviolent action, concluding with an assessment of areas for future research. A comprehensive treatment of the philosophy and strategy of nonviolent resistance, Nonviolent

Struggle is essential reading for students, scholars, and anyone with a general interest in peace studies and social change.

Battleground: Religion [2 volumes] Univ of California Press

This volume provides a

comprehensive and interdisciplinary account of the scholarship on religion, conflict, and peacebuilding. Looking far beyond the traditional parameters of the field, the contributors engage deeply with the legacies of colonialism, missionary activism, secularism, orientalism, and liberalism as they relate to the discussion of religion, violence, and nonviolent transformation and resistance. Featuring numerous case studies from various contexts and traditions, the volume is

organized thematically into five different parts. It begins with an up-to-date mapping of scholarship on religion and violence, and religion and peace. The second part explores the challenges related to developing secularist theories on peace and nationalism, broadening the discussion of violence to include an analysis of cultural and structural forms. In the third section, the chapters explore controversial topics such as religion and development, religious militancy, and the

freedom of religion as a keystone of peacebuilding. The fourth part locates notions of peacebuilding in spiritual practice by focusing on constructive resources within various traditions, the transformative role of rituals, youth and interfaith activism in American university campuses, religion and solidarity activism, scriptural reasoning as a peacebuilding practice, and an extended reflection on the history and legacy of missionary peacebuilding. The

volume concludes by looking to the future of peacebuilding scholarship and the possibilities for new growth and progress. Bringing together a diverse array of scholars, this innovative handbook grapples with the tension between theory and practice, cultural theory, and the legacy of the liberal peace paradigm, offering provocative, elastic, and context-specific insights for strategic peacebuilding processes.
