Covering the often frustrating process of researching and securing a law firm job and how to succeed once a job is secured, this is a mentoring guide for new lawyers at the beginning stages of their careers. It embodies a collective wisdom about the things lawyers wished they knew at the beginning of their careers, rather than the end. Subjects covered include traditional and

creative job hunting, writing resumes and cover letters, first and second interviews, and developing relationships with firms as a summer associate. Using real-life examples, this reference also focuses on the ultimate goal of being a satisfied and fulfilled lawyer and discusses many of the daily workplace issues that new lawyers are often afraid to talk about -- handling firm partners and assignments, courtroom etiquette, organisational tools, and dating within the firm.

Many reasons underscore the importance of arms control in South Asia, but two factors stand out critical and compelling. South Asia is a crisis- and war-prone region and a probable nuclear flash point. To reduce the likelihood of war and forestall nuclear use, arms control between India and Pakistan is critically important. India and Pakistan confront severe human security challenges, and they have not made significant progress in human development; yet, the two countries allocate more resources to defense than to other pressing social sector needs. India and Pakistan need to stop their potentially ruinous competitive arms build-ups and divert those funds to sectors that contribute to human development and strengthen human security. For this, they need to pursue arms control. Finally, at the global level, India is only likely to play a more positive role if it can be convinced that nuclear arms control reinforces its security interests and accepts that it need not weaponize its nuclear capability. China, as India's largest neighbour and a nuclear weapon state, can contribute on both scores. Still, India's choice between the alternatives of nuclear arms control and nuclear armament will not ultimately be the result of a threat from China, or even of relations with Pakistan, but of considerations of international power and influence. This book provides deep insight to various dimensions of issues relating to development of this subject.
