details how firms enter,
compete and grow in
foreign markets. Jain

moves away from the
traditional focus on
developed countries and
their multinational
enterprises, instead
focusing on both
developed and emerging
economies, as well as
their interaction in an
increasingly connected
world. As the current
global business
environment is
increasingly shaped—and
connected—by faster

technological
developments,
geopolitical forces,
emerging economies, and
new multinationals from
those economies, this
highly charged dynamic
provides rich opportunity
to revisit mainstream
paradigms in
globalization, innovation,
and global strategy. The
book rises to the
challenge, exploring new
competitive phenomena,

new business models, and new strategies. Rich illustrations, real-world examples, and case data, provide students and executives with the insights necessary to connect, compete, and grow in a globalized business environment. This bold book succinctly covers strategy models and implementation for a range of global players, providing students of strategy and international business with a rich understanding of the contemporary business environment. This volume brings together researchers

whose analysis and insights provide a comprehensive and up-to-date account of Singapore's rich linguistic diversity. Applying a combination of descriptive, empirical, and theoretical approaches, the authors investigate not only official languages such as English, Mandarin, Malay, and Tamil, but also minority languages such as the Chinese vernaculars and South Asian and Austronesian languages. The chapters in this volume trace the historical development,

contemporary status, and functions of these languages, as well as potential scenarios for the future. Exploring the tension between language policies and linguistic realities in Singapore, the contributions in this volume capture the shifting educational, political, and societal priorities of the community through its past and contemporary present.

The universal practice of selecting and excerpting, summarizing and canonizing, arranging and organizing texts and visual signs, either in carefully dedicated types of manuscripts or not, is common to all manuscript cultures. Determined by intellectual or practical needs, this process is never neutral in itself. The resulting proximity and juxtaposition of previously distant contents,

challenge previous knowledge and trigger further developments.

With a vast selection of highly representative case studies – from India, Islamic Asia and Spain to Ethiopian cultures, from Ancient Christian to Coptic, and Medieval European domains – this volume deals with manuscripts planned or growing and resulting in time to comprise ‘more than one’. Whatever their contents – the natural world and related recipes, astronomical tables or personal notes,

documentary, religious and even highly revered holy texts – codicological and textual features of these manuscripts reveal how similar needs received different answers in varying contexts and times.
