"This book is based upon the belief that the movements of prices on the exchanges are dependent

to a very large degree on the mental attitude of the investing and trading public ... [and] is intended chiefly as a practical help to that considerable part of the community which is interested, directly or indirectly, in the markets.--p. [3]

Livermore started trading in securities when he was fourteen years old. He made his first thousand when a mere boy. He has practiced every device known to the active speculator, studied every speculative theory, and dealt in about every active security listed on the New York Stock Exchange. He has piled up gigantic fortunes from his commitments, lost them, digested, started all over again—and piled up new fortunes. He has changed his market position in the twinkling of an eye—sold out thousands of shares of long stock, and gone short of thousands of shares more on a decision which required reading only the one word, “but,” in a lengthy ticker statement. If his later experiences were not enough to catch the public fancy, Livermore would have won it by his greatest feat of all: beating the bucket shops. Beating the cheaters, in fact, was Livermore’s pet plan after things had gone against him and he was forced to start anew on a small-lot basis.

Do you ever think the stories you hear about great trading, and the gains produced, sound like luck? Do you ever wonder if there is a real method and philosophy behind the success stories? The concepts condensed into Trend Commandments were gleaned from Michael Covel's 15 years of pulling back the curtain on great trend following traders. It is a one of a kind money making experience that forever lays to rest the notion that successful trading is akin to winning the lottery. Winning has a formula, as does losing. Michael Covel nails both head on. Getting rich is a fight; make no mistake about it, but at least now with Trend Commandments you have a primer that allows you to crack the code of the winners.

Nicolas Darvas, author of the phenomenal best-seller, How I Made \$2,000,000 In The Stock Market, has devised a breakthrough system for charting the stock market. Called the DAR-CARD, it is easy to use and has the all-important ingredient that existing systems lack: DAR-CARD needs no interpretation. The philosopher's stone of the stock market, DAR-CARD converts data into profits. It eliminates confusing fluctuations and indicates the trend and the buy and sell points—the factors that matter if you want to make money. DAR-CARD is a compact, visual representation of Nicolas Darvas's system; a simple device to be carried in the pocket, to be checked against each day's closing prices. No bigger than a postcard, DAR-CARD contains its own built-in instructions and all the information necessary to make a decision on whether to buy, sell or hold. In addition to providing this unique tool for dealing with the stock market, Darvas offers straightforward advice on: when to buy; what shall I watch for; five ways to create favorable odds; how to detect a must sale; how long to hold a stock; pitfalls of switching; what to look for before taking action.

How I Made 2,00,000 In The Stock Market Nicholas Darvas, author of How I Made 2,000,000 in the Stock Market, concluded that Wall Street was nothing more than a huge gambling casino. It bristled with dealers, croupiers and touts—and he explained all of this in a later highly successful book, Wall Street: The Other Las Vegas. How I Made 2,000,000 in the Stock Market is an extraordinary book. It tells one of the most unusual success stories in the history of the stock market. Darvas was not a stock market professional trading on inside information. He was one half of the highest paid dance team in show business. Yet he was able to make himself a millionaire several times over by his unique investment approach. Unlike other so-called systems, it worked regardless of whether the market rose or fell. When news of Darvas' fantastic profits and methods leaked out, he was featured in Time Magazine. He then was persuaded to write a book which became an instant hit, selling nearly 200,00 copies in eight weeks. Many of the companies talked about in this book no longer exist. Many of the stocks are no longer traded. Nevertheless, the basic principles are as sound as ever.
