Processing - PCM 2017*  
Cheng & Tsui

The volume includes a set of selected papers extended and revised from the International Conference on Teaching and Computational Science (WTCS 2009) held on December 19- 20, 2009, Shenzhen, China. WTCS 2009 best papers Volume 2 is to provide a forum for

researchers, educators, engineers, and government officials involved in the general areas of Education, Psychology and Computer Science to disseminate their latest research results and exchange views on the future research directions of these fields. 128 high-quality papers are included in the volume. Each paper has been peer-reviewed by at least 2 program committee members and selected by the volume editor Prof. Wu. On behalf of

the WTCS 2009, we would like to express our sincere appreciation to all of authors and referees for their efforts reviewing the papers. Hoping you can find lots of profound research ideas and results on the related fields of Education, Psychology and Computer Science.

Encyclopedia Springer  
The three-volume set LNCS 101164, 11165, and 11166 constitutes the refereed proceedings of the 19th Pacific-Rim Conference on Multimedia, PCM 2018, held in Hefei, China, in September 2018. The 209 regular papers presented together with 20 special session papers were carefully reviewed and selected from 452 submissions.

The papers cover topics such as: multimedia content analysis; multimedia signal processing and communications; and multimedia applications and services.

#### **Books Out Loud**

Cambridge University Press

Shakespeare in China is an attempt to explore systematically and deeply the nature and significance of the interaction between Shakespeare and traditional Chinese drama and between the dramatist and Chinese culture. Ever since Shakespeare was introduced into China at the beginning of this century, his works have exerted a pervasive influence upon Chinese theater and culture. During this process of

transplantation into Chinese culture, the dramatist's works have also undergone some transformation, with the plays interpreted and reshaped by the Chinese from the perspective of their own culture and tradition. The value of the book is not limited to the scope of Shakespeare studies and comparative literature. With the combination of the literary criticism and sociological approach, it describes and investigates a variety of social and psychological phenomena in the process of cultural exchange between the West and the East. The book also provides a brief view of the social, political, and historical changes in modern China for Western

readers.

**China** Hong Kong University Press  
The two-volume set LNCS 10735 and 10736 constitutes the thoroughly refereed proceedings of the 18th Pacific-Rim Conference on Multimedia, PCM 2017, held in Harbin, China, in September 2017. The 184 full papers presented were carefully reviewed and selected from 264 submissions. The papers are organized in topical sections on: Best Paper Candidate; Video Coding; Image Super-resolution, Deblurring, and Dehazing; Person Identity and Emotion; Tracking and Action Recognition; Detection and Classification; Multimedia Signal Reconstruction and Recovery; Text and

Line  
 Detection/Recognition;  
 Social Media; 3D and

 Proceedings University  
 of Hawaii Press

This two-volume set  
 LNCS 10305 and LNCS  
 10306 constitutes the  
 refereed proceedings  
 of the 14th  
 International Work-  
 Conference on Artificial  
 Neural Networks,

IWANN 2017, held in Cadiz, Spain, in June 2017. The 126 revised full papers presented in this double volume were carefully reviewed and selected from 199 submissions. The papers are organized in topical sections on Bio-inspired Computing; E-Health and Computational Biology; Human Computer Interaction; Image and Signal Processing; Mathematics for Neural Networks; Self-organizing Networks; Spiking Neurons; Artificial Neural Networks in Industry ANNI'17; Computational Intelligence Tools and Techniques for Biomedical Applications; Assistive Rehabilitation Technology; Computational

Intelligence Methods for Time Series; Machine Learning Applied to Vision and Robotics; Human Activity Recognition for Health and Well-Being Applications; Software Testing and Intelligent Systems; Real World Applications of BCI Systems; Machine Learning in Imbalanced Domains; Surveillance and Rescue Systems and Algorithms for Unmanned Aerial Vehicles; End-User Development for Social Robotics; Artificial Intelligence and Games; and Supervised, Non-Supervised, Reinforcement and Statistical Algorithms. *Advanced Concepts for Intelligent Vision Systems* Princeton University Press This book constitutes the proceedings of the

13th Pacific Rim Conference on Multimedia, held in Singapore during December 4-6, 2012. The 59 revised full papers presented were carefully reviewed and selected from 106 submissions for the main conference and are accompanied by 23 presentations of 4 special sessions. The papers are organized in topical sections on multimedia content analysis, image and video processing, video coding and multimedia information processing, image/video processing and analysis, video coding and multimedia system, advanced image and video coding, cross media learning with structural priors, as well as efficient multimedia analysis and utilization.

Pictures and Visuality in Early Modern China  
World Scientific  
Comprehensive and current, this lexicon is the first specifically designed to serve the needs of English speakers doing business in and with China and other Mandarin-speaking areas.

**10th International Workshop, IWDW 2011, Atlantic City, NJ, USA, October 23-26, 2011, Revised Selected Papers**

Routledge

This is one of two volumes by the same editors that explore historical, philosophical, and cultural perspectives on literacy in China. This volume focuses on Chinese literacy, while the other volume is on English literacy. Since the founding of the

People's Republic of China, the country has witnessed a dramatic increase in its literacy rate, but not without challenges. The essays in this volume provide a comprehensive, cross-disciplinary look at changes in Chinese literacy education from ancient times to the modern day. Together, the essays address a wide array of topics, including early Chinese literacy development, children's literature, foreign translated literature, and uses of information technology to teach Chinese. This authoritative text brings clarity and precision to the field and serves as a vital core resource for those who want to expand their understanding of Chinese literacy education. Its scope is unmatched even in

academic literature in the Chinese language. *Open for Business: pt. 1. Textbook* Routledge  
The prosperity of China's people has advanced very much in recent decades. However, in many respects China is still a developing country, and this is especially true of rural areas where economic progress has not been as marked as in urban areas and where many people still live in relative poverty. The Chinese government recognizes that more hard work is needed in order to improve prosperity in the countryside. This book provides a systematic and comprehensive analysis of the situation in China's rural areas, assesses the effectiveness or otherwise of current

policies, and puts forward proposals for further development. Subjects covered include the changing population profile of rural areas, land ownership, agricultural improvements, and local self-government.

Advanced Chinese

Multimedia Course:

Crossing Cultural

Boundaries is an

innovative multimedia

course for advanced

students of Chinese.

Written by a team of

highly experienced

instructors, the book

offers advanced

learners the

opportunity to

consolidate their knowledge of Chinese through a wide range of activities designed to build up both excellent language skills and cultural literacy. Divided into four thematic units covering popular culture, social change, cultural traditions, and politics and history, with each unit presenting three individual lessons, the volume provides students with a structured course which efficiently supports the transition from an intermediate to an advanced level. The many different texts featured throughout the lessons present interesting and accurate information about contemporary China and introduce students to useful vocabulary, speech

patterns, and idiosyncratic language usage. Key features include Lively and detailed discussions of grammatical points and sentence patterns Engaging exercises for developing grammatical concepts and insight into the character writing system Systematic review of earlier material to ensure consolidation of learning Coverage of diverse and culturally relevant topics such as online dating, changing views of marriage, food culture, Confucianism and democracy in China. Extensive cultural and historical notes providing background to the subjects presented Complementary CDs to enhance listening skills. Free companion website

(<http://duke.edu/web/chinesesoc/>) offering a wealth of video content forming the basis of many of the listening activities linked to topics within the book. Extensively revised and updated throughout, this new edition includes new material and activities on synonyms and substantial improvements to the "composition", "Focus on characters" and "Language practicum" sections. The improved Instructor's Resource Manual, which includes activity tips, additional exercises, answer keys and the traditional character texts, is available at <http://www.routledge.com/books/details/9780415841337/> 清华大学 Springer In the midst of China's wild rush to modernize,

a surprising note of reality arises: Shanghai, it seems, was once modern indeed, a pulsing center of commerce and art in the heart of the twentieth century. This book immerses us in the golden age of Shanghai urban culture, a modernity at once intrinsically Chinese and profoundly anomalous, blending new and indigenous ideas with those flooding into this treaty port from the Western world. A preeminent specialist in Chinese studies, Leo Ou-fan Lee gives us a rare wide-angle view of Shanghai culture in the making. He shows us the architecture and urban spaces in which the new commercial culture flourished, then guides us through the publishing and

filmmaking industries that nurtured a whole generation of artists and established a bold new style in urban life known as modeng. In the work of six writers of the time, particularly Shi Zhecun, Mu Shiying, and Eileen Chang, Lee discloses the reflection of Shanghai's urban landscape—foreign and familiar, oppressive and seductive, traditional and innovative. This work acquires a broader historical and cosmopolitan context with a look at the cultural links between Shanghai and Hong Kong, a virtual genealogy of Chinese modernity from the 1930s to the present day.

*living and learning in China : an intermediate Chinese course* Naval

Inst Press  
Examines the rise of Chinese companies in international markets. This book provides an overview of the strategies of Chinese multinationals in terms of international marketing and branding, M&As and international joint ventures, management of technology, organization and human resource management.

□An Advanced Chinese Multimedia Course  
Making full use of significant new sources in Chinese-language materials, U.S. Naval Academy professor Maochun Yu provides Western readers with the first detailed account of military and intelligence operations conducted inside China by foreign powers

between 1937 and 1945. He also addresses the profound impact of these operations upon China's nationalism, wartime politics, and overall military campaigns. Arguing that operations by the USSR, the United States, Britain, and France, in particular, challenged the authority and legitimacy of the Chinese nationalist government, he illustrates how the failure of the Nationalist Government under Chiang Kai-shek to control these operations contributed to its demise following World War II. This provocative work unveils like never before the extraordinary intrigue, command and

operational manipulations, international espionage, and politics surrounding military and intelligence operations in wartime China among the allies. It covers such topics as foreign military aid programs to China; the Chinese secret police's massive joint intelligence organization with the U.S. Navy; special intelligence initiatives conducted by the British, Free French, and Americans; secret British and American dealings with the Chinese Communists; America's first covert overseas military operation (the Flying Tigers); and Soviet and American military personnel in the China theater. The author points to the remarkable political

and military ramifications that these operations had in China, including the inadvertent creation of conditions that allowed the rise of Communist China. With its implications on the world scene today, such an important new perspective of China during its war against Japan will appeal to a general audience as well as to students of World War II and specialists in the military and intelligence communities.

Suitable for students

with three or more years of modern Chinese language instruction, Anything Goes uses advanced materials to reinforce language skills and increase understanding of contemporary China in one semester. This fully revised edition provides learners with a deeper fluency in high-level Chinese vocabulary and grammar, and includes newspaper articles and critiques as well as other primary source documents, such as political speeches and legal documents. The textbook covers topics that are essential to understanding contemporary Chinese society, including changing attitudes toward women and marriage, the one-child policy, economic development, China's

ethnic minorities, and debates surrounding Taiwan and Hong Kong. The lessons intentionally investigate thought-provoking and sometimes controversial issues in order to spark lively classroom discussions. This new edition incorporates suggestions and improvements from years of student and teacher feedback. With an improved, more user-friendly format, Anything Goes juxtaposes text and vocabulary on adjacent pages. Grammar explanations and exercises have also been thoroughly updated. Advanced-level Chinese language textbook Includes newspaper articles and primary source documents Thought-

provoking topics on contemporary Chinese society Updated grammar explanations and exercises New user-friendly format

**China on Screen** UCL Press

In East Asian economies such as China, recent mass rural-urban migration has created a new urban underclass, as have their children. However, their inclusion in urban public schools is a surprisingly slow process, and youth identities in newly industrialized countries remain largely neglected. Faced with monetary and institutional barriers, the majority of migrant youth attend low-quality or underperforming migrant schools, without access to the

free compulsory education enjoyed by their urban counterparts. As a result, China's citizen-building scheme and the sustainability of its labor-intensive economy have greatly impacted global economic restructuring. Using thorough ethnographic research, this volume examines the consequences of urban schooling and citizenship education through which school and social processes contribute to the production of unequal class relations. It explores the nexus of citizenship education and identity-forming practices of poor migrant youth in an attempt to foresee the new class formation in Chinese society. This volume opens up the

"black box" of citizenship education in China and examines the effect of school and societal forces on social mobility and life trajectories.

**Advanced Chinese for Creative and Productive Business**

Springer

The four-volume set LNCS 7724--7727 constitutes the thoroughly refereed post-conference proceedings of the 11th Asian Conference on Computer Vision, ACCV 2012, held in Daejeon, Korea, in November 2012. The total of 226 contributions presented in these volumes was carefully reviewed and selected from 869 submissions. The papers are organized in topical sections on object detection, learning and

matching; object recognition; feature, representation, and recognition; segmentation, grouping, and classification; image representation; image and video retrieval and medical image analysis; face and gesture analysis and recognition; optical flow and tracking; motion, tracking, and computational photography; video analysis and action recognition; shape reconstruction and optimization; shape from X and photometry; applications of computer vision; low-level vision and applications of computer vision.

**Children's Books in Print, 2007** Stanford University Press

This research explores

possible strategies that China might employ to outcompete the United States. The authors of this report aim to support U.S. planning, educate readers about Chinese strategy, and spur discussion on U.S.-China competition.
