GRIFFIN ZAYDEN

Trees of Paradise and Pillars of the World CopánThe History of an Ancient Maya Kingdom
 This monograph reports the results of the Quiriguá Project Site Periphery Program, five seasons (1975-1979) of archaeological survey and excavation in the 96 km² immediately adjoining the classic Maya site of Quiriguá. Ashmore identifies and helps us understand where and how the people of Quiriguá lived. She presents detailed material evidence in two data catalogues, for the floodplain settlement adjoining Quiriguá and for sites in the wider periphery. The work situates Quiriguá settlement firmly in a regional context, benefiting from the extraordinary abundance of information amassed in southeastern Mesoamerica since 1979. It sheds new light on the political, economic, and social dynamics of the region including the sometimes-fractious interactions between Quiriguá, its overlords at Copan, and people elsewhere in the Lower Motagua Valley and beyond. Content on this book's CD-ROM may be found online at this location: <http://core.tdar.org/project/376582>. Quiriguá Reports, IV
The Rise and Fall of an Ancient Maya Kingdom The Interpreter Foundation
 This is volume 16 of Interpreter: A Journal of Mormon Scripture published by The Interpreter Foundation. It contains articles on a variety of topics including: "Toward Ever More Intelligent Discipleship," "A Response to Denver Snuffer's Essay on Plural Marriage, Adoption, and the Supposed Falling Away of the Church – Part 1: Ignoring Inconvenient Evidence," "A Response to Denver Snuffer's Essay on Plural Marriage, Adoption, and the Supposed Falling Away of the Church – Part 2: Facade or Reality?," "Careless Accounts and Tawdry Novelties," "The Prodigal's Return to the Father: House of

Glory and Rediscovery," "The Deuteronomist Reforms and Lehi's Family Dynamics: A Social Context for the Rebellions of Laman and Lemuel," "The Doctrine of Resurrection in the Book of Mormon," "Not Leaving and Going On to Perfection," "Learning Nephi's Language: Creating a Context for 1 Nephi 1:2," "The Treason of the Geographers: Mythical "Mesoamerican" Conspiracy and the Book of Mormon," "John Bernhisel's Gift to a Prophet: Incidents of Travel in Central America and the Book of Mormon," "A Treasure Trove of Questions," "The Theory of Evolution is Compatible with Both Belief and Unbelief in a Supreme Being."

A unique and wide-ranging introduction to the major prehispanic and colonial societies of Mexico and Central America, featuring new and revised material throughout *Mesoamerican Archaeology: Theory and Practice*, Second Edition, provides readers with a diverse and well-balanced view of the archaeology of the indigenous societies of Mexico and Central America, helping students better understand key concepts and engage with contemporary debates and issues within the field. The fully updated second edition incorporates contemporary research that reflects new approaches and trends in Mesoamerican archaeology. New and revised chapters from first-time and returning authors cover the archaeology of Mesoamerican cultural history, from the early Gulf Coast Olmec, to the Classic and Postclassic Maya, to the cultures of Oaxaca and Central Mexico before and after colonization. Presenting a wide range of approaches that illustrate political, socio-economic, and symbolic interpretations, this textbook: Encourages students to consider diverse ways of thinking about Mesoamerica: as a linguistic area, as a geographic region, and as a network of communities of practice Represents a wide spectrum of perspectives and approaches to Mesoamerican archaeology, including coverage of the Postclassic and Colonial periods Enables readers to think critically about how explanations of the past are produced, verified, and debated Includes accessible

introductory material to ensure that students and non-specialists understand the chronological and geographic frameworks of the Mesoamerican tradition. Discusses recent developments in the contemporary theory and practice of Mesoamerican archaeology. Presents new and original research by a team of internationally recognized contributors. Mesoamerican Archaeology: Theory and Practice, Second Edition, is ideal for use in undergraduate courses on the archaeology of Mexico and Central America, as well as for broader courses on the archaeology of the Americas.

[Making Sense of the Old Testament God](#) Oxbow Books

"This volume explores the dynamics of human adaptation to social, political, ideological, economic, and environmental factors in Mesoamerica and includes a wide array of topics, such as the hydrological engineering behind Teotihuacan's layout, the complexities of agriculture and sustainability in the Maya lowlands, and the nuanced history of abandonment among different lineages and households in Maya centers. The authors aptly demonstrate how culture is the mechanism that allows people to adapt to a changing world, and they address how ecological factors, particularly land and water, intersect with nonmaterial and material manifestations of cultural complexity. Contributors further illustrate the continuing utility of the cultural ecological perspective in framing research on adaptations of ancient civilizations. This book celebrates the work of Dr. David Webster, an influential Penn State archaeologist and anthropologist of the Maya region, and highlights human adaptation in Mesoamerica through the scientific lenses of anthropological archaeology and cultural ecology."

[Understanding Early Classic Copan](#) University of Texas Press

Tatiana Proskouriakoff, a preeminent student of the Maya, made many breakthroughs in deciphering Maya writing, particularly in demonstrating that the glyphs record the deeds of actual human beings, not gods or priests. This discovery opened the way for a history of the Maya, a monumental task that Proskouriakoff was engaged in before her death in 1985. Her work, *Maya History*, has been made ready for press by the able editorship of Rosemary Joyce. *Maya History* reconstructs the Classic Maya period (roughly A.D. 250-900) from the glyphic record on stelae at numerous sites, including Altar de Sacrificios, Copan, Dos Pilas, Naranjo, Piedras Negras, Quirigua, Tikal, and Yaxchilan. Proskouriakoff traces the spread of governmental institutions from the central Peten, especially from Tikal, to other city-states by conquest and intermarriage. Thirteen line drawings of monuments and over three hundred original drawings of glyphs amplify the text.

Indigenous allies helped the Spanish gain a foothold in the Americas. What did these Indian conquistadors expect from the partnership, and what were the implications of their involvement in Spain's New World empire? Laura Matthew's study of Ciudad Vieja, Guatemala--the first study to focus on a single allied colony over the entire colonial period--places the Nahua, Zapotec, and Mixtec conquistadors of Guatemala and their descendants within a deeply Mesoamerican historical context. Drawing on archives, ethnography, and colonial Mesoamerican maps, Matthew argues that the conquest cannot be fully understood without considering how these Indian conquistadors first invaded and then, of their own accord and largely by their own rules, settled in Central America. Shaped by pre-Columbian patterns of empire, alliance, warfare, and migration, the members of this diverse indigenous community became unified as the Mexicanos--descendants of Indian conquistadors in their adopted homeland. Their identity and higher status in Guatemalan society derived from their continued pride in their heritage, says Matthew, but also depended on Spanish colonialism's willingness to honor them. Throughout *Memories of Conquest*, Matthew charts the power of colonialism to reshape and restrict Mesoamerican society--even for those most favored by colonial policy and despite powerful continuities in Mesoamerican culture.

[Settlement Archaeology at Quirigua, Guatemala](#) Hunter Publishing, Inc

In *Houses in a Landscape*, Julia A. Hendon examines the connections between social identity and social memory using archaeological research on indigenous societies that existed more than one thousand years ago in what is now Honduras. While these societies left behind monumental buildings, the remains of their dead, remnants of their daily life, intricate works of art, and fine examples of craftsmanship such as pottery and stone tools, they left only a small body of written records. Despite this paucity of written information, Hendon contends that an archaeological study of memory in such societies is possible and worthwhile. It is possible because memory is not just a faculty of the individual mind operating in isolation, but a social process embedded in the materiality of human existence. Intimately bound up in the relations people develop with one another and with the world around them through what they do, where and how they do it, and with whom or what, memory leaves material traces. Hendon conducted research on three contemporaneous Native American civilizations that flourished from the seventh century through the eleventh CE: the Maya kingdom of Copan, the hilltop center of Cerro Palenque, and the dispersed settlement of the Cuyumapa valley. She analyzes domestic life in these societies, from cooking to crafting, as well as public and private ritual events including the ballgame. Combining her findings with a rich body of theory from anthropology, history, and geography, she explores how objects—the things people build, make, use, exchange, and discard—help people remember. In so doing, she demonstrates how everyday life becomes part of the social processes of remembering and forgetting, and how “memory communities” assert connections between the past and the present.

[Emblem and State in the Classic Maya Lowlands](#) Yale University Press

Archaeologists are continually faced with a pervasive problem: How can cultures, and the interactions among cultures, be differentiated in the archaeological record? This issue is especially difficult in peripheral areas, such as El Salvador, Honduras, and southern Guatemala in the New World. Encompassing zones that are clearly Mayan in language and culture, especially during the Classic period, this area also includes zones that seem to be non-Mayan. The Southeast Maya Periphery examines both aspects of this territory. For the Maya, emphasis is on two sites: Quirigua, Guatemala, and Copan, Honduras. For the non-Maya zone, information is presented on a variety of sites and subregions—the Lower Motagua Valley in Guatemala; the Naco, Sula, and Comayagua valleys and the site of Playa de los Muertos in Honduras; and the Zapotitan Valley and the sites of Cihuatán and Santa Leticia in El Salvador. Spanning over two thousand years of prehistory, from the Middle Preclassic through the Classic and the poorly understood Postclassic, the essays in this volume address such topics as epigraphy and iconography, architecture, site planning, settlement patterns,

and ceramics and include basic information on chronology. Copan and Quirigua are treated both individually and in comparative perspective. This significant study was the first to attempt to deal with the Periphery as a coherent unit. Unique in its comparative presentation of Copan and Quirigua and in the breadth of information on non-Maya sites in the area, The Southeast Maya Periphery consists largely of previously unpublished data. Offering a variety of approaches to both old and new problems, this volume attempts, among other things, to reassess the relationships between Copan and Quirigua and between Highland and Lowland ceramic traditions, to analyze ceramics by neutron activation, and to define the nature of the apparently non-Mayan cultures in the region. This book will be of major interest not only to Mayanists and Mesoamerican archaeologists but also to others interested in the processes of ethnic group boundary formation and maintenance.

The Serial Stelae Cycle of "18-Rabbit-God K," King of Copan Routledge

The first volume to focus on the Early Classic context (A.D. 400-650) of the Maya city of Copán combines and synthesizes many different research methods and disciplines, interpreting data that contradict, enhance, and supplement previous work. Its methods are conjunctive, including and integrating research in archaeological surveys and excavations with studies in art, hieroglyphics, history, forensic/biological anthropology, and chemical analyses of teeth, bones, and other materials. The book is not just multidisciplinary but interdisciplinary, linking, for example, the architecture of monuments with epigraphy, language concepts, and human events. Until recently, scholars speculated as to whether K'inich Yax K'uk' Mo' was an alleged or fictitious founding father of the Copán dynasty. This work presents new information on him and his accomplishments, showing how we almost certainly now have his skeleton with its parry fractures from the battlefield or the ball court, along with abundant descriptions of this and other burials.

Ancient Maya Artistry in Stucco and Stone BRILL

Assemblies of rectangular stone pillars, or stelae, fill the plazas and courts of ancient Maya cities throughout the lowlands of southern Mexico, Guatemala, Belize, and western Honduras. Mute testimony to state rituals that linked the king's power to rule with the rhythms and renewal of time, the stelae document the ritual acts of rulers who sacrificed, danced, and experienced visionary ecstasy in connection with celebrations marking the end of major calendrical cycles. The kings' portraits are carved in relief on the main surfaces of the stones, deifying them as incarnations of the mythical trees of life. Based on a thorough analysis of the imagery and inscriptions of seven stelae erected in the Great Plaza at Copan, Honduras, by the Classic Period ruler "18-Rabbit-God K," this ambitious study argues that stelae were erected not only to support a ruler's temporal claims to power but more importantly to express the fundamental connection in Maya worldview between rulership and the cosmology inherent in their vision of cyclical time. After an overview of the archaeology and history of Copan and the reign and monuments of "18-Rabbit-God K," Elizabeth Newsome interprets the iconography and inscriptions on the stelae, illustrating the way they fulfilled a coordinated vision of the king's ceremonial role in Copan's period-ending rites. She also links their imagery to key Maya concepts about the origin of the universe, expressed in the cosmologies and mythic lore of ancient and living Maya peoples.

Copan in modern Honduras was one of the great cities of the Classic Maya. Abandoned to the rain forest for nearly a thousand years, it was rediscovered in the early 1800s. Now, two centuries later, an international team of scholars is solving the puzzle of Copan and the ancient Maya. William Fash, himself one of the key contributors to the recent breakthroughs, describes how decipherment of the Maya inscriptions together with tomb finds have unlocked the secrets of Copan's history. For this revised edition, Professor Fash shows how recent discoveries in the Acropolis, urban wards, and rural redoubts of the Copan kingdom reveal fascinating insights into the life and times of royalty, nobles, and commoners in this distinguished Maya city. The uncovering of the extraordinary tomb of the dynasty's founder provides illuminating information on his origins and accomplishments, while archaeological and hieroglyphic studies have demonstrated the importance of Tikal and the great metropolis of Teotihuacan in the founding and long-term legitimization of the Copan royal line. New excavations in the royal residential area give a blueprint for the layout and functioning of Maya palaces, as well as dramatic evidence for the violent and sudden end to dynastic rule. 11 color and 109 b/w illustrations.

[Becoming Mexicano in Colonial Guatemala](#) Baker Academic

A recent string of popular-level books written by the New Atheists have leveled the accusation that the God of the Old Testament is nothing but a bully, a murderer, and a cosmic child abuser. This viewpoint is even making inroads into the church. How are Christians to respond to such accusations? And how are we to reconcile the seemingly disconnected natures of God portrayed in the two testaments? In this timely and readable book, apologist Paul Copan takes on some of the most vexing accusations of our time, including: God is arrogant and jealous God punishes people too harshly God is guilty of ethnic cleansing God oppresses women God endorses slavery Christianity causes violence and more Copan not only answers God's critics, he also shows how to read both the Old and New Testaments faithfully, seeing an unchanging, righteous, and loving God in both.

Memories of Conquest Archaeopress Publishing Ltd

Experience daily life in Maya civilization, from its earliest beginnings to the Spanish conquest in the 16th century. Narrative chapters describe Mayan political life, economy, social structure, religion, writing, warfare, and scientific methods. Readers will explore the Mayan calendar, counting system, hunting and gathering methods, language, and family roles and relationships. A revised and expanded edition based on the latest archaeological research, this volume offers new interpretations and corrects popular misconceptions, and shows how the Maya adapted to their environment and preserved their culture and language over thousands of years. Over 60 photos and illustrations, several of new archaeological sites, enhance the material, and an expanded resource center bibliography includes web sites and DVDs for further study. The closing chapter discusses what Maya civilization means for us today and what we can learn from Maya achievements and failures. A first-stop reference source for any student of Latin American and Native American history and culture.

Flower Worlds Duke University Press

Northeast of modern-day Mexico City stand the remnants of one of the world's largest preindustrial cities, Teotihuacan. Monumental in scale, Teotihuacan is organized along a three-mile-long thoroughfare, the Avenue of the Dead, that leads up to the massive Pyramid of the Moon. Lining the avenue are numerous plazas and temples, which indicate that the city once housed a large population that engaged in complex rituals and ceremonies. Although scholars have studied Teotihuacan for over a century, the precise nature of its religious and political life has remained unclear, in part because no one has yet deciphered the glyphs that may explain much about the city's organization and belief systems. In this groundbreaking book, Annabeth Headrick analyzes Teotihuacan's art and architecture, in the light of archaeological data and Mesoamerican ethnography, to propose a new model for the city's social and political organization. Challenging the view that Teotihuacan was a peaceful city in which disparate groups united in an ideology of solidarity, Headrick instead identifies three social groups that competed for political power—rulers, kin-based groups led by influential lineage heads, and military orders that each had their own animal insignia. Her findings provide the most complete evidence to date that

Teotihuacan had powerful rulers who allied with the military to maintain their authority in the face of challenges by the lineage heads. Headrick's analysis also underscores the importance of warfare in Teotihuacan society and clarifies significant aspects of its ritual life, including shamanism and an annual tree-raising ceremony that commemorated the Mesoamerican creation story.

Archaeology, Technology, and Ethics University of Arizona Press

This book offers many significant advantages to the student of Maya history. It gathers all of the available royal inscriptions of Copan in one place. It assigns the inscriptions to the correct kings. The drawings for each inscription have been cleaned up so the glyphs stand out clear and distinct. Each inscription has been gridded by letters and numbers for the exact location of each glyph. Every word has been translated or transliterated where possible. The author makes no pretense that these translations are the final word but at least now scholars have a single solid base from which to continue the work.
