 University of

 It has,  
 improbably,

been called  
 uncommonly  
 lucid, even  
 riveting by  
 The New York  
 Times, and it  
 was a finalist  
 for the 2004  
 National Book  
 Awards  
 nonfiction  
 honor. It is a

literally  
 chilling read,  
 especially in  
 its minute-by-  
 minute  
 description of  
 the events of  
 the morning of  
 9/11 inside  
 the Twin  
 Towers. It is  
 The 9/11

Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States-which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean-it details what went wrong on that day (such as

intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of

contemporary history. While controversial in parts-it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7-it is nevertheless an essential record of one of the most transformational events of modern times. *Book One of 'The Wheel of Time'* Macmillan A 1996 comparative history exploring the

significance of ceremonies performed by the western imperial powers to mark their territorial possession of the New World.

This gripping, page-turning fantasy adventure follows a dangerous quest through a divided world. From the high reaches of a tree, Fliss watches the soldiers attempting yet again to break through the invisible wall. Amid the

explosions, a drummer boy tries to escape. As he is about to be shot, Fliss reaches through the wall and pulls him to safety. But Fliss is dismayed to find she has saved an overfed rich boy. She is even more dismayed to learn that she must accompany him back through the wall on a special mission to rescue the Nightingale. The world they have to travel through is a perilous

one, full of predatory thieves, slave masters, beggars, dippers, mudlarks, drain-sliders, spies and wall-men. It is a world where the ruling families are caught up in a lethal power struggle. Will Fliss and the despised drummer boy learn to trust each other? Who is the Nightingale? And will they all make it back alive? [The Golden House](#)

Tate and his father don't exactly get along. As Tate sees it, his father has unreasonably high expectations for Tate to be the best—at everything. Tate finally learns what he's being prepared for when he

steals one of his dad's odd tech inventions and mercenaries ambush his school, killing his father and sending Tate on the run from aliens who look just like humans. All Tate knows—like how to make weapons out of oranges and lighter fluid—may not be enough to save him as he's plunged into a secret interspecies conflict that's been going on for centuries. Aided only by his girlfriend and his estranged

mother, with powerful enemies closing in on all sides, Tate races to puzzle out the secret behind his father's invention and why so many are willing to kill for it. A riveting, fast-paced adventure, *Scan* is a clever alien thriller with muscle and heart. *The Severed Tower* The Severed Tower A Conquered Earth Novel . Renewal of Life by Transmission. The most notable

distinction between living and inanimate things is that the former maintain themselves by renewal. A stone when struck resists. If its resistance is greater than the force of the blow struck, it remains outwardly unchanged. Otherwise, it is shattered into smaller bits. Never does the stone attempt to react in such a way that it may maintain itself against the blow, much less so as to render

the blow a contributing factor to its own continued action. While the living thing may easily be crushed by superior force, it none the less tries to turn the energies which act upon it into means of its own further existence. If it cannot do so, it does not just split into smaller pieces (at least in the higher forms of life), but loses its identity as a living thing. As long as it endures, it struggles to

use surrounding energies in its own behalf. It uses light, air, moisture, and the material of soil. To say that it uses them is to say that it turns them into means of its own conservation. As long as it is growing, the energy it expends in thus turning the environment to account is more than compensated for by the return it gets: it grows. Understanding the word "control" in this sense, it

may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up. Life is a self-renewing process through action upon the environment. Beowulf Macmillan Lord of the Flies meets War of the Worlds in J. Barton Mitchell's alien-invaded post-apocalyptic world where two teens and a young girl

with amazing powers must stop the aliens' mysterious plan Earth has been conquered by an alien race known as the Assembly. The human adult population is gone, having succumbed to the Tone---a powerful, telepathic super-signal broadcast across the planet that reduces them to a state of complete subservience. But the Tone has one critical flaw. It only affects the population once they

reach their early twenties, which means that there is one group left to resist: Children. Holt Hawkins is a bounty hunter, and his current target is Mira Toombs, an infamous treasure seeker with a price on her head. It's not long before Holt bags his prey, but their instant connection isn't something he bargained for. Neither is the Assembly ship that crash-lands near them shortly after.

Venturing inside, Holt finds a young girl who remembers nothing except her name: Zoey. As the three make their way to the cavernous metropolis of Midnight City, they encounter young freedom fighters, mutants, otherworldly artifacts, pirates, feuding alien armies, and the amazing powers that Zoey is beginning to exhibit. Powers that suggest she,

as impossible as it seems, may just be the key to stopping the Assembly once and for all. Midnight City is the breathtaking first book of the Conquered Earth series. *The Sumerians* Penguin The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high

civilization in the history of man, spanning the fifth to the second millennium B.C. This book is a compendium of what is known about them. The author outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and

modern world. The Science, Theory, and Ethics of Sexual Orientation Rhemalda Publishing The world is changing. Once, Witch Song controlled everything from the winds to the shifting of the seasons-but not anymore. All the Witches are gone, taken captive by a traitor. All but Brusenna. As the echo of their songs fades, the traitor grows stronger. Now she is coming for Brusenna.

Her guardian has sworn to protect her, but even he can't stop the Dark Witch. Somehow, Brusenna has to succeed where every other Witch has failed. Find the traitor. Fight her. Defeat her. Because if Brusenna doesn't, there won't be anything left to save. *Odyssey* Harper Collins Finest heroic poem in Old English celebrates the exploits of Beowulf, a young nobleman of southern

Sweden. Combines myth, Christian and pagan elements, and history into a powerful narrative. *Genealogies*. **A CONQUERED EARTH Short Story** Macmillan The first behind-the-scenes account of life with the legendary ravens at the world's eeriest monument The ravens at the Tower of London are of mighty importance: rumor has it that if a raven from the

Tower should ever leave, the city will fall. The title of Ravenmaster, therefore, is a serious title indeed, and after decades of serving the Queen, Yeoman Warder Christopher Skaife took on the added responsibility of caring for the infamous ravens. In *The Ravenmaster*, he lets us in on his life as he feeds his birds raw meat and biscuits soaked in blood, buys their food at Smithfield

Market, and ensures that these unusual, misunderstood, and utterly brilliant corvids are healthy, happy, and ready to captivate the four million tourists who flock to the Tower every year. A rewarding, intimate, and inspiring partnership has developed between the ravens and their charismatic and charming human, the Ravenmaster, who shares the folklore, history, and superstitions

surrounding the ravens and the Tower. Shining a light on the behavior of the birds, their pecking order and social structure, and the tricks they play on us, Skaife shows who the Tower's true guardians really are—and the result is a compelling and irreverent narrative that will surprise and enchant. **A Conquered Earth Novel**

Mitchell's sci-fi  
tour de force  
Conquered  
Earth series

concludes as the characters try and unite Earth's disparate survivors to overthrow its alien invaders once and for all. The Severed Tower is no more. Zoey has been taken by the Assembly, and time is running out. Just as their feelings are finally out in the open, Holt Hawkins and Mira Toombs are forced apart onto individual quests to try and unite Earth's survivors against their

alien invaders. Mira ventures west, holding together a fragile coalition of Wind Traders, White Helix, and rebel Assembly, a mix of groups that do not trust the other. The voices of the Assembly in Mira's head threaten to drive her mad, and she soon learns a grim reality: that the one resource they have on their side, the Strange Lands artifacts, are dying, and soon the world will be a very different

place. Meanwhile, Holt travels with Ravan and Avril to Faust, the dangerous desert city of the Menagerie pirate guild. He goes not only to resolve his issues with Tiberius, its tyrannical leader, but to enlist the Menagerie in the fight to save Zoey. Except Tiberius has his own problems. The Menagerie is splintering, word of rebellion is spreading. If Holt wants their help, he might have to

side with his greatest enemy in exchange. Valley of Fires is the final installment in J. Barton Mitchell's Conquered Earth series, following Midnight City and The Severed Tower, and it brings the genre-bending series to an utterly unforgettable close. Cosimo, Inc. "This fascinating little volume explores the stuff that dreams are made of and the role the pandemic is playing in them. The dreams from Barrett's survey are riveting vignettes-- from terrifying to touching to hilarious. Her decades of scientific research and clinical practice inform incisive commentary on what these dreams reveal about society's response. She

offers simple exercises for managing anxieties over COVID-19 and for inspiring adaption in this unique period of history. A great read!" - Amy Tan, author of *The Joy Luck Club*  
 DREAM: I looked down at my stomach and saw dark blue stripes. I "remembered" these were the first sign of being infected with COVID-19. DREAM: My home was a Covid-19 test center. People weren't wearing

masks. I'm taken aback because I wasn't asked to be a test site. I'm worried that my husband and son (who actually lives out of state) will catch it because of my job as a healthcare worker. DREAM: I was a giant antibody. I was so angry about COVID-19 that it gave me superpowers, and I rampaged around attacking all the virus I could find. I woke so energized!

Since the COVID-19 pandemic swept around the world, people have reported unusually a vivid and bizarre dream lives. The virus itself is the star of many--literally or in one of its metaphoric guises. As a dream researcher at Harvard Medical School, Deirdre Barrett was immediately curious to see what our dream lives would tell us about our deepest reactions to

this unprecedented disaster. Pandemic Dreams draws on her survey of over 9,000 dreams about the COVID-19 crisis. It describes how dreaming has reflected each aspect of the pandemic: fear of catching the virus, reactions to sheltering at home, work changes, homeschooling, and an individual's increased isolation or crowding. Some patterns are quite similar to other crises

Dr. Barrett has studied such as 9/11, Kuwaitis during the Iraqi Occupation, POWs in WWII Nazi prison camps, and Middle Easterners during the Arab Spring. There are some very distinctive metaphors for COVID-19, however: bug-attack dreams and ones of invisible monsters. These reflect that this crisis is less visible or concrete than others we have faced. Over the past three

months, dreams have progressed from fearful depictions of the mysterious new threat . . . to impatience with restrictions . . . to more fear again as the world begins to reopen. And dreams have just begun to consider the big picture: how society may change. The book offers guidance on how we can best utilize our newly supercharged dream lives to aid us through the crisis and beyond. It

explains practical exercises for dream interpretation, reduction of nightmares, and incubation of helpful, problem-solving dreams. It also examines the larger arena of what these collective dreams tell us about our instinctive, unconscious responses to the threat and how we might integrate them for more livable policies through these times. Deirdre Barrett, PhD is a dream researcher at

Harvard Medical School. She has written five books including Pandemic Dreams and The Committee of Sleep, and edited four including Trauma and Dreams. She is Past President of The International Association for the Study of Dreams and editor of its journal, DREAMING.

As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World War II began, the athlete became an

airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and, beyond, a trial even greater.

Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion.
