flashcards on Quizlet.bio chapter 11 evolution Flashcards and Study Sets | QuizletThe theory of

evolution explains how life diversified after its origin and does not address the origin of life itself.

Replicators A, B, C, and D become encapsulated by a membrane of fatty acids they produced.

Building the membrane resulted in a great metabolic cost. The new membrane provides limited

control over the new microenvironment, is fairly permeable, and frequently allows unneeded

substances in while allowing newly made molecules to dissipate into the environment.evolution
