SINGLETON BOOKER

World Migration Report 2011 United Nations Condensed into a detailed analysis and a selection of continent-wide datasets, this revised edition of *World Population & Human Capital in the Twenty-First Century* addresses the role of educational attainment in global population trends and models. Presenting the full chapter text of the original edition alongside a concise selection of data, it summarizes past trends in fertility, mortality, migration, and education, and

examines relevant theories to identify key determining factors. Deriving from a global survey of hundreds of experts and five expert meetings on as many continents, *World Population & Human Capital in the Twenty-First Century: An Overview* emphasizes alternative trends in human capital, new ways of studying ageing and the quantification of alternative population, and education pathways in the context of global sustainable development. It is an ideal companion to the county specific online Wittgenstein Centre Data Explorer.
People on the Move

United Nations
The aging and migration megatrends and their impact on spatial – regional and local – labor market performance is the core theme of this book, and thus together define its scope and focus. The contributions provide an overview of key aging and migration issues in various countries together with analyses of their varied impacts on regional labor markets. Systematic database research and related empirical analyses are used to map out the complex and dynamic nature of these trends, while cutting-edge economic and modeling techniques are used to analyze them. In closing, the book critically reviews and assesses selected

policy measures designed to cope with the effects of aging and migration on regional labor markets.

An Overview of Trends in Caribbean Migration in the Light of Integration

United Nations
Issues of migration and asylum have been of concern in recent years. This statistical publication brings together data collected centrally by Eurostat. Migration statistics covers such areas as asylum seekers, refugees, immigration and emigration. What constitutes a "migrant" is still open to interpretation and is based in part on the intention of the individuals concerned. Some historical statistics and a country population comparison offer an overview. Data

on Malta and Cyprus is included for the first time.

The Impact of International Migration Lexington Books

In 2019, there were an estimated 1.8 billion people aged 15-29 in the world population. As these people grow up, entering social and economic independence along the way, they will potentially reshape economies, politics and social relations around the world. International initiatives have also put the importance of young people centre-stage for sustainable development in the future, but the knowledge-base on migration patterns of young people around the world is lacking. With this in mind, this report examines youth

and migration globally, in Africa and in the European Union.

Specifically, we a) define the concepts of youth and youth migration; b) map demographic trends globally and in Europe to highlight where youth populations are growing or declining; and c) describe migration trends to show which young people are moving, where and why.

World Population & Human Capital in the Twenty-First Century Rowman & Littlefield

This publication presents recent evidence and analytical work on the impact and future perspectives of demographic trends in the workforce, taking also into account education, skills and

geographical mobility.
New Patterns of Irregular Migration in Europe UN

Presents an overview of the trends, causes and consequences of international migration within and from the East and Southeast Asian countries at the end of the 20th century. Assesses the socio-economic implications and policy issues.

The Age of Migration

African Books

Collective

The economic, social and demographic impacts of migration are large and increasing.

Policymakers, researchers and other stakeholders need data on migrants and their integration into societies. These data need be comprehensive,

accurate and frequently updated.

There is no single source that can provide such data, but by combining several sources together it might be possible to produce the information that users need. Some countries have developed methods for combining administrative, statistical and other data sources for the production of migration statistics. This publication provides an overview of the ways that data integration is used to produce migration statistics, based on a survey of migration data providers in over 50 countries.

Rural-Urban Migration in Vietnam OECD

Publishing

This book comprises the historical overview

of migration processes in Kyrgyzstan, contemporary migration trends in international migration and various social, economic and political impacts of migration. It presents the findings of longstanding, in-depth, comprehensive and empirical research. Insights are maximized by applying the multi-sited strategy of analyzing both the migrant's place of origin and that of destination. The primary goal of the book is to contribute to a better understanding of the meanings and the impacts of contemporary international migration processes in Kyrgyzstan and their relevance for local livelihoods.
Advanced Introduction to Migration Studies

Staten Island, N.Y. : Center for Migration Studies
Migration and Remittances from Mexico: Trends, Impacts, and New Challenges, edited by Alfredo Cuecuecha and Carla Pederzini, is an indispensable resource for Mexico-U.S. migration studies. It includes a review of the most important available databases for the study of migration from Mexico and Latin America to the United States.

European Social Statistics Springer

The media and prevailing policy discourses convey an increasingly apocalyptic image of the massive outflows of desperate Africans fleeing poverty and war at home. This study tries to achieve a

more empirically and quantitatively founded understanding of the nature, scale and recent evolution of irregular West African migration to Maghreb and Europe.

Furthermore, the publication evaluates how policies to manage trans-Saharan and trans-Mediterranean migration have affected current migration patterns.

Labour Migration

Patterns in Europe

Bloomsbury Publishing

Traces changes in trends and types of migration in Africa during the precolonial, colonial and post-colonial eras. Covers literature sources, historical migrations, internal and international migration, female migration, the brain drain, labour migration and refugee

migration.

Migration in Africa

OECD Publishing

The report shows that important research has been undertaken on the transnational crime aspects of migrant smuggling, including on routes, smuggling organizations (such as criminal networking and facilitation), smuggler profiles and fees/payment.

Likewise, there is an emerging academic literature on migrant smuggling, particularly the economic and social processes involved in smuggling, which has largely been based on small-scale qualitative research, mostly undertaken by early career researchers.

Contributions from private research companies, as well as investigative

journalists, have provided useful insights in some regions, helping to shed light on smuggling practices. There remains, however, sizeable gaps in migration policy research and data, particularly in relation to migration patterns and processes linked to migrant smuggling, including its impact on migrants (particularly vulnerability, abuse and exploitation), as well as its impact on irregular migration flows (such as increasing scale, diversity and changes in geography). Addressing these systemic and regional gaps in data and research would help deepen understanding of the smuggling phenomenon, and provide further insights

into how responses can be formulated that better protect migrants while enhancing States' abilities to manage orderly migration.

Free Movement of Workers and Labour Market Adjustment Recent Experiences from OECD Countries and the European Union CIFOR

Compilation of conference papers on international migration trends - covers theoretical issues, migration policy, control of internal migration, migrant worker labour supply, refugees, legal status of emigrants, impact on economic development and labour markets, sociological aspects, etc. Bibliography pp. 365 to 413. Conference held in Bellagio 1979

Jun.
Rural Migration in the Near East and North Africa – Regional trends Baywolf Press
 The contributions of this book examine contemporary dynamics of migration and mobility in the context of the general societal transformations that have taken place in Europe over the past few decades. The book will help readers to better understand the manifold ways in which migration trends in the region are linked to changing political-economic constellations, orders of power and inequality, and political discourses. It begins with an introduction to a number of theoretical approaches that address the nexus between migration and

general societal shifts, including processes of supranationalisation, EU enlargement, postsocialist transformations and rescaling. It then provides a comprehensive overview of the political regulation of migration through border control and immigration policies. The contributions that follow detail the dynamic changes of individual migration patterns and their implications for the agency of mobile individuals. The final part challenges the reader to consider how policies and practices of migration are linked to symbolic struggles over belonging and rights, describing a wide range of expressions of such conflicts, from

cosmopolitanism to racism and xenophobia. This book is aimed at researchers in various fields of the social sciences and can be used as course reading for undergraduate, graduate and postgraduate courses in the areas of international migration, transnational and European studies. It will be a beneficial resource for scholars looking for material on the most current conceptual tools for analysis of the nexus of migration and societal transformation in Europe.

Patterns, Policies and
Migration Propensity in
the Western Balkans*

Edward Elgar
Publishing

Irregular migrants are doubly victims. Leaving

a difficult, sometimes impossible situation in their country of origin, they are often confronted with serious deficiencies in reception and migration policy management. New patterns of irregular migration in Europe provides an overview of the complex and interrelated issues linked to irregular migration, such as clandestine/illegal migration, requests for and refusal of asylum, and traffic in human beings, to name but a few. -- Council of Europe.

Missing links in the
forest-migration nexus
Springer

This is the third report in a series begun in 1997 and a subsequent report in 1999, about migration in the CIS countries. The

2001/2002 Review - contains a statistical and analytical update of recent migration flows for 12 countries in Eastern Europe and Central Asia (EECA), taking into account relevant political and historical developments that interact with population movements. The report also contains a description and analysis of the specific features of irregular migration in the EECA countries, where numerous unresolved economic, social, ethnic and environmental problems still contribute to the growth of illegal migration, trafficking in persons and smuggling of migrants and thus complicate the challenges of migration management. [from

the IOM website] Migration and Remittances from Mexico Global Trends in Migration
 The primary goal of this study is to present the results of a comprehensive scope of key opportunities and challenges for harnessing migration for inclusive growth and development at the regional level in Southern Africa. The main objectives were as follows: Provide an overview of regional migration stocks and flows identifying regional trends, drivers and impacts from existing research literature and official data; Profile migrant characteristics at the regional level including demographic composition, types of migration and occupational profile;

Examine the relevance of multilateral, continental and regional migration instruments, policies, protocols, agreements and forums with a view to identifying actions required to move the regional migration management agenda forward and align with the goal of enhancing migration for inclusive growth and development in Southern Africa; Analyze the key initiatives, opportunities and obstacles to developing a coherent, integrated and rights-regarding approach to migration management including areas of common commitment and ownership, and points of actual and potential conflict and disagreement between states; Conduct a

gender analysis of regional migration dynamics including gender dimensions of migration, challenges, dangers and vulnerabilities confronting migrant women and other vulnerable groups, and gender analysis of migration management in Southern Africa; Identify potential programming areas that are weak or underdeveloped.

Guidance on Data Integration for Measuring Migration

Springer

Global Migration provides a clear, concise, and well-organized discussion of historical patterns and contemporary trends of migration, while guiding the readers through an often difficult and politicised topic. Aimed primarily

at undergraduate and Master's students, the text encourages the readers to reflect on economic processes, politics, immigrant lives and raises debates about inclusion, exclusion, and citizenship. The text critically highlights the global character of contemporary migration and the importance of historical context to current processes and emphasises the role of gender, race and national ideologies in shaping migration experiences. Using over a decade of their own insight into teaching undergraduate migration courses in the US and the UK, and the knowledge and understanding of the subject they have acquired as migration

researchers, the authors offer an accessible and student-friendly manner for readers to understand and explore the complex issue of migration. The book features numerous international case studies, a chapter dedicated to the perspective of the immigrants themselves, as well as key terms and further readings at the end of each chapter. Both theoretically and empirically informed *Global Migration* examines the subject in a holistic and expansive way. It will equip students with an understanding of the complex issues of migration and serve as a guide for instructors in structuring their courses and in identifying important

bodies of scholarly research on migration issues.

International Migration in Southeast Asia

United Nations

This paper provides an overview of the current state of knowledge about migration and its relation to forests in Indonesia. An evaluation of current patterns and trends of migration finds that while mobility is increasing nationally and internati

Immigration Structures and Immigrant Lives

Routledge

The Near East and North Africa (NENA) has always been affected and in many ways shaped by the

high levels of human mobility. However, rural migration - or migration to, from and between rural areas - is often overlooked, despite its important ramifications for food security, agriculture, rural development and regional disparities. In the next decade, persistent poverty, climatic threats and increasing competition for natural resources may fuel greater levels of migration across NENA countries. This report was designed to provide policy makers, practitioners and development partners with an overview of the main challenges and opportunities of rural migration in the NENA region.
