This book contains the solutions to problems in the main Introduction to Financial Accounting Textbook. This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student.

Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.

Proven Pedagogical Framework helps students learn accounting concepts and apply them to decision making in the business world: Includes Study Objectives are first stated at the beginning of the chapter and then re-appear in the margin at each point that the objective is discussed. The objectives are then summarized at the end of the chapter. Chapter-Opening Previews are charts that visually represent the chapter's outline. Each of these chapter "road maps" establishes the chapter's key concepts and their relationship to one another. Solutions show how problems should be solved. Throughout each chapter, Decision Toolkits summarize the key features of the decision tools discussed in the prior section. A Using the Decision Toolkit exercise, with a solution, challenges students to use financial information from a financial statement to make a financial decision. This feature appears after the last Before You Go On section in each chapter. Annotations in Chapter 1 explain each pedagogical element of the text the first time it appears.
