This book provides the reader with a range of questions and explanations related to essential aspects of the neural, hormonal and gastrointestinal physiology. The focus of the book is on understanding the homeostatic control in each system by using questions to challenge the reader to think through physiology. In addition, functional integration of the different organ systems is highlighted in an area such as neuroendocrinology and in the study of the neural mechanisms in the gastrointestinal tract. This is the second Physiology Question-Based Learning book, written by Prof. Dr. Cheng. He has taught physiology for thirty years. He has pioneered the international physiology quiz, which is now an annual event at the University of Malaya in Kuala Lumpur, Malaysia and at universities around the world. As quiz master, he has designed challenging questions to test concepts and understanding in physiology. This book reflects the style of questions asked during the physiology quiz. The questions are designed to stimulate integrative and homeostatic thinking in physiology. The Physiology Question-Based Learning books will be helpful to all students of Physiology in medicine, dentistry, pharmacy and allied health sciences. This work is written to make physiology learning engaging and enjoyable and to encourage effective teaching in physiology.

Vertebrate Endocrinology represents more than just a treatment of the endocrine system-it integrates hormones with other chemical bioregulatory agents not classically included with the endocrine system. It provides a complete overview of the endocrine system of vertebrates by first emphasizing the mammalian system as the basis of most terminology and understanding of endocrine mechanisms and then applies that to non-mammals. The serious reader will gain both an understanding of the intricate relationships among all of the body systems and their regulation by hormones and other bioregulators, but also a sense of their development through evolutionary time as well as the roles of hormones at different stages of an animal's life cycle. Includes new full color format includes over 450 full color, completely redrawn image Features a companion web site hosting all images from the book as PPT slides and .jpeg files Presents completely updated and revitalized content with new chapters, such as Endocrine Disrupters and Behavioral Endocrinology Offers new clinical correlation vignettes throughout

Designed to accompany *The Anatomy and Physiology Learning System, 4th Edition*, by Edith Applegate, this study guide helps you learn and review basic A&P concepts. Each chapter emphasizes medical terminology with a set of key terms, word parts, clinical terms, and abbreviations, and then adds a variety of fun-filled learning exercises, review questions, a quiz, and a word puzzle. The study guide corresponds to the textbook chapter for chapter. Chapter learning objectives help you focus on the most important material. Key concepts are defined on the first page of each chapter in the workbook. Learning exercises for each chapter include short answer, matching, and diagrams to label and color. Self-quizzes allow you to measure your progress and understanding. Fun and Games features end each chapter with a variety of engaging puzzles covering words and concepts. A chapter summary provides a brief review of each chapter. A chapter review provides questions for reinforcement and review of the concepts in each chapter.
