The veteran urban activist and author of the revolutionary Toxic Charity returns with a headline-making book that offers proven, results-oriented ideas for transforming our system of giving. In Toxic Charity, Robert D. Lupton revealed the truth about modern charity programs meant to help the

poor and disenfranchised. While charity makes donors feel better, he argued, it often hurts those it seeks to help. At the forefront of this burgeoning yet ineffective compassion industry are American churches, which spend billions on dependency-producing programs, including food pantries. But what would charity look like if we, instead, measured it by its ability to alleviate poverty and needs? That is the question at the heart of Charity Detox. Drawing on his many decades of experience, Lupton outlines how to structure programs that actually improve the quality of life of the poor and disenfranchised. He introduces many strategies that are revolutionizing what we do with our charity dollars, and offers numerous examples of organizations that have successfully adopted these groundbreaking new models. Only by redirecting our strategies and becoming committed to results, he argues, can charity enterprises truly become as transformative as our ideals.

Preaching to Convert offers an intriguing new perspective on the outreach strategies of U.S. evangelicals. Author John Fletcher frames these activities, from door-to-door proselytizing to the spirited sermons of superstar televangelists, as examples of activist performance, broadly defined here as acts performed before an audience in the hopes of changing hearts and minds. Most writing about activist performance has focused on left-progressive causes, events, and actors, and if evangelicals have appeared at all, they often appear as one-dimensional forces of ignorance or bigotry against which brave (left-leaning) activists must fight. Preaching to Convert argues against such a constricted view of activism and for a more nuanced understanding of U.S. evangelicalism as a movement defined by its desire to win converts and spread the gospel. In other words, evangelicals are activist performers par excellence. The book positions evangelicals as a diverse, complicated group confronting the loss of conservative Christianity's

default status in twenty-first-century U.S. culture. In the face of an increasingly secular age, evangelicals have been reassessing models of outreach. In acts like handing out Bible tracts to strangers on the street or going door-to-door with a Bible in hand, in elaborately staged horror-themed morality plays or multi-million-dollar creationist discovery centers, in megachurch services beamed to dozens of satellite campuses, and in controversial “ex-gay” ministries striving to return gays and lesbians to the straight and narrow, evangelicals are redefining what it means to be deeply committed in a pluralist world. The book’s engaging style and careful argumentation make it accessible and appealing to scholars and students across a range of fields.

Nonprofit organizations are arguably the fastest growing and most dynamic part of modern market economies in democratic countries. This book explores the frontiers of knowledge at the intersection of economics and the management of these entities. The authors review the role, structure and behavior of private, nonprofit organizations as economic units and their participation in markets and systems of public service delivery, assess the implications of this knowledge for the efficient management of nonprofit organizations and the formulation of effective public policy, and identify cutting-edge questions for future research. Chapters address five broad categories of scholarship: development and management of the diverse economic resources supporting nonprofit organizations; market behavior of nonprofits; strategic economic decision-making; evaluation and performance of them; and impacts and implications of public policies affecting nonprofit organizations. Topics include: income diversification and crowd-out among income sources, paid and volunteer labor markets, competition and collaboration among nonprofits and for-profits, pricing and diversification of nonprofit products and services, performance measurement and regulation, contracting, franchising and federation practices, and government taxation and funding. The book will help nonprofit scholars identify new areas of productive research, help practicing managers understand the underlying economics of their decision-making, and offer teachers and students a concise and penetrating view of key economic dimensions to managing nonprofit organizations.

Digital Mission: A Practical Guide for Ministry Online is designed as a theological and methodological exploration of online ministry with the specific goal of aiding the reader in creating an implementable online ministry strategy for a church or ministry. We are in the midst of a digital eruption. Digital technology has done more than interrupt or disrupt our everyday lives: it has erupted and completely transformed the landscape around us. S.I.M. technology (Social media, Internet technology and Mobile technology) along with its younger sibling G.R.A.I.N. (Genetics, Robotics, Artificial Intelligence and Nanotechnology) are reshaping our world so fast that we rarely take the time to stop and take note of what is happening and how we

are adapting (or not adapting) to the new digital landscape. This book is designed to help you to stop, observe, and adapt thoughtfully and purposefully. The following pages will attempt to answer the questions: What are the impacts of digital technology? What are the possibilities that they open for the church? What are the potential problems and risk factors? How do congregational leaders plan effective online ministry initiatives that will be faithful theologically to the nature of the church and the mission of God? How do churches move beyond simply transferring ministries online?
