Art-Based Supervision  
is a unique text for  
graduate supervision  
classes and seminars

as well as a resource  
for post-graduate  
supervisors and  
practitioners. It offers a  
new view of  
supervision, one that  
incorporates both  
images and words as  
tools to investigate and  
communicate the  
interactions that occur  
in therapy and in the  
systems in which  
clinicians work. The  
fundamental principles  
of supervision provided  
in the book are useful  
for anyone interested

in exploring the use of images to support reflection, understanding, and empathy in their work. Full-color images further enrich the narrative. In addition to supervision courses, Art-based Supervision may be used for introductory art therapy, psychology, social work, and counseling courses for readers interested in a broad range of intimate examples of the challenges of therapeutic work and the use of response art to grasp nuanced communication.

Becoming a Supervisor

tells the story of Trevor

who works as one of

the production team in

a small company that

makes toy boats. He is

thrust into the role of

supervisor

unexpectedly when his

general manager

reacts to his constant

suggestions of how

things could be better.

When the GM becomes

ill, Trevor struggles to take up the slack for several months until a new GM arrives. The core of the book follows Trevor's growth under the coaching of Julie, his new GM. As Trevor deals with one challenge after another, Julie guides him on a journey to learn the core skills needed by all front-line leaders. The reader takes away four key ideas: (1) Front-line leadership skills are not too complicated to learn. (2) These skills are something that they can develop in themselves, regardless of what their organization does. (3) Tools and skills are there to help solve real business problems; implementing the tools is not a strategy. (4) In your role as supervisor (directing or

responsible for others) you have to look after the mission of the company AND look after your people - doing only one is not an option. Essentially, this book is intended to give hope to a new supervisor or team lead. They will finish the book knowing that the skills they need can be learned and aren't that difficult to acquire. It is designed to introduce the central skills that any supervisor has to be able to master at least with a basic working competency: instructing, leading, and making improvements in their own area. It introduces some of the more widely used tools that a new supervisor may need. More importantly, it ties these tools and skills to

solving particular problems. Readers will understand that the tools are not important for their own sake, but only to the extent that the tools serve the larger objective of the organization. This book is designed to give the reader an entertaining and hopeful story about the very difficult transition from worker to supervisor, from being one of the crew to directing the crew. It is an emotionally tough transition, and the idea that someone could see a model of how it can work out will be helpful to folks new in a leadership role. Finally, the book provides a reference to other sources of information that will let the reader extend their learning about each of the tools or skills referenced in the

contents.

Around the world, hundreds of thousands of supervisors and leaders provide coaching, supervision and leadership to staff every day of the year, yet the majority of supervisors have never attended formal training about how to be an effective supervisor and leader.

The majority of supervisors do not refresh their skills, knowledge and capabilities to remain up to date or evaluate their supervisory practice regularly. Supervision is fundamental to ensure that employees meet the requirements of their role, feel supported and valued, and engage in ongoing growth and development. When supervision is effective, it reduces stress, fatigue and burnout. Supervision ensures that employees reflect on their work to maintain high performance and it supports well-being as a professional. This latest book is an essential guide for experienced supervisors and leaders. It is a

comprehensive book demonstrating how to provide effective supervision and leadership in the modern workplace. It assists leaders to understand the industrial and ethical context in which supervision is provided, how to evaluate the effectiveness of supervision, and shows supervisors and leaders the specific capabilities that are necessary to be a quality leader and supervisor. This book is a must-read for any supervisor or leader who wants to provide effective supervision and leadership. Each chapter provides valuable information and the latest research on supervision with reflective questions to guide supervisors in

their thinking and learning about supervision. *Supervisory Management E5 Im* South Western Educational Publishing This book assists current and aspiring supervisors in meeting the challenges and reaping the rewards of management and supervision. Frunzi and Savini provide an effective integration of basic supervisory research presented to readers in a practical, down-to-earth manner. Maintaining this clear, direct approach, the Fourth Edition emphasizes the person in an organization rather than traditional theories of management and supervisory philosophy. **The Basic of Supervisory Management,**

"Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management and Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts

illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace"--
