 simulatorPICAXE VSM is a full Berkeley SPICE circuit simulator,
 which will simulate complete electronic circuits using PICAXE
 chips. The BASIC program can be stepped through line by line
 whilst watching the input/output peripheral react toPICAXE
 Manual www.picaxeIn this digital dice circuit we have used 6
 LEDs, each LED represent a number (1-6) of Dice. LEDs start
 flashing as we press the Push button and stops when we release
 it. After release, illuminated LED tells the numbers, you got on
 Dice. Like if fifth no. LED remains ON after releasing the button,
 means you got 5 on Dice.Digital Dice Circuit Diagram using IC 555
 & IC 4017I am working on making an electronic dice, it has 7
 diode's in this shape: 0 0 0 0 0 0 0 With this I can make all the

numbers like a dice has. I got it configured in such a way that with the press of a button the dice will show the next number:
 Example: The dice shows 1 -> PushButton -> 2.

Product Details. PICAXE Editor 6 is the completely free software application for developing and simulating PICAXE BASIC, PICAXE Blockly and PICAXE flowchart programs under Windows (see AXEPad for Linux and Mac).. PICAXE Editor 6 supports all PICAXE chips and has a full suite of code development features such as: source code colour syntax highlighting and interactive tooltips
PICAXE-Editor-6 - Software - PICAXE
Dice is a squire type solid box which contains 6 different numbers on all of its sides. We throw dice on a surface to get a random number while playing the games. In this project we have tried to replicate it with a digital dice using arduino uno board. In place of throwing the dice, here we need to press a button to get a random number between ...
