Adventure Motorcycling Handbook Worldrider Publishing & Press
Moto-journalist Clement Salvadori has been riding motorcycles since the age of 15 and traveling all of his life, accumulating well over a million miles in the saddle across more than 70 countries on six continents. No Thru Road covers 30 different trips he has taken, to places like Afghanistan and Zimbabwe, since his first ride through western Europe in 1957. The stories are all original, though the subject may have appeared as a magazine article in a very different rendition. The book will appeal to adventure-travel enthusiasts and to motorcyclists and travelers of all persuasions. Adventurous riders will thoroughly appreciate the book, as in the description of kick-starting a 500cc single - never easy to do - at 17,200 feet in the Tibetan Himalayas. Or going up to Cape Tribulation in Australia's Queensland in 1974 when the only access was via a once-a-week ferry across the Daintree River. Or riding a bike to Pamplona, Spain, in 1960 in order to run with the bulls. Activists who want to get on their motorcycles and ride

down into Mexico's Copper Canyon will enjoy the book, as will the arm-chair traveler who is happy reading about traveling from Peru's Great Ica Desert over the Andes Mountains to the Amazon basin. Clement's adventures are arranged so the reader can open the book to any chapter, be it India, Nepal, the Sahara, New Zealand or Viet Nam, and not have to worry about following a thread. Lots of adventures, lots of good reading, lots of photos and illustrations. This book promises excellent entertainment and a glimpse into life as a moto-journalist.

Motorcycle Electrics Without Pain Die Gestalten Verlag-DGV
Intrepid journalist Patrick Symmes sets off on his BMW R80 G/S in search of the people and places in Ernesto "Che" Guevara's classic Motorcycle Diaries, seeking out his own adventure as well as the legacy of the icon Che would become. Symmes retraces the future revolutionary's path. And on the way he runs out of gas in an Argentine desert, talks a Peruvian guerrilla out of taking him hostage, wipes out in the Andes, and, in Cuba, drinks himself blind with Che's travel partner, Alberto Granado. Here is the unforgettable story of a wanderer's quest for food, shelter, and wisdom. Here, too, is the portrait of a continent whose dreams of utopia give birth not only to freedom fighters, but also to tyrants

whose methods include torture and mass killing. Masterfully detailed, insightful, unforgettable, *Chasing Che* transfixes us with the glory of the open road, where man and machine traverse the unknown in search of the spirit's keenest desires.

BMW began its life in aero-engineering--as anyone who's ever ridden one of its motorcycles might guess. These are bikes as close to airborne as any get. And what's more, fifty percent of all the motorcycles BMW has manufactured are still flying down the world's roads. These are the best, and in this book, the best of the best get their due, with brilliant, full-color photographs of BMW's classic models and detailed descriptions of their features, all located within the context of a concise history of this legendary marque. From the first of BMW's bikes, the R32, through the models that catapulted the company out of the ruins of World War II, to the latest bikes with the revamped opposed-twin-cylinder "boxer" engines that brought BMW its first fame--these are the bikes that made history, and, better yet, gave the most demanding riders a taste for flight.

I turn to see a rocket-propelled grenade screaming toward me. The ordinance strikes me in the side of the head, instantly blinding me in one eye and crushing the right side of my face. On September 9, 2010, while embedded with an Army unit and talking with locals in a small village in eastern Afghanistan, journalist Carmen Gentile was struck in the face by a rocket propelled grenade. Inexplicably, the grenade did not explode and Gentile survived, albeit with the right side of his face shattered and blinded in one eye. Making matters worse, his engagement was on the ropes and his fiancée absent from his bedside. *Blindsided by the Taliban* chronicles the author's numerous missteps and shortcomings while coming to terms with injury and a lost love. Inventive and unprecedented surgeries would ultimately save Gentile's face and eyesight, but the depression and trauma that followed his physical and emotional injuries

proved a much harder recovery. Ultimately, Gentile would find that returning to the front lines and continuing the work he loved was the only way to become whole again. As only he can, Gentile recounts the physical and mental recovery which included staring only at the ground for a month, a battle with opiate-induced constipation and a history of drug addiction, attacks by Taliban assassins born of post-traumatic stress, the Jedi-like powers of General David Petraeus, and finding normalcy under falling mortars in an Afghan valley. The result is an unapologetic, self-deprecating, occasionally cringe-worthy, and always candid account of loss and redemption in the face of the self-doubt common to us all. *Blindsided by the Taliban* also features the author's photos from the field that depict the realities of life in Afghanistan for soldiers and civilians alike. #KissedbytheTaliban Trail Blazer Publications

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

How is a book designed? What do book designers think about as they turn manuscripts into printed books? In this unique and appealing volume, the award-winning book designer Richard Hendel and eight other talented book designers discuss their approaches and working methods. They consider the problems posed by a wide range of projects--selection of a book's size and shape, choice of typeface for text and display, arrangement of type on the page, and determination of typographic details for all parts of the book within manufacturing and budget limitations. As omnipresent as books are, few readers are aware of the "invisible" craft of book designing. The task a book designer faces is different from that faced by other designers. The challenge, says Hendel, isn't to create something different or pretty or clever but to discover how to best serve the author's words. Hendel does not espouse a single philosophy of design or offer a set of instructions; he shows that there are many ways to design a book. In detailed descriptions of the creative process, Hendel and the eight other designers, who represent extensive experience in trade and scholarly publishing in the United States and Great Britain, show how they achieve the most effective visual presentation of words, offering many examples to illustrate

their choices. Written not only for seasoned and novice book designers, this book will fascinate others in publishing as well as all readers and authors who are curious to know how books end up looking the way they do.

Young and beautiful, Lois Pryce was a rising star at the BBC. Unbeknownst to her co-workers, Lois lived a parallel life as a biker babe with an overwhelming sense of wanderlust. So she packed in her career to ride her motorcycle on her own from the northernmost tip of Alaska to the southernmost tip of South America. Alone. Armed only with the Spanish words for 'caution' and 'cheese', Lois was rather under-prepared for multiple bear sightings, bribing her way through borders, spending a night in a Mexican brothel and crashing her bike in the wilds of Patagonia. She most certainly got the adventure she craved, and her pulse-pounding, soul-searching adventure has already attracted fans worldwide - a weblog that she kept whilst on her travels was receiving more than two-thousand hits a day. Her hilarious, brilliantly written travelog will appeal to anyone who's ever dreamt of jacking-it-all-in and running away to see the world.
