RANDALL MOON

PC Mag Springer-Verlag

Das V-Modell XT ist ein umfassendes Prozessmodell für die Planung und Durchführung der Systementwicklung in IT-Projekten. Es ist seit Februar 2005 für deutsche Bundesbehörden verbindlich und liegt seit Juni 2006 in der wesentlich erweiterten Version 1.2.1 vor. Dieses Buch vermittelt zwischen der Lehre des System Engineering, dem V-Modell XT-Katalog und der Praxis. Somit unterstützt es die Konfiguration und Implementierung V-Modell XT-basierter Projekte. Das V-Modell XT basiert auf neuen Konzepten und integriert ein größeres Leistungsspektrum, um IT-Projekttypen genauer und flexibler fokussieren zu können. Für Vorlesungen und fachkundige Autodidakten.

Daten sind die strategische Ressource des 21. Jahrhunderts. Es findet kein Geschäftsprozess, keine Kommunikation zwischen Geschäftspartnern, keine Wertschöpfung statt, ohne dass die involvierten Personen, Maschinen und IT-Systeme Daten nutzen, erzeugen oder verändern. Trends wie die Digitalisierung, Industrie 4.0 und Social Media tragen ebenfalls dazu bei, dass Datenmanagement zu einer Kernkompetenz für erfolgreiche Unternehmen dieser Zeit geworden ist. Damit Daten ihren ganzen Wert entfalten können, müssen sie stets in angemessener Qualität zur Verfügung stehen. Dies gilt besonders für Stammdaten, die zentralen Geschäftsobjekte eines Unternehmens. Dieses Buch zeigt einen ganzheitlichen Ansatz zum qualitätsbewussten Management von Stammdaten auf und richtet sich damit sowohl an Praktiker als auch an die Wissenschaft. Das „Framework für Stammdatenqualitätsmanagement“ wurde im Rahmen des „Competence Center Corporate Data Quality“ der Universität St. Gallen seit dem Jahr 2006 gemeinsam mit Unternehmen aus unterschiedlichen Industrien in zahlreichen praktischen Anwendungen entwickelt und verbessert. Neben den theoretischen Grundlagen räumt das Buch der praktischen Sicht mit 10 Fallstudien großen Raum ein, die erfolgreich durchgeführte Datenqualitätsprojekte praxisnah aufbereiten. Schließlich führt das Buch

noch Methoden und Werkzeuge für das Datenqualitätsmanagement auf, die (Stamm-)datenmanager bei Projekten im eigenen betrieblichen Umfeld unterstützen können.
