Want to improve the design of your website or web application without having to write CSS styles from scratch? Learning HTML and CSS is a lot more challenging than it used to be. Responsive web design adds more layers of complexity to design and develop websites. In this book you will become familiar with the new cards component, setting up the new flexbox grid layout, customizing the look and feel, how to follow the mobile-first development workflow, and more! Web designer and developer Jacob Lett has built 100+ websites and WordPress themes. Let him show you exactly how to build responsive layouts that look great in every browser and device. He shares what you can't learn from the official documentation... the process of actually building a full layout. This book is focused on the workflow and does not duplicate what you can already find in the official documentation. This book will show you how to reference the documentation and use it effectively in your projects. BONUS: Includes a link to download a free cheat sheets bundle and a 1 hour training video. Who is this for? You're an absolute beginner and want to become a web developer. You learned HTML and CSS 5-10 years ago but are new to responsive web design basics. You have used Bootstrap before but want to learn new techniques and workflow. What will I learn? Learn what responsive web design is, the history behind it, and how the Bootstrap 4 frontend framework makes it easier to implement. Learn the web design process and workflow necessary to make a responsive website and application with Bootstrap 4. Learn what's new in Bootstrap 4 with a deep focus on CSS3 Flexbox, Cards, and the responsive grid layout. What will I build? Responsive Marketing Homepage - Topics covered: responsive images, image cards, parallax background images, Google fonts, carousel cross-fade, and vertical centered text. Bootstrap Admin Dashboard - Topics covered: 100% height sidebar, card deck, Font Awesome icons, responsive charts and tables, and custom navigation tree menu. How is this training unique? Learn by doing as you build two professional responsive layouts examples step-by-step. Focused on the workflow vs duplicating what you can find in the official documentation. This book will show you how to reference the documentation and use it effectively in your projects. Uses hyperlinks to point to code demos, snippets, videos, and external resources. What do I need? Some experience with HTML and CSS is helpful but not necessary. Does not require knowing Sass, command line, or Photoshop. A computer with Google Chrome. A text editor like Atom and an internet connection. You want to build a beautiful website or user interface that works on all major

browsers. Let Jacob show you how step by step. Stay ahead of the web evolution with elegant combination front-end development Front-End Development with ASP.NET Core, Angular, and Bootstrap is the professional's guide to fast, responsive web development. Utilizing the most popular combination of web technologies for Microsoft developers, this guide provides the latest best practices and ASP.NET MVP guidance to get you up to speed quickly. The newest ASP.NET - now called ASP.NET Core - is leaner, easier to use, and less bound to the operating system and IDE, giving you the perfect opportunity to leverage third-party frameworks and libraries that provide functionalities not native to ASP.NET Core and Visual Studio. This book shows you how to integrate ASP.NET Core with Angular, Bootstrap, and similar frameworks, with a bit of jQuery Mobile, NuGet, continuous deployment, Bower dependencies, and Gulp/Grunt build systems, including development beyond Windows on Mac and Linux. With clear, concise instruction and expert insight, this guide is an invaluable resource for meeting the demands of modern web development. Combine ASP.NET Core with different tools, frameworks, and libraries Utilize third-party libraries with non-native functionalities Adopt the most up-to-date best practices for front-end development Develop flexible, responsive design sites The world of web development is evolving faster than ever before, and the trend is toward small, focused frameworks with modular capabilities. Microsoft has noticed, and upgraded ASP.NET Core to align with the latest industry expectations. Front-End Development with ASP.NET Core, Angular, and Bootstrap helps you elegantly integrate these technologies to develop the sites that the industry demands.

The power of ASP.NET MVC 5 stems from the underlying ASP.NET platform. To make your ASP.NET MVC applications the best they can be, you need to fully understand the platform features and know how they can be used to build effective and elegant MVC framework applications. The ASP.NET platform provides ASP.NET MVC applications with a rich suite of services including vital every-day features like extensible request handling, state management, and user authentication. Understanding how these features work is the difference between creating an average web application and the best-in-class. MVC applications that are architected with a thorough knowledge of the underlying

platforms are faster to write, faster to run, and more readily adaptable to change. In *Pro ASP.NET MVC 5 Platform*, best-selling author Adam Freeman explains how to get the most from the entire ASP.NET platform, beginning with a nuts-and-bolts description of the patterns and tools you need through to the most advanced features. He goes in-depth at every stage to give you the practical knowledge that you need to apply these concepts to your own code.

Unter dem Stichwort „Industrie 4.0“ ist in den letzten Jahren eine zunehmende Digitalisierung und Modernisierung von industriellen Produktionssystemen und -prozessen zu beobachten. Daher werden sich die Einsatzbedingungen und die Anforderungen an Mitarbeiter in Industriebetrieben wandeln, sodass neue Schnittstellen zwischen Mensch und Maschine notwendig werden. Wearable Computer (z. B. Datenbrillen und Smartwatches) stellen eine vielversprechende Technologie dar, die als Mensch-Maschine-Schnittstelle dienen kann. Der Einsatz dieser Technologie im Industriesektor wird in dieser Dissertation adressiert. Dazu werden der aktuelle Stand der Forschung sowie empirische Erkenntnisse zur Einsatzmöglichkeiten von Datenbrillen und Smartwatches, deren Wirkungen und zu berücksichtigende Rahmenbedingungen dargestellt. Aufbauend darauf werden drei Wearable Computer-Anwendungen entwickelt und evaluiert. Daraus werden schließlich Gestaltungsansätze abgeleitet sowie ein Vorgehensmodell zur Auswahl von industrietauglichen Wearable Computer-Endgeräten vorgeschlagen.

THE BOOK OF DIGITAL MARKETING "O'Reilly Media, Inc."

'Lee takes the oft cited belief that entrepreneurial endeavour lives and dies by the quality of the networks set in play, and subjects it to a rigorous and sustained analysis. In this he not only provides the reader with an authoritative theoretical and empirical foray into how entrepreneurs can create and sustain different forms of social capital, he does so with a strong sense of how power frames and taints its acquisition and use. Lee's book is a valuable contribution to our understanding of how in entrepreneurial activity, as in many walks of life, it is those with already established status who set the agenda by which opportunity and its pursuit is constituted'. Robin Holt, Professor of Entrepreneurship, Politics and Society, Copenhagen Business School, Denmark Robert Lee drives forward the agenda of socially-situated cognition research, moving beyond a static model of entrepreneurial cognition and offering instead a dynamic, socially embedded, communication-based perspective. He breaks from the traditional focus on either the individual entrepreneurial agent or the social and institutional context of entrepreneurship and makes a serious and skilful effort to provide an integrative understanding of the entrepreneur as placed in a complex, relational and ambiguous context. Recognising that entrepreneurship is both cognitive and relational, he plays with the idea of power within legitimacy creation and through this illustrates the ultimately distributed nature of entrepreneurial processes. This book adds to the growing domain of socially-situated entrepreneurial cognition research and will appeal to those interested in understanding the connection between cognition, communication and legitimacy in the context of entrepreneurship. Jean Clarke, Professor of Entrepreneurship and Organization, Leeds University Business School, University of Leeds, UK 'In a very welcome contribution to the literature, Robert Lee explores the social capital mobilised by entrepreneurs and develops a communicative action approach that yields important insights into how would-be entrepreneurs achieve legitimacy through navigating the complex web of power and status relations in which they are enmeshed. This book will appeal not only to those interested in entrepreneurship, but also be a valuable reference source for those interested in the workings of social capital'. Michael Bresnen, Professor of Organisation Studies, Alliance Manchester Business School, University of Manchester, UK This book presents a novel and intellectually stimulating account of the understudied links between entrepreneurial newcomers' bridging ties and their networked cognition. With a paucity of research addressing cognitively specific features of networked language and conduct, The Social Capital of Entrepreneurial Newcomers explores how entrepreneurial newcomers attune their cognition when interacting with high status and powerful vertical bridges. Largely reflecting communication accommodation perspectives, the author theoretically and empirically examines entrepreneurial newcomers' cognitive 'convergence' and 'divergence' when bridging.
