I'm All In! Everlove & Bohannon Publish
 Have you ever been in a place where everything is falling apart,
 but you felt peace? That is called the Weird Place and people
 arrive at this place more than one can know. Shon Powers takes a

spiritual journey through his teen years, military service, and more recent trials in order to uplift others. He also uses simple rules and fictional illustrations to tell others that they are never alone in this life. Throughout the passages, readers will be introduced to his alter ego, The Ol' Gray Duck.

This book provides a comprehensive exposition of M-ideal theory, a branch of geometric functional analysis which deals with certain subspaces of Banach spaces arising naturally in many contexts. Starting from the basic definitions the authors discuss a number of examples of M-ideals (e.g. the closed two-sided ideals of C^* -algebras) and develop their general theory. Besides, applications to problems from a variety of areas including approximation theory, harmonic analysis, C^* -algebra theory and Banach space geometry are presented. The book is mainly intended as a reference volume for researchers working in one of these fields, but it also addresses students at the graduate or postgraduate level. Each of its six chapters is accompanied by a Notes-and-Remarks section which explores further ramifications of the subject and gives detailed references to the literature. An extensive bibliography is included.

While aiming to become an illustrator, Koharu works in an editing department. In her free time, she dedicates herself to a video game starring her digital prince, Nobunaga. Koharu used to be a total normie until she was betrayed by her beloved boyfriend, but since then she's been afraid of romance and retreated into gaming... One day, her sister brings home Takumi, who's in a pickle due to losing his luggage upon arriving from the US, and he happens to look just like Nobunaga...?! Though Koharu is resistant at first, he ends up staying with them while he searches for his luggage. And on top of that, now Koharu has an illustration gig to handle, too?! Koharu gives it her all, but the job falls through anyway, leaving her depressed. Seeing this, Takumi offers some encouragement, which lightens Koharu's heart. But, when his luggage is found a few days later, it seems Takumi is leaving Japan to return home...?!

Design-Driven Development« heißt ein noch relativ junges Konzept zur agilen Softwareentwicklung, das auch im SAP-Umfeld verstärkt bei der Entwicklung von Unternehmenslösungen zum Einsatz kommt. Dabei gewinnt der Begriff »User Experience« sichtbar an Bedeutung. Das vorliegende Handbuch macht Ihnen den gesamten Entstehungsprozess einer Fiori-App mithilfe der Oberflächentechnologie SAPUI5 und der neuesten Werkzeuge der SAP Cloud Platform transparent. Durchlaufen Sie anhand eines durchgehenden Beispielprojektes leicht nachvollziehbar den gesamten Entwicklungszyklus einer modernen SAP-Fiori-Anwendung: beginnend bei der Erfassung der Problemstellung in der Discover-Phase, über die Lösungsfindung in der Design-Phase bis hin zur Entwicklung des User Interfaces. Lernen Sie, wie SAP BUILD und die browserbasierte Entwicklungsumgebung SAP Web IDE Sie dabei unterstützen. Das Buch wendet sich an SAP-Entwickler ohne SAPUI5-Erfahrung, die sich mit SAPUI5 und den zur Verfügung stehenden Tools der SAP Cloud Platform vertraut machen wollen. Es ist mit umfassendem Zusatzmaterial inkl. Videos angereichert. - Methodischer Einstieg in die SAPUI5-Entwicklung - Design-Driven Development verständlich erklärt - Einsatz der Cloud-Services BUILD und SAP Web IDE - inkl. umfangreichem Zusatzmaterial

Forty-Four Years. That's how long it took Jayee to start questioning if she was really who she wanted to be, who she was meant to be. Coming to this realization wasn't easy for Jayee, and neither was her transition from male to female. She was overwhelmed with information, unsure about opening up to anyone, and frightened, though excited, about what the future would hold. But the real trouble began when she started hormone

replacement therapy. She could no longer hide her true self from her loved ones, which led to lost relationships. And even when she came out to those she loved, she still had to hide her true identity from her abusive, judgmental roommate. Despite these challenges, Jayee grew into a strong, independent woman with a wonderful support system, love for herself, and a dream of sharing her story with the friends, family, and bullies of people like her.

Am Beginn einer jeden Erfolgsgeschichte steht eine einfache Frage: Warum? Warum sind manche Organisationen profitabler als andere? Warum werden einige Führungskräfte von ihren Mitarbeitern mehr geschätzt und andere weniger? Warum sind manche Menschen in der Lage, immer und immer wieder erfolgreich zu sein? In seinem Bestseller, der nun zum ersten Mal in deutscher Sprache erscheint, zeigt Simon Sinek, dass erfolgreiche Persönlichkeiten wie Martin Luther King Jr. oder Steve Jobs alle nach demselben, natürlichen Muster dachten, handelten und kommunizierten. Am Anfang ihres Wirkens stand immer die Frage nach dem Warum. Mit diesem Ansatz schafften sie es, bedeutende Dinge zu vollbringen und darüber hinaus ihre Mitstreiter zu inspirieren. Sich an diesen Vorbildern orientierend, gibt Sinek in seinem Ratgeber nun Führungskräften, Unternehmen, aber auch Privatpersonen einen Leitfaden an die Hand, der zum endgültigen Erfolg verhilft. Dabei erklärt er das so erfolgreiche Muster, welches dem goldenen Schnitt ähnlich ist, und auf den drei elementaren Fragen basiert: Warum? Wie? Was? Dadurch eröffnen sich dem Leser völlig neue Möglichkeiten und er wird lernen, dass die Motivierung von Mitarbeitern viel zielführender ist als ihre Manipulation! Und dies geht ganz einfach: einfach "Warum?" fragen.

In this book, we study theoretical and practical aspects of computing methods for mathematical modelling of nonlinear systems. A number of computing techniques are considered, such as methods of operator approximation with any given accuracy; operator interpolation techniques including a non-Lagrange interpolation; methods of system representation subject to constraints associated with concepts of causality, memory and stationarity; methods of system representation with an accuracy that is the best within a given class of models; methods of covariance matrix estimation; methods for low-rank matrix approximations; hybrid methods based on a combination of iterative procedures and best operator approximation; and methods for information compression and filtering under condition that a filter model should satisfy restrictions associated with causality and different types of memory. As a result, the book represents a blend of new methods in general computational analysis, and specific, but also generic, techniques for study of systems theory and its particular branches, such as optimal filtering and information compression. - Best operator approximation, - Non-Lagrange interpolation, - Generic Karhunen-Loeve transform - Generalised low-rank matrix approximation - Optimal data compression - Optimal nonlinear filtering

This history was compiled from the memoirs, diaries, and other personal documents of the two forest entomologists in charge of the first forest insect laboratories on the west coast. It traces the lives of the two pioneers from 1902 to 1952 as they pursued their careers in the USDA Bureau of Entomology, Division of Forest Insect Investigations. Cooperative bark beetle control projects with the USDA Forest Service, Park Service, and private timber owners guided much of their early activities. Later, when the laboratories were located on university campuses, cooperative research was undertaken with Forest Service Research Stations. The focus shifted to more basic research and, particularly, studies on the silvicultural management of bark beetle populations.
